Public Hearing Report

May 16, 2011

Introduction

Collin County (County) is one the fastest growing areas in the State of Texas. To accommodate this accelerated growth, the Collin County Toll Road Authority (CCTRA) has continued to move forward with the development of the Collin County Outer Loop (CCOL). As part of development planning, the County authorized CH2M HILL to examine alignment alternatives for Segment 3 of the CCOL, which runs generally from the Dallas North Tollway (DNT) service road, north of US 380 in Celina, Texas, east toward US 75 near Melissa, Texas. The corridor stretches through Celina, Weston, Chambersville, and portions of Melissa and McKinney.

The CCOL is part of a 240-mile regional outer loop, with regional planning dating to the 1960s. This regional outer loop was conceived as the next circumreferential road surrounding the greater Dallas-Fort Worth Metroplex. Segment 3 is shown in **Figure 1**.

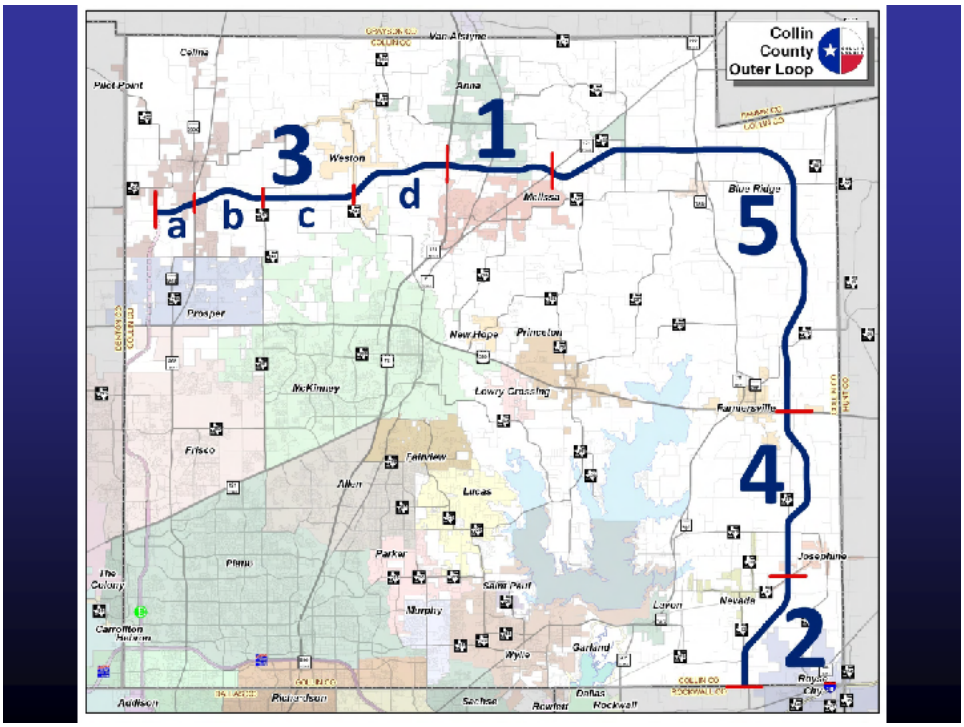

Figure 1: Project Location Map

CH2M HILL's alignment study is a continuation of previous efforts undertaken by the County, which has conducted alignment studies for other segments of the CCOL. A two-lane service road currently is under construction for Segment 1 of the CCOL, which abuts this project immediately to the east.

This Public Hearing Summary documents the analysis of alternative alignments for Segment 3 of the CCOL. It is divided into the following sections: Need and Purpose, Study Process, Study Analysis, Public Involvement and Study Findings.

Need and Purpose

Collin County is the fastest growing county in the region and one of the fastest in the State of Texas. With *Forbes Magazine* rating the Collin County cities of Frisco, McKinney, Allen, and Plano among "Americas 25 Best Places to Move," there is a strong population draw to the County. Five of the top 10 cities in growth within the Dallas-Fort Worth (DFW) region from 2000 to 2010 are in Collin County, with McKinney being the nation's fastest growing city between 2000 and 2007 according to the U.S. Census Bureau. The overall population of Collin County is expected to reach 2 million by 2030, as shown in **Figure 2**.

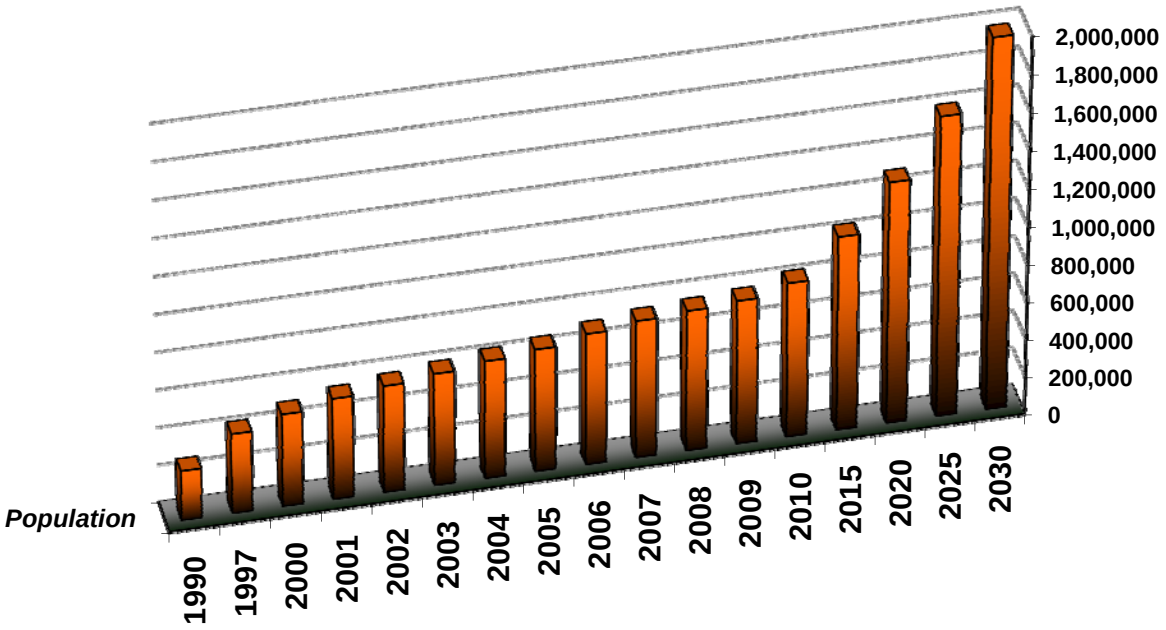

Figure 2: Collin County Projected Population Growth

Population growth creates the demand for an expanded transportation network. Collin County has responded to this need for an expanded network by investing in infrastructure to accommodate responsible, planned growth. For example, the County is planning the development of the entire CCOL, and it will build the project in phases and segments as traffic increases.

Study Process

With a prior corridor study already completed by Collin County in 2006-2007, the process for determining a preferred alignment consisted of three steps—Data Collection and Review, Develop and Evaluate Alternative Alignments, and Selection of a Technically Preferred Alignment. Vital to these three steps was a thorough public involvement process, which invited comments and opinions from the people who will be affected most by this project, the citizens of Collin County. Details about each step are summarized below.

