Sent Via email: lbunch@co.collin.tx.us

Dear Ms. Bunch:

This letter is to inform you that MyChildren's has temporarily vacated Suite 100 of 900 East Park Boulevard in Plano, Texas 75024 due to elevated concentrations of fungal spores and structures in the unit.

In response to concerns about air quality, MyChildren's secured the services of SRP Environmental, LLC on 10 August 2013 to perform a fungal assessment of our rented space. This initial assessment identified visible fungal contamination on interior surfaces of the north wall of Suite 100, and a wall cavity sample indicates that elevated concentrations of fungal spores and structures were present in this wall cavity. A secondary assessment was completed by SRP on 24 August 2013 and verified that identified airborne fungal contamination present in the wall cavities was airborne throughout Suite 100. At the recommendation of our infection control office, and through consultation with SRP, we have decided to reduce risk to our patients, employees and visitors by vacating the site.

Under separate cover MyChildren's provided the SRP Environmental findings of 10 August 2013 to your office. A copy of the 24 August 2013 findings will be forwarded within 48 hours; as well as, a formal response to the remediation plan requested by the Collin County Construction and project Department through Armstrong Forensic Laboratory.

In the interim, MyChildren's Plans to build a hard barrier of the affected area.

Please contact me at (972) 740-1826 or Laura.carr@childrens.com for any additional information.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Laura Carr'.
