Mr Kleinheksel,

Attached are pictures of the area that needs fill dirt and grading before the new fence is installed. Also have attached pictures of the culvert , one after a heavy rain and two of both ends.

The preparation for the new fence is our first need. Would the culvert be something you can help us with? The cemetery Association would purchase the new steel culvert if Public Works would push the tree down and install the culvert.

Thank you so much, we really appreciate your help in this historic cemetery.
