Re: CR444 Water Line Relocation

Along with many other "50 Mile A Year" roads, CR444 is scheduled for improvements this year. Oriented north-south, the Class F rock road is 1.5 miles long extending from CR392 south to FM982. Currently, 23 residences and 3 businesses are situated on CR444. As a prerequisite to improving CR444, utilities must be relocated to accommodate the increased road width and ROW. Contractors are currently moving infrastructure for AT&T (fiber optic cable) and Oncor Electric (power poles) to approved areas at no cost to Collin County.

However, multiple water lines owned by Culleoka Water Supply Corp. must be addressed before improvements can begin. PW researched all options and determined a plan which consolidates all water lines into one proves to be the most prudent and economical course of action. CWSC provided Public Works with an estimate to replace the existing lines with one 8" line for slightly over \$190,000. Please see attachment for details.

Public Works requests Commissioners' Court consideration and approval to adopt the water line relocation improvements. If you have any questions, please do not hesitate to contact me and I will respond accordingly.
