Mower	1996.06.001	IH mower #9 (McCormick-Deering No(mower with harnes, collar, leads, etc...) Sickle bar horse drawn mower. International Harvester Company "IHC No. 9". Mostly steel construction. 2 axle, drive unit off rear axle. Red, cream, and blue paint - original colors. This unit was introduced in 1939 and was produced through 1951. The one you have is probably painted correctly as IHC used red for the main frame, cream for wheels and blue for the cutter bar on their mowers until late 40's. All wood parts would have been 'Ochre'. Your model has an unusual 'truck' attachment that is explained in the literature I've sent.	Griggs, Brian

Tractor	1988.26.001	Hart Parr Gas Tractor #71569 Hart-Parr model 28-50 serial number 71569. Green body, 2 axle. Crank start 4 cyl horizontal mount, transverse engine. Steel wheels (red) with steel plate added over steel toothed (lug) drive wheels. Tin and angle iron canopy. At 4 1/4 tons (roughly the weight of a Chevy Suburban), this tractor is among the heaviest in the collection. The Hart-Parr was used during planting to draw the plow and plant the seed. During harvest a belt on a flywheel provided power to the thresher, binder, or other equipment. When the county began to pave roads with asphalt, steel plate was applied over the original toothed drive wheels. The canopy is a concession to the Texas sun and was an option on Model 28-50. A tractor of this size was used only on large farms. This tractor cost more than \$2000 in 1930 or 2/3 of a farmer's annual income. Allowing for inflation that works out to \$23,600 in 2006.	Wells, John
