4.1 The award of the contract shall be made to the responsible offeror, whose proposal is determined to be the best evaluated offer resulting from negotiation, taking into consideration the relative importance of price and other factors set forth in the Request For Proposals in accordance with Vernon’s Texas Code Annotated, Local Government 262.030.

The Evaluation Committee will review all proposals received by the Opening date and time as part of a documented evaluation process. For each decision point in the process, the County will evaluate contractors according to specific criteria and will elevate a certain number of contractors to compete against each other. The proposals will be evaluated on the following criteria.

The County will use a competitive process based upon “selection levels.” The County recognizes that if a contractor fails to meet expectations during any part of the process, it reserves the right to proceed with the remaining contractors or to elevate a contractor that was not elevated before. The selection levels are described in the following sections.

Level 1 - Procurement Requirements Assessment

Criteria assessed during Level 1:

- Conformance with RFP guidelines and submittal requirements.
- Authorized EMC implementation partner

The first part of the elevation process is to validate the completeness of the proposal and ensure that all the RFP guidelines and submittal requirements are met. Those contractors who do not meet all the requirements for the RFP may, at the discretion of the County, be contacted to submit the missing information within two business days. Incomplete or noncompliant RFPs may be disqualified.

Level 2 – Detailed Proposal Assessment

The Evaluation Committee will conduct a detailed assessment of all proposals elevated to this Level. Criteria evaluated in Level 2:

Points	Evaluation Criteria
10	Overall proposal with respect to stated needs and objectives (Proposal Format Item 6.1; 6.2; 6.3; 6.4)
60	General fit to the County business needs and technical direction (Proposal Format Item 6.4; 6.7)
30	References and Prior Project Experience (Proposal Format Item 6.5)

It is anticipated that Collin County will elevate proposals scoring at least 70 points (70%) to Level 3.

Level 3 – Cost (Maximum 25 Points)

Offerors who are elevated to level 3 will have their points combined from level 2 for a maximum 125 points total.

Points	Evaluation Criteria
25	Cost (Proposal Format Item 6.6)

Level 4 –Best and Final Offer

Offerors who are susceptible of receiving award will be elevated to Level 4 for Best and Final Offer. Offeror will be asked to respond in writing to issues and questions raised by the County as well as any other cost and implementation planning considerations in the proposal, and may be invited to present their responses on-site. Proposals will be re-evaluated based upon Criteria in level 2 and 3.

Based on the result of the Best and Final Offer evaluation, a single offeror will be identified as the finalist for contract negotiations. If a contract cannot be reached after a period of time deemed reasonable by the County, it reserves the right to contact any of the other contractors that have submitted bids and enter into negotiations with them.

Bill of Materials for the EMC solution is provided as part of this proposal document (Refer to Attachment A).

The County seeks proposals which will provide for the procurement, delivery, installation, configuration and migration of data to the revised backup solution. The County is seeking a single provider, qualified to sell and implement EMC solutions for these services.

 - 5.14.1.7.1 The County currently is using Avamar version 7.1.145
 - 5.14.1.7.2 The vendor shall provide direction to the County about upgrading to the most current version 7.2 SP1
 - 5.14.1.8 The vendor shall propose an implementation plan for the installation of the revised solution
 - 5.14.1.8.1 The proposal response shall identify methods to minimize system outages while at the same time being cognizant of limited rack space available within the County administration building

- 5.17 **PRODUCTION SUPPORT SERVICES:** If the proposed solution introduces new management tools or file/block copy software, the offeror proposal shall include an optional line item for one year of remote support and assistance which will allow the County storage administrators to address questions and issues with the delivered solution, as configured and installed by the offeror.
- 5.18 **PROJECT DOCUMENTATION:** The selected offeror shall be required to provide a complete documentation set of all configuration notes, MS Visio diagrams and other

installation materials in an editable electronic format using common business productivity applications.

5.19 **TECHNICAL INFRASTRUCTURE OVERVIEW:** The Collin County architecture is a highly virtualized environment running Windows 2008 Server R2 and Windows 2012 R2 on VMware Vsphere ESXi 5.5 (for the virtualized servers). The servers are connected to a backend N6040 storage area network, currently being migrated to the N6250. The virtual structures are augmented by physical servers implemented for specific solutions. The current physical to virtual ratio within the county is approximately 80%.

5.19.1 **EXTERNAL FACING COMPONENTS:** Sitting between Collin County and world at large are a pair of Cisco 5540 Adaptive Security Appliances. The ASAs deliver high-performance, high-density security services with Active/Active high availability and Gigabit Ethernet connectivity to the DMZ environment. Internet connectivity to and from the county is provided via a primary 100MB Opti-Man Internet connection with a secondary 20MB Opti-Man connection for high availability purposes.

5.19.2 **DMZ ENVIRONMENT:** Situated between the Cisco ASA systems and the county internal network is the county DMZ environment. The DMZ environment houses all Internet facing county applications. A traffic to and from these servers will be routed through the ASA firewalls. Following existing county standards, any Internet facing system will reside within the DMZ Virtual Infrastructure comprised of IBM HS21 Blades installed within an IBM H Chassis Blade Center. DMZ storage requirements are accommodated through an IBM DS3300 with approximately 3.5TB of disk space.

5.19.3 **INTERNAL NETWORK:** The County internal network is built upon a layer three routed network utilizing dual Nexus 7000 switches to deliver a core network layer. Dual Cisco 6509E switches provide a distribution layer within the main MDF and provide connectivity to both physical and virtual servers. Virtual servers are deployed on IBM H Chassis Blade Centers running HS23 blades (HS22 blades are used in the DMZ). Cisco Nexus 4000 switches, installed within the Blade Centers, provide both 1GB and 10GB connections between the servers and the storage network. The blade centers are attached to both the IBM N6040 and N6250 storage area network. CIF and iSCSI shares and NFS storage types are used within the county.

An enterprise Microsoft SQL Server implementation is deployed as a physical implementation with locally attached DS3300 and EXP3524 disk trays and hosts the transactional databases in the county. Installed databases run within a default instance with each application being allocated separate table space controlled through service accounts assigned within Microsoft Active Directory. No offerors are allowed system administrator access to the database servers. Additionally, database instances are not created for individual applications.

5.19.4 **DATA BACKUPS:** Data backups are currently managed through the County's implementation of the EMC Avamar/Data Domain with an optional tape-out to an LT03 or LT04 tape library.

5.20 **TECHNOLOGY ARCHITECTURE:** See attached diagram. (Attachment B)
