Re: FY2013 IT Security Audit

The Information Technology department would like to respectfully inform Commissioners Court of a statement of work (SOW) which will be released to request an IT Security Audit. The SOW is being released to solicit a services provider who will work with the Information Technology department to review and test the security and integrity of the county's information systems. This type of security review is repeated on a recurring basis to ensure that county owned data and systems are appropriately protected.

This is a funded project within the existing FY2013 IT budget.
