The Evaluation Committee will review all proposals received by the Opening date and time as part of a documented evaluation process. For each decision point in the process, the County will evaluate contractors according to specific criteria and will elevate a certain number of contractors to compete against each other. The proposals will be evaluated on the following criteria.

The County will use a competitive process based upon "selection levels." The County recognizes that if a contractor fails to meet expectations during any part of the process, it reserves the right to proceed with the remaining contractors or to elevate a contractor that was not elevated before. The selection levels are described in the following sections.

Level 1 - Procurement Requirements Assessment

Criteria assessed during Level 1:

- Conformance with RFP guidelines and submittal requirements.
- Authorized NetApp implementation partner

The first part of the elevation process is to validate the completeness of the proposal and ensure that all the RFP guidelines and submittal requirements are met. Those contractors who do not meet all the requirements for the RFP may, at the discretion of the County, be contacted to submit the missing information within two business days. Incomplete or noncompliant RFPs may be disqualified.

Level 2 – Detailed Proposal Assessment

The Evaluation Committee will conduct a detailed assessment of all proposals elevated to this Level. Criteria evaluated in Level 2:

Cost – 35% (Section 6.5)

Strength of Implementation Proposal -- 35%

- Completeness of implementation plan (Section 6.3)
- Resumes of installation personnel and relevant technical Certifications (Section 6.2)
- Documentation (Section 6.3)

References and Prior Project Experience -- 30% (Section 6.1 and 6.4)

It is anticipated that no more than three contractors will advance to Level 3 but Collin County reserves the right to adjust the number as necessary.

Level 3 –Best and Final Offer

Offerors who are susceptible of receiving award will be elevated to Level 3 for Best and Final Offer. Offeror will be asked to respond in writing to issues and questions raised by the County as well as any other cost and implementation planning considerations in the proposal, and may be invited to present their responses on-site. Proposals will be re-evaluated based upon Criteria in level 2.

Based on the result of the Best and Final Offer evaluation, a single offeror will be identified as the finalist for contract negotiations. If a contract cannot be reached after a period of time deemed reasonable by the County, it reserves the right to contact any of the other contractors that have submitted bids and enter into negotiations with them.

5.0 SPECIAL CONDITIONS AND SPECIFICATIONS

5.1 Authorization: By order of the Commissioners' Court of Collin County, Texas, sealed proposals will be received to provide the County with an Image Archive Storage Solution.

5.2 Intent of Request for Proposal: Collin County's intent of this Request for Proposal (RFP) and resulting contract is to provide offerors with sufficient information to prepare a proposal for an Image Archive Storage Solution for Collin County.

5.3 Term: Provide for a term contract commencing on the date of the award and continuing through project completion and enter into annual maintenance agreements with the option to renew annually.

5.4 Funding: Funds for payment have been provided through the Collin County budget approved by the Commissioners' Court for this fiscal year only. State of Texas statutes prohibit the County from any obligation of public funds beyond the fiscal year for which a budget has been approved. Therefore, anticipated orders or other obligations that may arise past the end of the current Collin County fiscal year shall be subject to budget approval.

5.5 Price Reduction: If during the life of the contract, the offeror's net prices to its customers for the same product(s) and/or services shall be reduced below the contracted price, it is understood and agreed that the County shall receive such price reduction.

5.6 Delivery Time: Offeror shall place product(s) and/or complete services at the County's designated location according to the schedule proposed by offeror in Section 6.5.

5.7 Delivery Location: Location for delivery will be noted on each purchase order issued.

5.8 Freight/Delivery charges: Shall be included in the submitted pricing. No additional fees for delivery/freight/fuel surcharge or other fees shall be invoiced or paid by Collin County.

5.9 Testing: Testing may be performed at the request of Collin County, by an agent so designated by the County, without expense to Collin County.

5.10 Samples/Demos: When requested, samples/demos shall be furnished to the County at no expense.

5.11 Basis for Action: The County currently has an existing EMC Avamar/Data Domain backup solution, deployed in 2013, and an IBM N-Series N6250, deployed in early 2014. The N6250 uses the Data OnTap operating system and is managed via the OnCommand System Manager. The Avamar grid runs version 6.1.1-87 of the EMC Avamar Enterprise Manager.

