

Rainy-Day Repair North & South Pavilions

Purpose:

Eliminate proposal to enclose North Pavilion. Correct the open space at the top along the sides so that lighter rain does not flood the space, adjust concrete floor so that water drains away from the center and off the slab.

Updated Cost Estimate: \$60,000 (from Bill Burke, Collin County) (Correcting the North Pavilion would take priority)

Justification For:

- ✓ Presently, rain eliminates use of these spaces as additional classroom space at the times when they are most needed.
- ✓ Space is needed to break large groups into smaller groups under the same roof for rainy day activities and volley ball/basket ball activities impossible.
- ✓ It is important to have athletic space available when weather is too stormy to do activities out on the trails/lake.