Data Collection and Review

The purpose of collecting data is to identify all possible constraints and/or impediments that would affect potential alternative alignments. Constraints are features that should be avoided due to their sensitive nature and high cost or consequences if they were displaced. Data was collected from available sources, including Collin County, the North Central Texas Council of Governments, utility companies, local cities and agencies, and field reconnaissance. Information was obtained for the following constraints:

- Parks
- Churches
- Cemeteries
- Hazardous Materials
- 100-year floodplain limits
- Historical markers and/or places
- Schools
- Local agency and franchise utilities
- Landfills
- Jurisdictional waters of the United States including wetlands

Data was collected via database searches and imagery analysis. Data was supplemented and confirmed by field verification. Additional constraints are also being evaluated by Collin County through another professional services contractor that is performing an environmental study in the project corridor.

This study was coordinated with several local agencies and stakeholders to ensure the accuracy of data collected. Agencies contacted are as follows:

- City of Celina
- City of Weston
- City of McKinney
- Neighborhood of Chambersville
- North Texas Tollway Authority
- North Central Texas Council of Governments

Once all data was collected and reviewed for accuracy, it was compiled into a Geographic Information System (GIS) database to provide a consistent format for further analysis and use. A constraints map was then developed graphically to depict the locations of constraints. This map is shown in **Figure 3**.

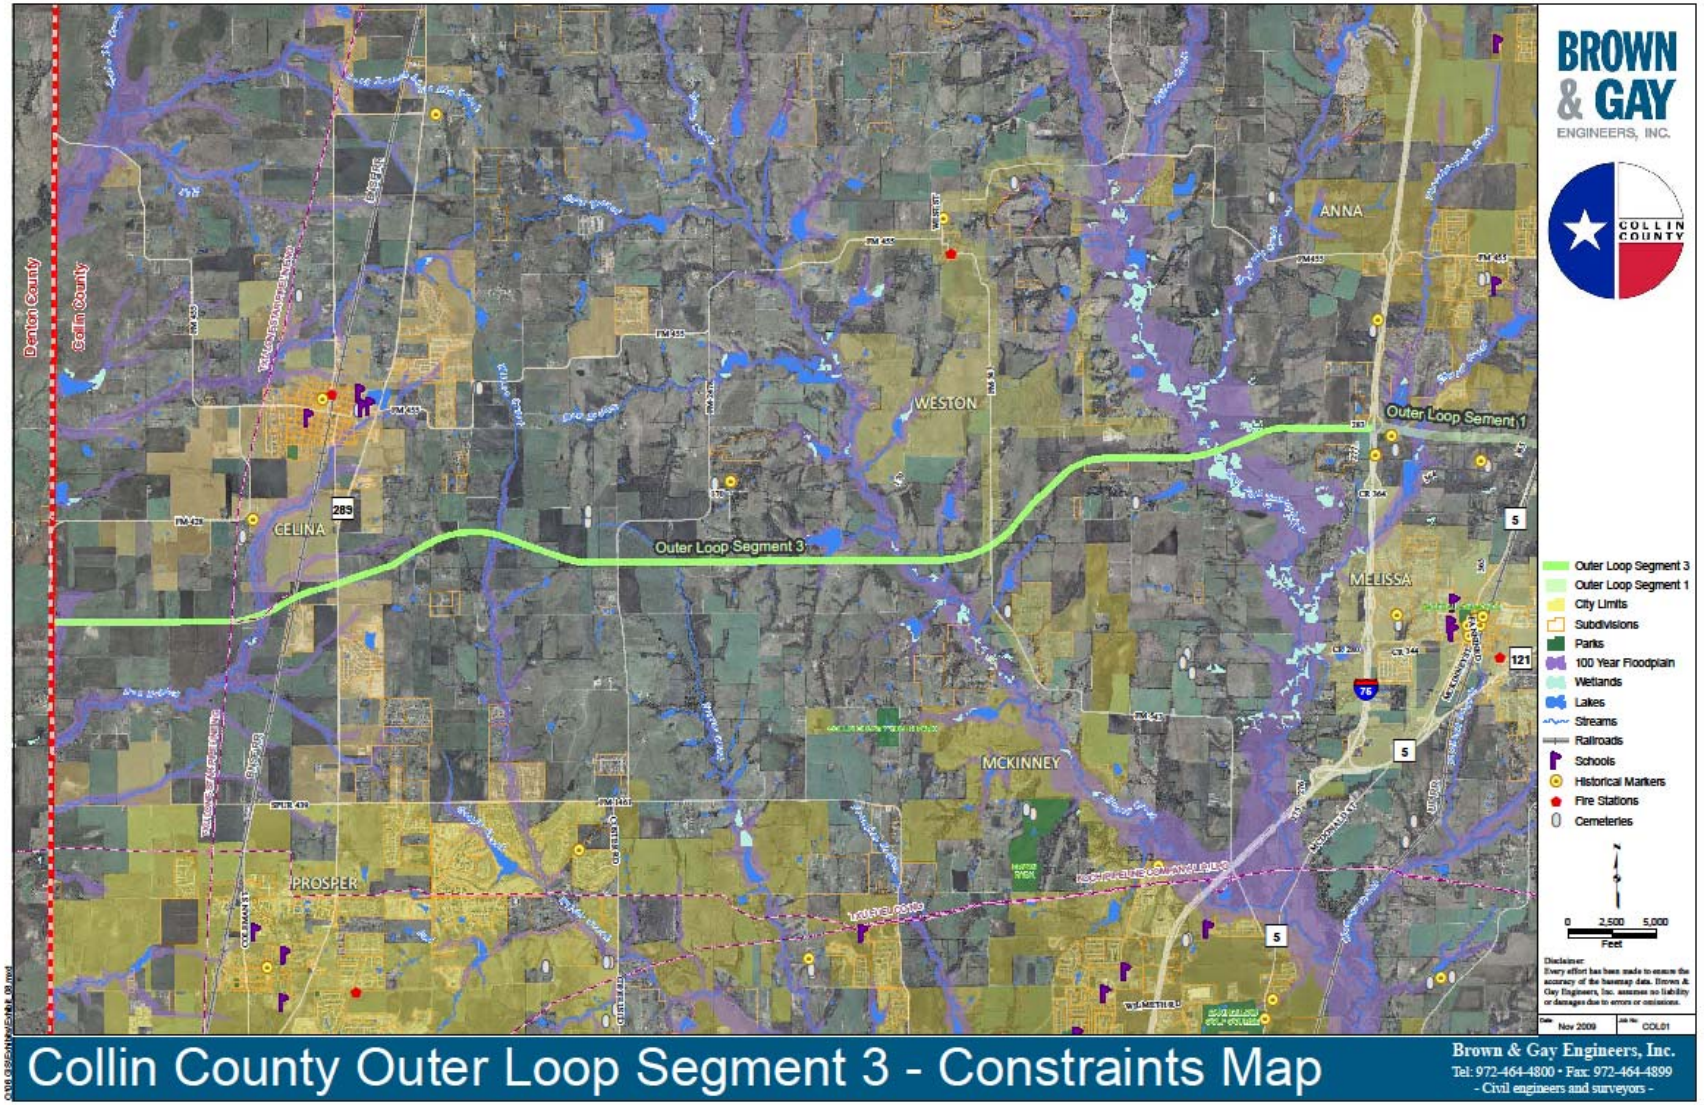

Figure 3: Project Constraints Map Showing Existing Technically Preferred Alignment

Study Analysis

Develop and Evaluate Alternative Alignments

To simplify evaluation and presentation of alternative alignments, the project was divided into three sections. The first section is from the Dallas North Tollway to FM 2478; the second section is from FM 2478 to FM 543; and the third section is from FM 543 to US 75. Prior to developing any alternative alignments for the three sections, a technical methodology was developed to judge each potential alignment objectively. Each potential alignment was evaluated using this identical methodology, which consisted of a variety of criteria and is summarized in **Table 1**.

