**Purpose for Request:**

This software will allow officers to sign on once to their computer, eliminating the need to wait for the air card to start up and signing in to the VPN. It also keeps them from losing connection and having to resign in each time they go through a dead zone. If the software is not purchased they will resume as follows:

- Must revert to shared login IDs versus individual accounts per officer
- Users will require multiple logins
- Buffering of connection for intermittent signal loss will not happen
- Automatically switch to WI-FI when the cars are near the Sheriff's Office
- Compression of data (increased throughput) will be lost

Both the Information Technology and Sheriff's Office / Jail recommend moving forward with the procurement of this software.
