Mr. Terry Box, Sheriff
Collin County Texas
4300 Community Avenue
McKinney, Texas 75071

Dear Sheriff Box:

At the Corpus Christi, Texas 131st Annual Training Conference, July 19-22, 2009
Foretravel was exhibiting our proprietary LED traffic messaging system that was initially
designed for the Ford Crown Victoria. Our display was a system we installed on one of
Sheriff Kerss' patrol cars.

We held a drawing for a complimentary system and your Major Anderson's business card
was selected from the drawing bowl. The system, installation and initial programming is
completely complimentary and will be the property of the Collin County Sheriff's office.

Please let me know when you are ready for us to install the system.

Sincerely,

Lyle D. Reed
Chairman of the Board

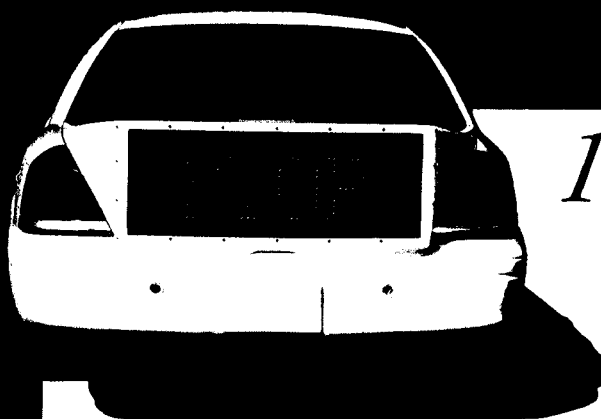

Enclosure: Foretravel Safety Products brochure and DVD.

TRAFFIC CONTROL SYSTEM

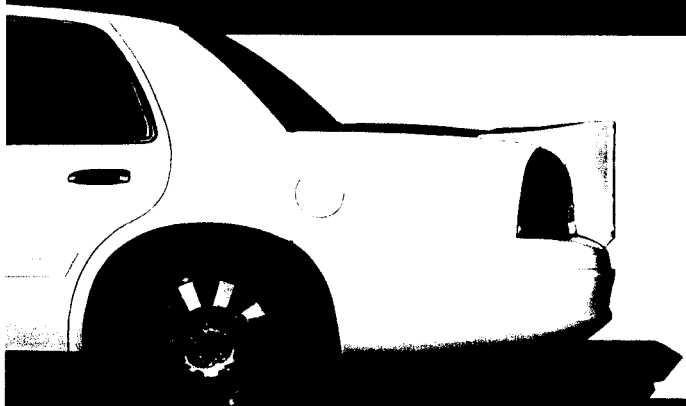

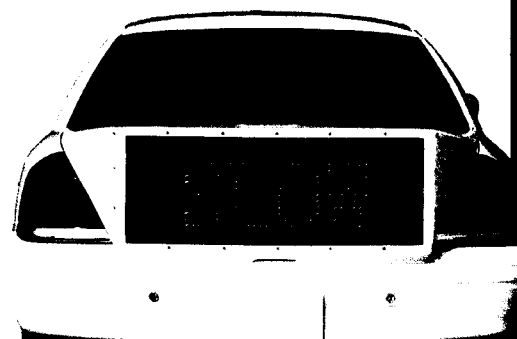

1 Programmable messages, with alpha numeric characters, symbols and special effects.

2 Currently using 8" tall letters/numbers.

3 Customize to your needs.

4 Just plug in the power cord. Select the message/messages you want displayed.

5 Permanent mounting enables vehicle to be driven normally. Does not interfere with trunk lid operation or storage space.

6 Currently the traffic control system is shown used on a Crown Victoria. We can adapt to any vehicle as the demand dictates.

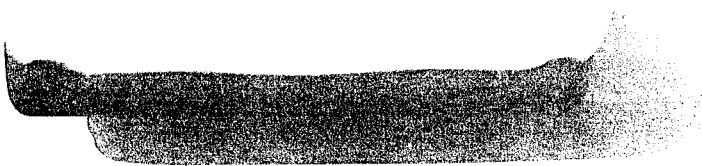

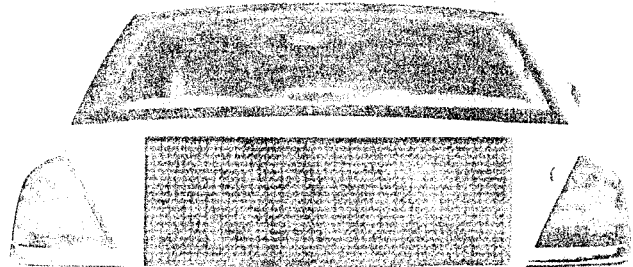

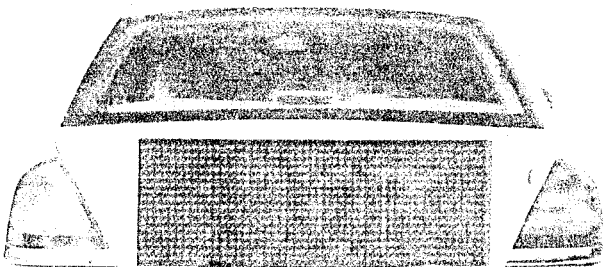

7 Special design does not obstruct rear view.