Enhanced Mobility & Safety	Cost Effectiveness	Engineering Feasibility	Environmental Impacts
– Accessibility – Safety	– Construction Cost – ROW Acquisition – Utilities & Infrastructure	– Compatibility with other projects	– Public Input – Socio-Economic & Neighborhood Impacts – Noise Impacts – Natural Impacts – Cultural Impacts – Stakeholder Input – Hazardous Materials

Table 1: Alternative Alignment Evaluation Criteria

Enhanced Mobility and Safety

Enhanced mobility and safety are vital to the success of any transportation project to ensure a dependable and desirable flow of traffic. This criterion was further subdivided as follows.

Accessibility

One of the objectives for the project is to integrate the proposed CCOL with the existing transportation network by providing logical entrances into the facility via interchanges and intersections. Potential interchange and intersection locations were analyzed for each alternative alignment. Alternatives with better accessibility were rated higher.

Safety

Another key project objective is to provide a safe roadway for all users, whether passenger cars, motorcycles, trucks, busses, or other vehicles. All alternative alignments were analyzed for optimum alignments/geometrics and against the same design criteria as shown

in **Table 2.** Alignments that did not meet the design standards were rated lower than those that did.

Design Elements	Frontage Road		Cross Street	
	Desirable	Minimum	Desirable	Minimum
Design Speed (mph)	**45**	**45**	**45**	**45**
Minimum Horizontal Curvature (ft)	**4970**	**660**	**4970**	**2410**
Maximum Superelevation Rate	**2%**	**6%**	**NA**	**NA**
K Value – Sag	**79**	**79**	**79**	**37**
K Value – Crest	**61**	**61**	**61**	**19**
Maximum Grade	**7.00%**	**-**	**7.00%**	**-**
Minimum Grade	**0.50%**	**0.35%**	**0.50%**	**0.35%**
Maximum Grade Break	**1.00%**	**-**	**1.00%**	**-**

Table 2: Project Design Criteria

Cost Effectiveness

A conceptual-level comparative cost analysis was performed for each alternative alignment. More detailed cost estimating would have required more detailed engineering design, which is beyond the scope of this study.

Construction Cost

A comparative cost analysis was developed for each alternative alignment based upon roadway and structure lengths, storm drain features, and other associated items. Each cost analysis included a significant amount for contingency due to the conceptual nature of this study. Alignments higher in construction cost were rated lower than those with lower anticipated costs.

Right-of-Way Acquisition

The right-of-way (ROW) needed for each alignment was calculated based upon property information available at the time. Exact property lines were not obtained for this study, but rather are an approximation based upon the available data. ROW needs for each alternative alignment were compared against each other, with alignments requiring less ROW rated higher. Some effort was made to rate alignments higher if a landowner expressed in writing a willingness to donate land. Alignments were rated substantially higher if land had already been donated.

Utilities and Infrastructure

Existing and planned local agency and franchise utility facilities were examined for compatibility with each alternative alignment. Alignments requiring the most costly relocations were rated lower.

Engineering Feasibility

Compatibility with Other Projects

The feasibility of each alternative alignment was compared against regional transportation network plans to ensure that this project would enhance regional mobility. Alignments that were compatible with other adjacent projects, such as Segment 1 of the Collin County Outer Loop and further extensions of the Dallas North Tollway, rated higher than those that were not compatible.

Environmental Impacts

Environmental impacts were evaluated based upon a wide range of criteria to minimize disruptions to the community and impacts to the natural environment.

Public Input

Public Input is a vital part of transportation planning. Throughout this study, numerous public meetings were conducted to document citizen comments. All comments received from the public have been documented, and alternatives with greater public support rated higher than those with less support.

Socio-Economic and Neighborhood Impacts

Because this project is a new-location facility, close attention must be paid to the affects upon established local neighborhoods and business, as well as those planned for the future. Alternative alignments that affected fewer homes, neighborhoods, landowners, and businesses were rated higher than others that affected more.

Noise Impacts

Adjacent noise receptors (residences, schools, parks) within 500 feet of each alternative alignment were evaluated, with alignments having fewer receptors rated higher than those with more.

Natural Impacts

Impacts to wetlands, the 100-year floodplain, and jurisdictional waters of the United States were analyzed, with alignments having lesser impacts rated higher than those with more.

Cultural Impacts

Each alignment was analyzed with respect to the effects on known historic and archaeological resources, including churches and cemeteries. Alignments closer to these constraints rated lower than those that were farther away.

Stakeholder Impacts

Each alignment was analyzed with respect to the effects upon project stakeholders, largely consisting of local cities and towns. These stakeholders included the cities of Celina, Weston, and McKinney, as well as the neighborhood of Chambersville. Alignments that were more favorable to the stakeholders rated higher than those that were not.

Hazardous Materials

A review of regulatory databases was conducted to determine the presence of any known hazardous materials sites. Alignments that encountered hazardous materials sites were rated lower than those that did not.

Alternative Alignment Rating System

Each alternative alignment was rated using a qualitative system consisting of the following five levels:

++	**Significantly Positive Effects**
+	**Somewhat Positive Effects**
O	**Neutral and/or No Effects**
-	**Somewhat Negative Effects**
--	**Significantly Negative Effects**

After consulting with Collin County staff, these ratings were assigned to each category for all alignments considered. This information will be presented to the CCTRA Board (Collin County Commissioner's Court) for final consideration in selecting a technically preferred alignment.

Public Involvement

Public Meetings

Three informal public meetings were conducted for this project, one in which each of the major communities that the existing technically preferred alignment is located. The format for these meetings included an open house where maps were displayed and citizens were invited to ask individual questions of both County and CH2M HILL staff. These meetings provided the opportunity for the public to ask informal questions about the project and development processes. A formal presentation was not provided, and informal comments were accepted by writing on the supplied maps. These meetings were held at the following locations:

April 8, 2010 – Celina Junior High School
August 26, 2010 – Weston City Hall
October 14, 2010 – McKinney North High School
April 11, 2011 – Collin County Toll Road Authority

Public Hearing

Open House

The CCTRA conducted an Open House and Public Hearing regarding Segment 3 of the Collin County Outer Loop on May 16, 2011. The open house and hearing were held at the Jack Hatchell Collin County Administration Building, located at 2300 Bloomdale Road, McKinney, Texas. The open house was held in the first floor foyer from 5:30 p.m. to 6:30 p.m., at which the public was given an opportunity to review maps showing the proposed alignment and ask questions of County staff and representatives from CCTRA's engineering consulting firm, CH2M HILL.

