Add Document:

Attachment B Questions and Answers

Please note all other terms, conditions, specifications drawings, etc. remain unchanged.

Sincerely,
Michalyn Rains CPPO, CPPB
Purchasing Agent

**Access Control and Time Collection Systems
RFP No. 216-044**

Questions & Answers:

1. There are no drawings included in the Access Control and Time Collection RFP. Will you be issuing these at a later date or at the pre proposal conference?

The county does not have schematics of the existing access control system as that was added to buildings throughout the county over time. Building floor plans will be available for review at the pre-proposal conference on March 9th.

2. What is the estimated value of this project?

This is a budgeted project approved by Commissioner Court and funds are available. The RFP process is soliciting bids to determine the best cost effective option for the county.

3. How will it be funded (budget, grant...etc)? If it is not funded, what funding options are being researched?

This is a budgeted project approved by Commissioner Court and funds are available.

4. Also are you able to disclose a list of the vendors that responded to the RFI#2015-143?

**Advanced Connections
Associated Time
DAC Innovations
Entech Sales and Service
Enterprise Security Solutions of TX
Green Solution
Johnson Controls**

**Kaba Work Force Solutions
Knight Security Systems
Open Options Access Technology
Schneider Electric
Securadyne Systems
TimeClock Plus**

5. The RFP states the replacement of the existing system. I understand the requirements and the intent of the spec but just trying to clarify the word replacement and the reasons. What/why is driving the need to replace to the existing system?

The county has an access control system which only supports 125 Khz access cards. These cards are more susceptible to a “bump and run” type of cloning attack which could allow an un-authorized person to clone an access badge and gain access to non-public areas within the county.

6. I understand the need for new reader and card technology but trying to understand the need to change the software and panels?

The county seeks to improve the physical security posture within our organization. We are seeking a solution to migrate our access cards, and hence the access control readers, to the 13.5 Mhz spectrum. If a proposal is available which does not require a new software system but would just need to update the badges, readers and other relevant components the county will review the project and give it equal consideration with all other proposals in accordance with our evaluation criteria and process.

7. The RFP Access Control and Time Collection Solution calls for the brand "Open Options" is Collin, County open to alternative brands or solutions?

Open Options is not specified in the RFP, Collin County will consider any solution proposed.
