0001 - 06050-0001

## **Request Title**

ArcGIS Monitor

## NOT Included in the FY 2020 Recommended Budget Priority # 1

We currently don't have an effective method of monitoring our ArcGIS Enterprise deployment. We are not able to track network traffic and identify potential infrastructure problems. We are identifying the problems after they occur. We are in a reactive situation and when our customers let us know something is broken, we fix it.

New software - ArcGIS Monitor - We would like to be able to identify problems before they cause failure of the software (interactive maps). ArcGIS Monitor is tightly coupled with ArcGIS Enterprise and keeps track of the performance of the ArcGIS deployment and identifies potential network traffic problems and monitors other performance metrics. We would prefer to be in a proactive rather than reactive stance.

Item Description / Account Description	Recommendation	User Name / Title	New / Replace	Requested Qty	Requested Unit Cost	Recommended Qty	Final Unit Cost	Final Total Amount
ArcGIS Monitor	Not Recommended	Bret F / GIS Supervisor	New	1	\$10,000.00	0	\$8,720.00	\$0.00