CH2M HILL personnel arrived at the meeting location at approximately 4:30 p.m. Exhibits showing the existing technically preferred alignment and alternative alignments were displayed on both sides of the foyer.

The first meeting attendee arrived at approximately 5:00 p.m. Attendees were asked to sign in at a table set up inside the entrance where they were given a public hearing handout that included the agenda for the public hearing, an overview of the project, and a public comment form should they desire to submit an official comment. Property ownership and mailing lists were provided, and the public was encouraged to check the accuracy of ownership and contact information. Ninety-five citizens signed in at the public hearing. Copies of the sign-in sheets are included in this report. The mailing list identifies property

owners whose property could be directly impacted by the recommended and alternative alignments.

Attendees viewed the exhibits and asked questions of County staff and CH2M HILL representatives until 5:30 p.m. when the public hearing started.

Public Hearing

Collin County Judge Keith Self convened the CCTRA Board meeting, which began the public hearing. He welcomed the public and asked Collin County Director of Engineer Ruben Delgado to begin. Mr. Delgado spoke briefly and introduced CH2M HILL Project Manager Will Barresi to make his presentation.

Mr. Barresi gave a PowerPoint presentation explaining the CCOL study process and presented the preliminary findings of the study to the CCTRA Board of Directors. At the conclusion of his presentation (included in this report), Collin County Judge Keith Self opened the comment process of the hearing, and seven citizens presented verbal comments on the project. The comment period and public hearing ended at approximately 8:00 p.m. At this time, CH2M HILL staff began to take down the open house and public hearing materials, but continued to answer citizen questions until approximately 8:30 p.m. A summary of both the verbal and the 25 written comments that were received are provided in this report.

Study Findings

Each section of Segment 3 of the CCOL was evaluated against the aforementioned criteria and those evaluations are provided along with associated data. Findings of interest for each section of Segment 3 of the CCOL are included below.

Dallas North Tollway to FM 2478

Accessibility and safety rate equally for all alternative alignments and are significantly positive. Construction cost is rated lowest for the green alignment because it has the highest estimated construction cost. ROW acquisition is generally positive for the orange and blue alignments, with a note that some landowners may be willing to donate ROW for this project. However, these alignments do not rate the highest because land has not actually been donated nor has a written commitment been presented. The brown alignment, where land has been donated as part of the Carter Ranch development in Celina, is rated higher. All alignments are generally within the same vicinity and, therefore, rate equally with respect to compatibility with other projects.

Public input for the alternative alignments vary. Nine positive comments, along with two negative comments, were received for the green alignment with one positive and three negative comments received for the orange alignment. The blue alignment received six negative comments only, and the brown received one positive and eight negative comments. This led to the green being the highest rated with respect to public input, with the blue and brown being the lowest rated. However, the brown alignment is the preferred route of the City of Celina, a project stakeholder.

The brown alignment received the lowest score for both socio-economic and noise impacts due to the proximity of Carter Ranch and Summerview Estates, the latter of which consists of larger site-built homes.

Natural impacts were generally equal for all of the alignments, with the exception of the green alignment that transverses through more environmentally sensitive areas. No discernable differences exist for the natural impacts or presence of hazardous materials for the alternative alignments.

FM 2478 to FM 543

This section provides the least complexity in determining a final alignment. All evaluation factors are generally equal, with the exception that accessibility is slightly better for the purple alignment. The green alignment scores higher with respect to socio-economic and nose impacts due to being a little farther away from some homes, but it scores significantly lower with respect to natural impacts because it crosses more area in the 100-year floodplain. Public input was limited to only two comments, one positive for the green and one negative for the purple.

FM 543 to US 75

This section is the most complex in determining a final alignment. The orange alignment provides for slightly better accessibility because it would coincide with portions of CR 205,

but this difference is only slightly more positive. All alignments are generally the same with respect to cost effectiveness, engineering feasibility, hazardous materials, and natural impacts since no discernable factors differentiate one alignment from the other.

Public input was most favorable for the green alignment, with five positive comments and three negative comments. The yellow alignment received one positive comment along with five negative comments, with the orange alignment receiving six negative comments. This is in contrast to input from a project stakeholder, the City of McKinney. That city has passed a council resolution generally supporting the CCOL going through the city ETJ (Extraterritorial Jurisdiction). This leads to a favorable rating for the yellow alignment.

Both the green and orange alignments score poorly with respect to cultural impacts. The green scores poorly largely because the alignment crosses directly through the Chambersville Tree Farm, pictured below.

Chambersville Tree Farm

The orange alignment receives low scores due to the proximity of the Chambersville United Methodist Church and Chambersville Cemetery, both pictured below.

Chambersville United Methodist Church

Chambersville Cemetery

Final Determinations

Final determinations on the location of the final alignment will be decided by the CCTRA Board of Directors.

Public Hearing Presentation

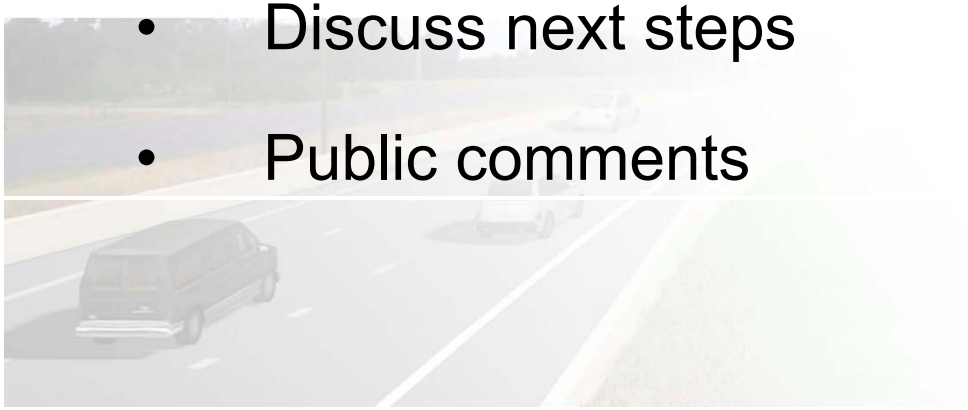
May 16, 2011

COLLIN COUNTY

CH2MHILL

Presentation Agenda

- Demonstrate project need
- Inform public of progress
- Describe alternative alignment analysis process
- Present alternative alignment matrix
- Discuss next steps
- Public comments



