Hi,
All three donations are in excellent condition. None of Claude Fraizers's will need repairs, so no cost.

Rick Vencill's is in prime condition and will need some maintenance parts and fluids. I estimate about \$50 to \$100 for some minor repairs.

Sam Ratcliff's donation will need the most work and we will use parts that we have on hand from a duplicate to create a whole hay baler, so no major parts to be ordered. However, I estimate \$500 to replace spark plugs, WD-40, sand blasting, paint and other minor parts.

These estimates do not account for continued maintenance down the road such as new tires, just the initial repairs. This will all come out of our Restoration line item.

Judy,

Can you please tell me the condition of the items that you are requesting to be added to inventory?
Also, will any of them require repairs and if so how much are you estimating the repairs to be?

Thank you,

Jessica Shaw
