RE: Contract Amendment—Texas Department of State Health Services (DSHS)
FY2019 Grant for Tuberculosis Prevention and Control (State Funds)

This is a request to the Health Care Board of Trustees to accept the FY 2019 TB State grant award.

The FY 2019 award is being distributed as an amendment to the existing FY 2018 contract, increasing the DSHS grant funds from \$152,828 to \$366,788 and extending the contract through August 31, 2019. A 20% match (\$30,566) is required for expended FY 2019 funds, which will be achieved through existing personnel time. **The total allocation amount for September 1, 2018, to August 31, 2019, is \$152,828 which is level funding.**

The state funds are meant to provide basic services and related activities for tuberculosis (TB) prevention and control. TB is a communicable disease caused by *Mycobacterium tuberculosis*. TB is spread from person to person through the air. When a person with pulmonary or laryngeal TB coughs, sneezes, speaks, or sings, droplet nuclei containing *M. tuberculosis* are expelled into the air. Depending on the environment, these tiny particles (1-5microns in diameter) can remain suspended in the air for several hours. If another person inhales air containing droplet nuclei, transmission may occur.

Texas is ranked second in the top five leading U.S. States by number of TB cases. Collin County has outpaced Texas and the nation in population growth in the last few years and the demands for TB services in Collin County are likewise increasing. In order to keep up with those demands and to continue to fulfill our assigned public health role, we will use this money to continue to fund TB staffing, purchase TB supplies, pay for diagnostic studies, and meet other TB clinic needs.