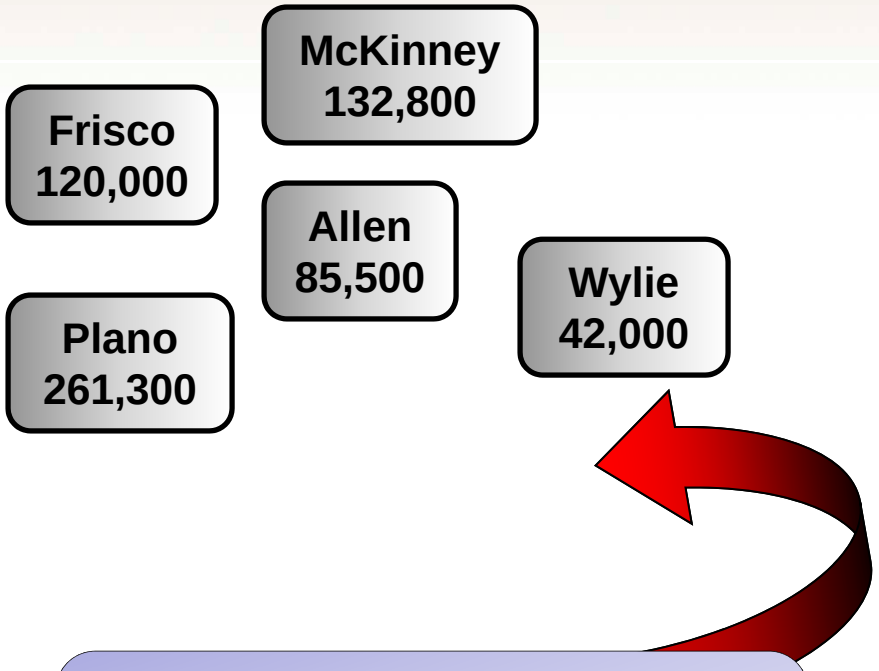
Collin County Outer Loop
Project Need

County Growth Requires Planning for the Future

The Attraction …

- Forbes Magazine's "*America's 25 Best Places to Move*"
  - **Frisco:** Ranked 7th
  - **McKinney:** Ranked 9th
  - **Allen:** Ranked 19th
  - **Plano:** Ranked 25th

- **McKinney:** The nation's fastest-growing city between 2000 and 2007, with a population that more than doubled to 115,620, according to the U.S. Census Bureau.

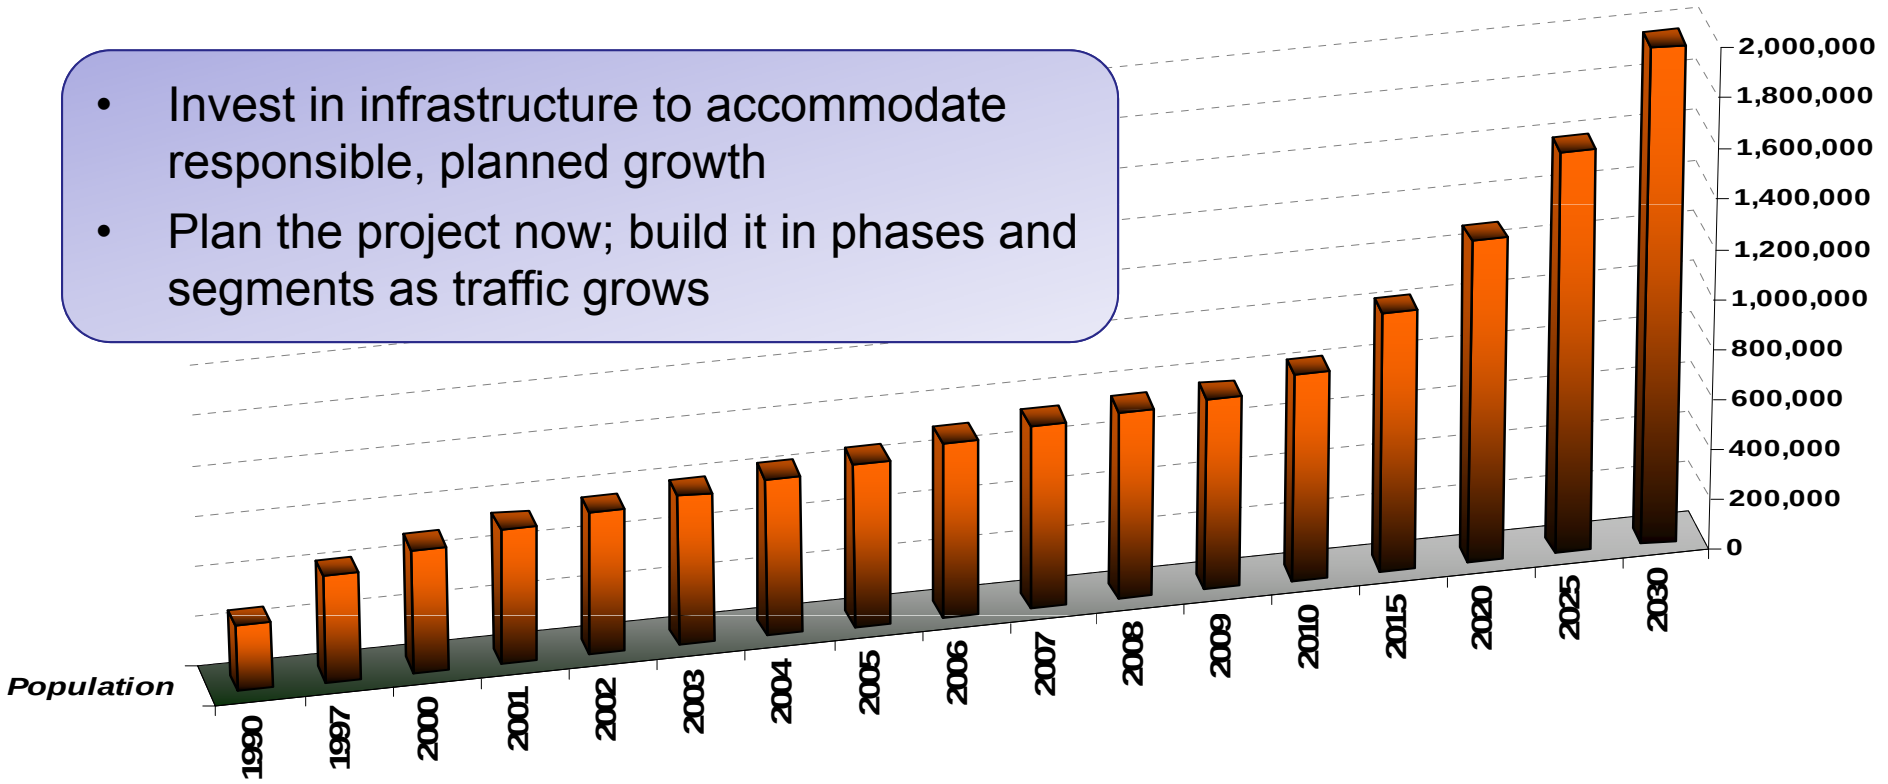


- **Five of the Top 10 Cities in Growth in this Region from 2000-2010 are in Collin Co.**

