Collin County Purchasing Agent

Sole Source Justification – AiLIS Maintenance

To Whom It May Concern,

Granicus is the vendor designated to provide maintenance and support services for the Automated integrated Land Information System (AiLIS) for Collin County in reference to the contract award for bid #10007-11, signed on May 3, 2005, and as amended on October 12<sup>th</sup>, 2010. Granicus and American Cadastre LLC have provided unparalleled support and services to Collin County over the past ten years, and we look forward to continuing this service for many years to come.

Granicus is solely responsible for the current design and configuration of the system that has been deployed in Collin County. The system automates business operations relating, but not limited to, recordation of Clerk records, document scanning and storage, remote web access, and indexing. As the proprietary owner of the AiLIS software product suite, Granicus is the best vendor able to provide support and any future requested configuration changes to the AiLIS system. At this point, Granicus greatly appreciates the favorable consideration of Collin County to provide maintenance of the system as installed.

Kind Regards,

Jason Fletcher, CEO

Granicus, Inc.
