To: Commissioners Court  
From: Ruben E. Delgado, PE; Director of Engineering  
Subject: Determination of Right of Way Footprint for US 75 at the Collin County Outer Loop

---

---

Discussions have begun concerning US 75, north of the Outer Loop, as a potential Interstate Highway.

In order to secure Right of Way for a future Interchange, we must first determine a footprint for an interchange that would be combatable with interstate highway design standards. In order to do this, we will need some level of Engineering in order to prepare us for the Right of Way acquisition process.

HNTB Corporation is the Engineering firm that prepared the design plans for Segment One, US 75 to SH 121, of the Collin County Outer Loop.

Funding amount and source will be determined at a later date.

We are seeking approval to negotiate a scope and fee with HNTB Corporation for engineering services related to the determination of a Right of Way footprint for the US 75 at Outer Loop interchange.
