Re: Collin County Juvenile Detention Center – Emergency Power Systems

Dear Bill:

This proposal is to provide Architectural and MEP services for the following items:

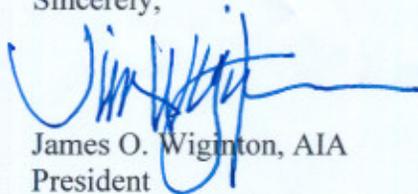

1. Review of existing drawings and site visit to identify existing conditions. While on site, A/E will meet with Collin County personnel to identify design requirements and project goals.
2. Design an emergency generator system (which shall include new generator, ATS, and main circuit breakers) to provide emergency power to 100% of the existing system. This work shall be identified as bid alternate.

We propose to perform these services for a lump sum fee of eight thousand five hundred dollars (\$8,500) upon your acceptance of this proposal and notice to proceed. Once given notice to proceed, it will take between two and three weeks to complete the design and coordinate between the team members.

Associated reimbursable expenses are in addition to the fee proposal and shall be handled per our Prime Agreement.

I trust this proposal is satisfactory. If you have any questions, please call. My cell number is 214-755-8089.

Sincerely,

James O. Wiginton, AIA
President
