Re: CR618 Upgrade Project – Bond Road

The CR618 Bond Project has exhausted all funding and as such, Public Works will assume responsibility for its completion. Specifically, PW will coordinate and fund the relocation of a 3 inch water line approximately 6000 feet in length. This relocation also includes all the associated tasks such as

- All valve work
- Hydrant installation
- Reconnecting water service lines
- Testing and chlorinating the water line

The CR618 pavement project will ultimately increase the width of the road and ROW which necessitates the relocation of this water line. Hickory Creek Special Utility District (SUD) owns the water line and will hire a contractor to perform the work. Public Works will fulfill all road improvements including base preparation, surface treatments and drainage augmentation.

If you have any questions, please do not hesitate to contact me and I will respond accordingly.