The basis for action is that image related data growth has become too large to be included within the Avamar backup grid. Based on January 2014 statistics, image data comprises about 24.5TB of the total 62.5 TB within the production storage system. The County is seeking proposals to implement an image archival strategy to retain a copy of the production image data, stored in selected volumes of the production N6250 storage system, in a distinct digital archive which will allow those images to be removed from the Avamar backup solution.

The County prefers proposals which will leverage the existing investment in both the IBM N-Series and the EMC Avamar solution while simultaneously enabling the County to retain an archive copy of image data with a minimum amount of management overhead or infrastructure changes to the current data storage locations. The County is open to all proposals that meet our objective and no offeror should be unduly constrained or limit proposals based on current business processes.

Offerors understand and acknowledge, by virtue of a proposal submission, that their project team shall be required to submit to, and pass, a rigorous background check conducted by the Collin County Sheriff's Office, prior to coming on-site to conduct implementation activities. The background check shall require the proposed team member(s) to submit personally identifiable information for the background check.

Collin County, Texas occupies approximately 886 square miles just northeast of Dallas, Texas. Collin County is one of the fastest growing counties in the nation and currently has a population of approximately 835,000 citizens.

5.12 PROJECT SCOPE: The County seeks the following services to be provided:

5.17 PROJECT DOCUMENTATION: The selected offeror shall be required to provide a complete documentation set of all configuration notes, MS Visio diagrams and other installation materials in an editable electronic format using common business productivity applications.

5.18 TECHNICAL INFRASTRUCTURE OVERVIEW: The Collin County architecture is a highly virtualized environment running Windows 2008 Server R2 and Windows 2012 R2 on VMware Vsphere ESXi 5.5 (for the virtualized servers). The servers are connected to a backend N6040 storage area network, currently being migrated to the N6250. The virtual structures are augmented by physical servers implemented for specific solutions. The current physical to virtual ratio within the county is approximately 80%.

5.18.1 EXTERNAL FACING COMPONENTS: Sitting between Collin County and world at large are a pair of Cisco 5540 Adaptive Security Appliances. The ASAs deliver high-performance, high-density security services with Active/Active high availability and Gigabit Ethernet connectivity to the DMZ environment. Internet connectivity to and from the county is provided via a primary 100MB Opti-Man Internet connection with a secondary 20MB Opti-Man connection for high availability purposes.

5.18.2 DMZ ENVIRONMENT: Situated between the Cisco ASA systems and the county internal network is the county DMZ environment. The DMZ environment houses all Internet facing county applications. A traffic to and from these servers will be routed through the ASA firewalls. Following existing county standards, any Internet facing system will reside within the DMZ Virtual Infrastructure comprised of IBM HS21 Blades installed within an IBM H Chassis Blade Center.

DMZ storage requirements are accommodated through an IBM DS3300 with approximately 3.5TB of disk space.

- 5.18.3 INTERNAL NETWORK: The County internal network is built upon a layer three routed network utilizing dual Nexus 7000 switches to deliver a core network layer. Dual Cisco 6509E switches provide a distribution layer within the main MDF and provide connectivity to both physical and virtual servers. Virtual servers are deployed on IBM H Chassis Blade Centers running HS23 blades (HS22 blades are used in the DMZ). Cisco Nexus 4000 switches, installed within the Blade Centers, provide both 1GB and 10GB connections between the servers and the storage network. The blade centers are attached to both the IBM N6040 and N6250 storage area network. CIF and iSCSI shares and NFS storage types are used within the county.

An enterprise Microsoft SQL Server implementation is deployed as a physical implementation with locally attached DS3300 and EXP3524 disk trays and hosts the transactional databases in the county. Installed databases run within a default instance with each application being allocated separate table space controlled through service accounts assigned within Microsoft Active Directory. No offerors are allowed system administrator access to the database servers. Additionally, database instances are not created for individual applications.

- 5.18.4 DATA BACKUPS: Data backups are currently managed through the County's implementation of the EMC Avamar/Data Domain with an optional tape-out to an LT03 or LT04 tape library.

5.19 TECHNOLOGY ARCHITECTURE: See attached diagram. (Attachment B)