Collin County Outer Loop
Project Need

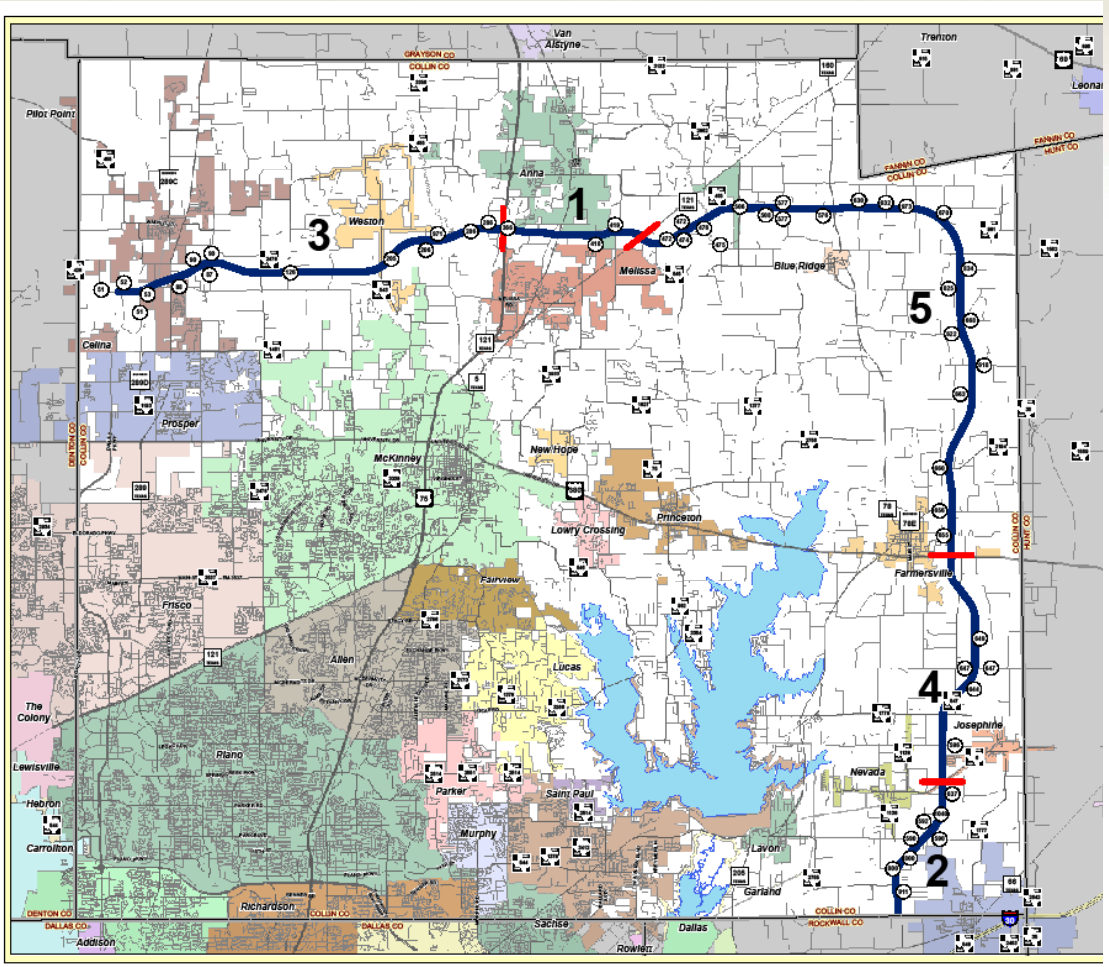
County Population to Reach 2 Million by 2030
Exceeding Capacity of Current Roadways

- Invest in infrastructure to accommodate responsible, planned growth
- Plan the project now; build it in phases and segments as traffic grows

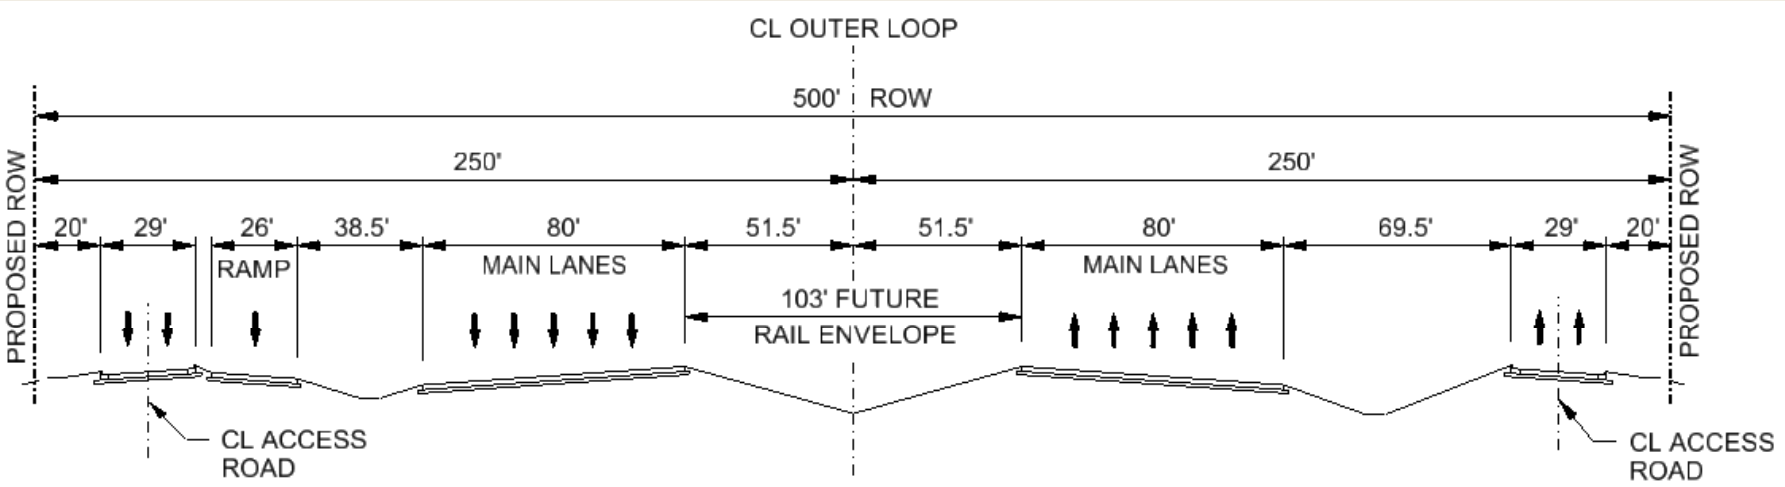


Collin County Outer Loop
Project Need

- Collin County Outer Loop (CCOL) is a 55-mile section of the 240-mile planned regional outer loop encircling DFW
- Regional planning dates back to the 1960's
- Collin County planning dates back to 1982 with the adoption of the first Collin County Thoroughfare Plan



Collin County Outer Loop
Project Need



PROPOSED ULTIMATE TYPICAL SECTION

Ultimate plans call for tolled main lanes; non-tolled service roads and a future rail corridor

Collin County Outer Loop
Overall Project Status

- Segment 1 – US 75 to SH 121
  - Alignment studies, final design, & ROW acquisition complete
  - Construction underway on 2-lane service road
- Segments 2 & 4 – Rockwall County to US 380
  - Alignment studies complete
  - No further work ongoing
- Segment 5 – US 380 to SH 121
  - Corridor study complete
  - No further work ongoing

