FROM Jon Kleinheksel, Public Works Director

RE Acceptance of Donated Equipment

Crafco Texas, Inc., has offered to donate a 10-gallon Crafco Mini Melter Crack Sealer to Collin County. Please see the attached letter from Sam Carson, General Manager for Crafco Texas, Inc.

This unit was leased by Collin County for a one-month period in October and was used to seal/repair minor cracks in the new asphalt roads to help prevent cracks from enlarging. This effort will help decrease the number of major repairs needed for newly paved roads which result from ground shifting in the summer and ice forming in the cracks during the winter. Maintenance cost of this machine should be minimal and operational costs will mainly be the cost of the fuel needed to heat the seal product for application.

Since the sealant material is not exclusively produced by Crafco, Public Works will initiate the competitive bids process to secure a reliable and affordable material supplier. Bids will be solicited from appropriate vendors and reviewed for suitability.

Public Works respectfully requests your acceptance of this donation.
