Attn. Liz Gray

Ref. Request for Emergency vehicle equipment

Dear Ms. Gray

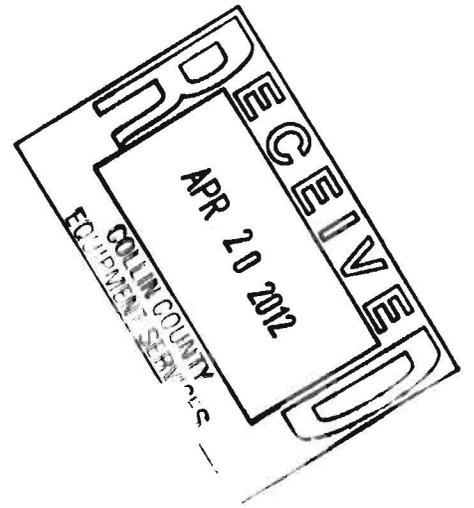

It has come to the attention of our fire department that certain emergency vehicle equipment has been taken out of service and been replaced. We have a definite interest and need for led light bars, light bar switches, sirens, siren box switches, and computer mounts for an emergency vehicle.

After contacting Frank Pell, he suggested I submit a formal request for the following units:

1. Led light bars that have been taken out of service along with switch panel
2. Siren boxes with switch panels
3. Computer mount and emergency vehicle consoles
4. Any available emergency vehicle equipment

Our inspection of your available equipment has determined that it will work on the vehicles that we are trying to outfit.

We are an all-volunteer fire department with very limited financial resources. Everything we own has been obtained through donations and fundraisers. The County's donation of this equipment would enhance our firefighting capabilities by giving us a better equipped rescue response vehicle and better response resource to our county-wide mutual aid network. Anything we get will be greatly appreciated.

Your consideration for our request will be greatly appreciated. For additional information I can be contacted at 214-475-1039 as well as firemancam77@yahoo.com

Sincerely,

Chief Cameron Brooks

Josephine Volunteer Fire Department