Collin County Outer Loop
Segment 3 Status

Dallas North Tollway to US 75

- Corridor study completed & Technically Preferred Alignment established in 2006
- Refinement of Technically Preferred Alignment underway
- Environmental studies by NCTCOG underway
- Public Involvement ongoing and to be completed in Spring 2011

Collin County Outer Loop
Segment 3 Status

Public Meetings & Presentations

- April 8, 2010; Celina Junior High School
- August 26, 2010; Weston City Hall
- October 14, 2010; McKinney North High School
- April 11, 2011; Collin County Toll Road Authority (CCTRA)

  - February 23, 2010
  - November 5, 2010
- Town of Prosper
  - January 15, 2010

Collin County Outer Loop
Alternative Alignments

- Develop constraints map of the project area to identify potential adverse impacts of alignment
- Gather available data from the County and other sources to include:
    - Environmental features, flood plain limits, parks
    - Structures, homes, police/fire stations, schools
    - Burial grounds
    - Neighborhood communities
    - Historical landmarks
    - Public and private utilities

- Review public comments from prior Public Meetings
- Visit project site
- Meet with local elected officials & project stakeholders
- Overlay Technically Preferred Alignment onto the constraints map & identify potential revisions and alternatives

Public Hearing Verbal Comments:

The following comments were taken from the public hearing video recording that took place on May 16, 2011. The video from the public meeting is located on the Collin County website and was watched by CH2M HILL staff to record and transcribe as closely as possible the comments that were made relating to the Collin County Outer Loop Segment 3.

Public Meeting Verbal Comments:

Tom Fris

1441 CR 282

McKinney, TX 75071

The sense I have had about this is it has to be, it is great you have to plan it, you have to do it. Probably behind the curve. We live right in the path where it is going; it goes right through our house. I don't know what happened five years ago when y'all first started presenting this we never got a notice that it was coming through our house. We finally found out, we got out there. Then the technically preferred alignment was picked so we started making choices about building stuff and doing some changes. Now we are hearing you are going to change it again. Of course you haven't said you are, but that is what we are hearing, and umm it doesn't feel like there is a lot of transparency. You said that this is going to be an open process, but there is clearly things going on when I went to the last public meeting in October. I busted my butt coming back from work and a flight and came in through the airport, got to the meeting and made comments and I was told nothing was going on and that there was no money left. And that you weren't going to be building anything, and that it was going to be years out, and come to find out there was an open request for proposal to try to get this thing built and to get this section done. I didn't really feel like that was a transparent process to me. I understand you have to put the road through and I'm reading and now I hear that somebody was negotiating with NTTA and came to an agreement, slipped something into a bill and it got voted out. Because they tried to slip an amendment in at the last minute. And once again the stuff going on just seems like, can we just be transparent about this if we are moving the road down to yellow and it is going to come down through my house let's make the decision, say it is because McKinney wants the tax dollars, say whatever the reason is and let's move forward. It feels like we are spending a lot of time, bringing my family in here coming here and listening, it doesn't feel like we have any input so make the decision and let's do it. Otherwise, let's look at the process maybe it needs a little bit more transparency. I would sure appreciate someone making the decision and getting this thing done, obviously, I don't want to go through my house or my property, but if you do make the decision let's make it so we can make some decisions with our lives and move along.

Commissioner Court's Question: "And your house is on the yellow route?"

Yes, that is correct. Right where you see the yellow and the orange come together at the very end toward 75. If you just go a little further you will see my house under the yellow.

Public Meeting Verbal Comments:

Lee Davidson

6364 CR 281

McKinney, TX 75071

In Chambersville, just to the south of the reservoir you can see, just north of the orange and yellow route and on the other side of the reservoir from the green route. My comment is not directed to. I'm sorry, I'm in the middle of your way, it doesn't matter to me personally. My main concern is that I see the orange route, moves 500 or 600 feet closer to the Chambersville church, community center, and cemetery. Now Chambersville has as long of a history in Collin County as McKinney does, going back to the 1850s. Now that's what is left of Chambersville, I think it would be disrespectful and inappropriate to move toward the orange route. I understand the cost saving because you have ROW on 205, but still I think that puts it within throwing a rock from the church grounds or the cemetery and hitting the ROW. I think that is simply not a choice we should make.

Public Meeting Verbal Comments:

Cate Robbins

7114 CR 971

Celina, TX 75009

I want to address the Green Line from 543 to 75. I would like to point out there is a natural and cultural impact of that line. Because it goes through Chambersville Tree Farm and Chandler's Rose Garden. Now that property is absolutely beautiful and pristine, it is a heritage garden, there are heritage trees and roses there that have been cultivated also it is a community event center for boy scouts and other events. So it would be a detrimental impact of putting the road there and damaging those heritage trees or rose gardens. It is a beautiful place and I would like to see it preserved.

Public Meeting Verbal Comments:

Jim Orr

7253 CR 206

Celina, TX 75009

Where I live it is kind of in the middle between the orange and the green, just west of 206 there. It doesn't really make a difference to me if it goes north or south, but in some respects the green is a little bit closer to me. The concern I would have is the orange line which I haven't seen previously, and I think I have made most of the meeting for the outer loop over the last 5 or 6 years, but the orange line is a concern because it gets close to the Chambersville church, cemetery, and the community center which are a vibrant part of Chambersville. If you bring it up to CR 205, there are a number of houses, and a number of my neighbors live along 205. If you bring it to 205 it is going to impact them a lot more, just like the insurance form, "I swerved many times before I hit the pedestrian." I would hate to see the road swerve too many times to hit too many houses. That is the concern I have with the orange line, I think there have been numerous public meetings and hearings about this, I appreciate Mr. Delgado and his crew for hosting these meetings and asking for public input and having these forums to express those comments. I do appreciate y'all for doing that.

Public Meeting Verbal Comments:

Cabe Chadick

1515 CR 282

McKinney, TX 75071

I have a suggestion in regards to transparency those matrices were really nice, I appreciated those. I think it was the first time I saw those, but there was a category called public input and I would suggest that somewhat of a misnomer in that I can't tell personally whether that the City of McKinney or someone like myself who lives there would be impacted. If I could make a suggestion I think it would be better, easy do able is that it be separated into stake hold like the City of McKinney, its taking the term public input very loose versus someone like myself. I would consider myself more of a public input. There's been meetings where we can write comments down on that map and that was nice, and to me that seems more like a public input type thing. If it can be presented later on, separate those into stake hold like the City of McKinney versus someone like myself so I would appreciate seeing that. Thank you.

Public Meeting Verbal Comments:

Linda Cox

9606 Bellewood

Dallas, TX 75238

Talking about property on Highway 90 and 92 in Celina. I'm here to discuss a route of the outer loop which will be in conformance with county development plans to develop the economic growth and I know that the impact of the outer loop will be minimized by the routing along property lines and existing roads. So I'm not an expert, but something doesn't make a lot of sense in that splitting property diagonally without access. So right now I can't see the logic in that northward crook of section 3, that technically preferred alignment that leaves off south property line preceding westward and goes along westward to the Cox property, and then the road that is currently proposed would make a northward crook across Cox land, and then it results in another diagonal cut across Cox land at CR 8990, and it compromises that property there. It is a diagonal segregation of historic family property. Also the topography of that CR 8990 property is not ideal for road ROW, it would result in a major cut/fill operation that would result in significant increase in construction costs. The property is environmentally sensitive with a watershed area that has directional drainage patterns that would result in a significant cost associated with grade elevation and drainage relief thru culverts or bridges. So our property owners are opposed to that plan to route the outer loop thru the Cox farm at CR 8990. We would support the CR 89 alignment. Thank you.

