**Re: FM 1378: from FM 544 to FM 3412
Collin County – Federal Aid Project
CSJ: 0619-06-007**

Dear Mr. Delgado:

The purpose of the revisions as described on the attached schedule of fees is to revise the set of plans completed in accordance to TxDOT PS&E Standards. Since this project has been removed from the TxDOT system, the revised set of plans will be redesigned in accordance to the City of Wylie's and Collin County's Departments of Engineering recommendations.

The new documents will provide for the construction of the intersection of FM 1378 at SH 544 to be constructed under the TxDOT PS&E Standards. These plans will be extended to the railroad intersection and will include the signalization and railroad pre-emption system.

The portion of the project from the railroad intersection to FM 3412 (Brown Street) will be constructed under the new guidelines.

The specific tasks to be performed for the completion of this project are outlined under the attached schedule titled "Additional Tasks for Taking Off System." Please let me know if this is acceptable.

Sincerely,

NATHAN D. MAIER
CONSULTING ENGINEERS, INC.

Anselmo Montemayor
Vice President
