The access roads were always a part of the project. Since the frontage roads did not go across the railroad, in our previous descriptions, we defined them as access roads, instead of frontage road (they were not continuous along the project).

However, during the recent stakeholders meetings, it was decided to carry the access roads across the railroad. This decision to connect the access roads across the railroad, invalidated our argument that these are just access roads and not frontage roads. Now these access roads run along US 380 between west of DNT and east of Preston making them continuous, there by defining them as frontage roads. Hence, it is now required to

submit a frontage road access request to TxDOT Division in Austin to get these frontage roads approved for US 380.

Anytime, the State or the County or the Cities need to add or extend frontage roads along a state/federal highway, the State requires a justification document that describes the need for these frontage roads. Since, US 380 does not have any frontage roads now and we are adding them as a part of this project, we are required to send out this frontage road access request.

Hope it makes sense. Let me know if need anything else.

Was the access road in the original plan or was it added recently?

Commissioner Shaheen:

TxDOT Austin had asked us to submit a frontage road request form for US 380. We had to get the support from the stakeholders for this frontage road request. Any support from stakeholders on this request will make our case stronger and help get the approval faster.

Hence we are requesting all the stakeholders to pass a resolution at their meetings in support of the project and the frontage roads that go with it. This resolution is in Frisco's city council agenda for today and Prosper has it in their agenda for next week. I think, Tracy has included this resolution as part of Commissioner's court agenda for this month.

Hopefully I answered your question here. Let me know if you need more information.

Rajesh:

In reviewing the resolution for US 380, it makes a point about frontage roads. Can you remind me why we're calling those out in the resolution?
