WHY USE CRAWFORD SERVICES INC?

Pre-Construction experience: Crawford Services Inc. has experienced engineering design expertise to value engineer a variety of projects including: healthcare, institutional, commercial and industrial. We will evaluate these systems from an initial cost, operating cost and maintenance cost perspective.

Aggressive project planning: CSI embraces the use of Estimation and Aptora workflow scheduling, purchasing, job costing, and project management.

CAD Design: CSI offers computer-aided design in its design/build process and job coordination drawings or any changes that may occur during any plan-and-spec projects. This helps us to reduce material and labor costs by taking the guesswork out of estimating and provide quick turn around and design on new and existing projects.

Sheet Metal Fabrication – CSI has an onsite full service shop that uses sheers, power brakes, TDC machines, Pittsburg & snap-lock seamers. Custom fabrication for stainless steel, aluminum, copper, poly vinyl as well as galvanized.

Scheduling - Each phase and system is scheduled for duration and manpower levels; therefore, labor expense is monitored and controlled weekly with each foreman.

Teamwork attitude: Maybe the single most important value Crawford Services Inc. brings to a project is teamwork. Our project team members bring years of experience and have a common goal of delivering the most cost effective, high performance facilities.

To Whom It May Concern:

Groves Electrical Service has been in business for over 41 years performing electrical and mechanical contracting and service. Never have we failed to complete a project. Our work force varies from 100 to 200 field workers to together with the necessary office support for the work as required. Our completed projects consist of schools, churches, factories, municipal structures as well as many others.

Our bonding limit has never been reached. Our total simultaneous work under contract has reached over \$33,000,000.

Included are the names of project managers and superintendents available for manning any project with a brief description of their abilities. All have the necessary license and experience for completing this project on time with very high quality and as specified.

Sincerely,

Lee C. Groves
