

Item Descriptions

Billy Goat Debris Loader DL 1801VE	\$6,000
A multi use piece of equipment that will assist with cleaning up shavings after livestock events in the show barn and stall barn, clean up large piles of leaves in Myers Woods and around the new amphitheater, and will assist applying mulch in all the gardens. This equipment will allow tasks to be completed more efficiently using less staff time.	
Equipment for Stall Barn Sound System	\$5,000
The current PA system installed in the Show Barn has the capability to program a microphone specifically to be used in the Stall Barn. We are missing an antenna and additional microphone to make this function work properly. The purchase of this equipment allows the Show Barn PA system to be used for one event in the Show Barn and another event in the Stall Barn at the same time. By using the Show Barn PA as designed, the portable PA is free to be used in other areas of the park when multiple events are taking place simultaneously.	
Floor Buffer	\$1,100
Having a floor buffer dedicated to this facility enables staff to accommodate back to back to back events efficiently and keep janitorial costs down.	
Concrete at the Pole Barn	\$4,500
Add additional 84' x 12' concrete on the south side of the Pole Barn to complete the walkway from east to west.
