RE: US 75 Utility Relocations Survey Notification

Dear Property Owner,

The City of McKinney Capital Improvements Program includes funding for the relocation of water facilities for the TxDOT US 75 Widening project. The water line relocations are from Justice Road to north of Bloomdale Road along US 75. Construction is scheduled to begin in the summer of 2012, pending easement acquisition, if needed, to construct the relocations.

Enclosed is an exhibit showing the limits of the project in your area. The yellow dashed line on the Exhibit represents a proposed 16 inch water line. You may be contacted in the upcoming weeks by a surveying firm working for Brown & Gay Engineers, Inc. requesting access to your property to complete a topographic survey along US 75 and Bloomdale Road. This is the first step in the project design phase and we appreciate your cooperation with the design team.

Easement acquisition, if needed, will begin in the near future once the survey is complete and the final water line alignment has been established. Our goal is to begin construction in summer of 2012.

If you have any questions or concerns regarding this project please feel free to contact me at 972-547-7573 or ptucker@mckinneytexas.org.

Sincerely,

Paul Tucker, P.E.
Senior Utility Engineer, City of McKinney
