Rhonda

As per our conversation the green 100# Tag has gone up in price. The current price is now \$173.00/ C #. After doing the math this works out to be \$36.50/M on your form. I've checked on the green 67# Bristol Velum and we can only get that in truck load quantities (I.E. 40 M #'s min) from the mill and that price is around \$135.00 /C #. After talking to my broker he could supply the Velum but there is a 2M # min at \$169.00 / C#. Your job only requires 1M #'s so the cost on paper then becomes \$ 70.98/ M to cover the extra cost of having to order min weight. Hope this answers you questions about the paper costs. If you need anything else let me know.

Thanks Tim
