4.4 Funding: Funds for payment have been provided through the Collin County budget approved by the Commissioners' Court for this fiscal year only. State of Texas statutes prohibit the County from any obligation of public funds beyond the fiscal year for which a budget has been approved. Therefore, anticipated orders or other obligations that may arise past the end of the current Collin County fiscal year shall be subject to budget approval.

4.5 Price Reduction: If during the life of the contract, the vendor's net prices to its customers for the same product(s) and/or services shall be reduced below the contracted price, it is understood and agreed that the County shall receive such price reduction.

All requests for price redetermination shall be in written form and shall include documents supporting price redetermination such as Manufacturer's direct cost, postage rates, Railroad Commission rates, Federal/State minimum wage law, Federal/State unemployment taxes, F.I.C.A, Insurance Coverage Rates, etc.. The bidder's past experience of honoring contracts at the bid price will be an important consideration in the evaluation of the lowest and best bid. Collin County reserves the right to accept or reject any/all of the price redetermination as it deems to be in the best interest of the County.

4.7 Advanced Notice/Completion Time: Advanced notice and completion time are important considerations in the evaluation of the lowest and best bid. Bidder shall state, in the space provided, the advanced notice required to provide striping services at the County's designated location(s).

4.7.1 Road Striping: shall be completed **within 30 days** of written notice to proceed by Collin County Public Works. Under favorable weather conditions, vendor shall complete eight (8) to ten (10) miles of road striping per day.

4.8 Testing: Testing may be performed at the request of Collin County, by an agent so designated by the County, without expense to Collin County.

Approximate usage does not constitute an order, but only implies the probable quantity the County will use. Commodities will be ordered on an as-needed basis.

4.10 Statement of Work/Scope of Services for Road Striping:

4.10.1 The successful bidder shall provide all equipment, materials, and traffic control necessary, and shall use a crew experienced in the work of installing such pavement markings on roadway surfaces.

4.10.2 Older road surfaces to receive the pavement markings shall be thoroughly cleaned by vendor using a power broom or air blast to remove all dirt, organic growth, loose rocks or other materials that will prevent adhesion of the paint to the roadway surface. All recently constructed new roads will be swept once by County power brooms operated by a county crew. It is the vendor's responsibility to verify that the roads are clean and free of debris before any spraying commences.

4.10.3 Paint type to be used for pavement markings shall be in accordance with Texas Department of Transportation (TxDOT) Departmental Material Specification DMS 8200. Paint designations are WPT-12 for white paint and YPT-12 for yellow paint.

4.10.4 The deviation rate in alignment of new markings shall not exceed one (1) inch per 200 feet of roadway. The maximum deviation in alignment from the established marking shall not exceed two (2) inches, nor shall any deviation be abrupt.

4.10.5 When deemed necessary by the County, the vendor, at his expense, shall place any temporary pilot markings required to facilitate the placement of the permanent markings in the alignment specified. Any and all additional markings placed on the roadway for alignment purposes shall be temporary in nature and shall not establish a permanent marking on roadway.

4.10.6 The new centerline and shoulder stripes shall overlap the existing centerline and shoulder stripes (where applicable). Centerline stripes, which lie between the No Passing Zone stripes, will be required to be removed, painted or re-striped.

4.10.7 Collin County shall provide to successful bidder a striping plan for those roads not previously striped or for roads which are to be re-striped to include no passing zones.

4.10.8 The rate for marking material shall be: minimum twenty-two (22) gallons per mile of solid, four inch (4") line, and forty-four (44) gallons per mile for solid, eight inch (8") line.

4.10.9 All markings placed shall have uniform and distinctive retro-reflective characteristics. Type III Large Gradation Texas Specification beads shall be applied to the paint marking at a rate sufficient to achieve uniform and distinctive retro-reflective characteristics. Under no circumstances shall the bead application rate be less than ten (10) pounds of beads per gallon of paint applied to the road surface. Striper speed shall not exceed ten (10) mph during application to prevent the beads from "rolling" in the paint film. Beaders should be checked to insure proper flow of application. It may be necessary to convert to gravity flow beaders (if not in use) to obtain optimum bead application. Provide a uniform distribution of beads across the surface of the stripe, with 40 to 60% bead embedment.

4.10.10 The equipment shall be capable of placing one four inch (4") broken line with either one (1) or two (2) continuous lines at the same time in alignment and spacing.

4.10.11 The equipment used to place pavement markings shall have an automatic cut-off device with manual operating capabilities to provide clean, reasonably square marking ends, and to provide a method of applying broken line in an approximate stripe-to-gap ratio of 10 to 30. The length of the paint shall not be less than 10 feet or more than 10.5 feet. The total length of any stripe-gap cycle shall not be less than 39.5 feet or more than 45.5 feet in variance from one cycle

to the next, nor shall the average total length of a cycle for a road mile of broken line exceed 41 feet or be less than 39.5 feet.

4.10.12 The equipment shall be capable of placing lines of clean edges and of uniform cross-section. All lines shall have a tolerance of plus or minus 1/8" per four inch (4") width.

4.10.13 The equipment shall be equipped with bead dispensers, one for each paint spray gun, and so placed on the equipment that beads are applied to the paint almost as instantly as the marking is being placed on the roadway surface. The bead dispensers shall be designed and aligned so beads are applied uniformly to the entire surface of the marking. The bead dispensers shall be equipped with automatic cut-off controls, synchronized with the cut-off of the marking equipment.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),

3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.
