

Single Source Request for Bosch Surveillance Equipment

Collin County Construction Building Projects with Collin County Facilities Maintenance request that Bosch Surveillance Equipment be considered as the single source manufacture for all Collin County Government Detention Facilities and add Bosch cameras to the Constructions Standards list of Preferred Manufacturers based on the following justifications;

1.) Anyone can purchase the Bosch equipment or replacement components from hundreds of local retailers and online distributors;

2.) The Bosch surveillance equipment has been the standard replacement for existing cameras because the "head end" equipment to which all cameras connect is manufactured by Bosch.

3.) The Bosch cameras and related equipment are compatible with the software interface that allows easy setup of cameras. This also allows the field techs to make adjustments with the software verses the usual time consuming field adjustments with ladders and tools. These features would not be available with cameras from any other manufacturer.

4.) The Bosch manufacture provides tech support to any users, installers or maintenance technicians without the requirement for a user licenses, original purchase information or licensed security provider information.

Thank you for your consideration,

Bill Burke