Public Meeting Verbal Comments:

Robert Ganter

6465 CR 281

McKinney, TX 75071

It is right where that orange line hooks kind of south. I to am concerned about the comments that have been made about public input. When you look at the green line compared to the orange and yellow it seems that you will be impacting many more homeowners with the yellow and the orange line than you would with the green. Im a little frustrated, I thought we had this put to bed and decided, and now we are rehashing it, because it seems like it is something the City of McKinney wants, and they don't live there, I do.

Written Comments:

The following typed comments were transcribed by CH2M HILL staff from the hand written comments that were received regarding the Collin County Outer Loop Segment 3. These comments were typed for the reader's convenience from the actual hand written comments.

Don and Rebecca Cucovatz
5152 Summerview Ln
Celina, TX 75009
(469) 644-4663

1. Yes, 3 tracts (2.73 acres each)
2. U.S. Mail

Brown Route (Alternative 3) would run just north of our 3(2.73 acre each) tracts. We purchased our home and acreage to be away from noise and traffic. If this route is selected, it would severely devalue our property. It appears there is much more open land further north with Green Route. Still close to our home, but not nearly as bad.

Unless we are offered a significant amount of money from the selection of this route we are very opposed to Brown Route.

The preferred route will destroy some of the most beautiful, natural ecosystem in the area. Many ancient trees will be needlessly destroyed and a lot of wild life habit removed.

From an economic standpoint, the southern route is a much more direct, straight line path – surely that will be cheaper to build and require less land acquisition.

Please avoid the route thru the Chambersville Tree Farms.

The proposed outer loop Alternative number 3, Alternative number 2 or 1 will severely decrease the value of my home. No one wants to live with a freeway in their backyard! Why not put this on hold until further studies are done as other counties have done. Also my understanding is that even the engineering firm that was hired to do a study on this does not prefer Alternative number 3 or 2 or 1!! Why not use the existing technically approved alignment!

The existing "Technically Approved Alignment" (green) is the only one that really makes sense. It looks like it would have the least amount of homeowner disruption. We love it here on County Road 88 as do our neighbors and the plan to use this road is ridiculous when you can take the Green Route and only bother a few cows and horses.

I think the proposed Alternative number 3 or brown route will hurt too many home values. There are several new homes on this route that would have their values negatively affected. I would be in favor of the technically preferred green route, it will effect less home owners.

Since there is no funding for this loop anyway the green route should be the choice.

Hi Ruben,
I have talked with you in the past about the proposed routes for the Outer Loop. I am very concerned about this proposed loop and the impact on my property here in Summerview Country Estates, Celina, Texas.
My husband, Gary, and I went to the public meeting on May 16, 2011 and other previous ones. I am trying to get in touch with our neighbors in order to get comments sent in to the Engineering Department by the cut-off date of May 26. I need to have the correct map showing each route and how it is distinguished from the other. I don't understand how engineering obtained the results shown on the analysis matrix. It seems to indicate that Alternative 3, brown, is preferable to Technically Preferred, green. This decision would be very upsetting to me and other neighbors who have thought that the Technically Preferred was still the route of choice.
I need for you to send me the link to the proper route map that coincides with the analysis matrix presented at the meeting. Since we only have a few more days to send in comments, I really need the correct link as soon as possible.
Thanks.
Sandy Schmidt

1. Yes, Residential

2. U. S. Mail

A. Outer loop removed from 7070 of Master plans, agree with commissioner Jaynes that any final decisions should be postponed.

B. No money now or in near future to proceed with any more of Segment 3 or DNT Phase 4.

C. Any final alignment near my home/property will seriously damaged any ability to sell at current value or the value it had in 2006 when we bought. Mortgage is high, value is low!

D. Any final alignment should go through unimproved property, if it exists at that time. This would favor only the technically approved, green, alignment.

E. We bought property and built retirement home to get away from lots of noise and traffic and to spend many years here.

F. Suggest re-evaluating alignment when/if money appears to be available, takes into account any changes which occur between now and then as far as new subdivisions or growth patterns. People may not move as far north and away from cities if gas prices do not go down.

G. Question public input on analysis matrix many "public" would be affected by alignment alternative 2, blue, or alternative 3, brown.

COMMENT FORM

1. Do you own property along the proposed Outer Loop? ☑ Yes ☐ No
   If yes, ☑ Residential ☐ Commercial ☐ Other (*Please specify*) _____
   If no, are you a tenant in a property along the proposed Outer Loop? ☐ Yes ☐ No
   If yes, ☐ Residential ☐ Commercial ☐ Other (*Please specify*) _____

2. How did you hear about this public meeting? (Check all that apply)
   ☐ Newspaper Advertisement ☑ U.S. Mail ☐ Other (*Please specify*) _____

3. What are your concerns regarding the proposed Outer Loop?

A. OUTER LOOP REMOVED FROM 707 OF MASTER PLANS. AGREE WITH COMMISSIONER JAYNES THAT ANY FINAL DECISIONS SHOULD BE POSTPONED

B. NO MONEY NOW OR IF NEAR FUTURE TO PROCEED WITH ANY MORE OF SEGMENT 3 OR ENT PHASE 4

C. ANY FINAL ALIGNMENT NEAR MY HOME/PROPERTY WILL SERIOUSLY DAMAGE ANY ABILITY TO SELL AT CURRENT VALUE OR THE VALUE IT HAD IN 2006 WHEN WE BOUGHT. MORTGAGE IS HIGH, VALUE IS LOW!

D. ANY FINAL ALIGNMENT SHOULD GO THROUGH UNIMPROVED PROPERTY, IF IT EXISTS AT THAT TIME. THIS WOULD FAVOR ONLY THE TECHNICALLY APPROVED, GREEN, ALIGNMENT

E. WE BOUGHT PROPERTY & BUILT RETIREMENT HOME TO GET AWAY FROM LOTS OF NOISE & TRAFFIC AND TO SPEND MANY YEARS HERE.

4. Other comments: F. SUGGEST RE-EVALUATING ALIGNMENT WHEN/IF MONEY APPEARS TO BE AVAILABLE, TAKE INTO ACCOUNT ANY CHANGES WHICH OCCUR BETWEEN NOW & THEN AS FAR AS NEW SUBDIVISIONS OR GROWTH PATTERNS. PEOPLE MAY NOT MOVE AS FAR NORTH & AWAY FROM CITIES IF GAS PRICES DO NOT GO DOWN.

G. QUESTION 'PUBLIC INPUT' ON ANALYSIS MATRIX. MANY 'PUBLIC' WOULD BE AFFECTED BY ALIGNMENT ALTERNATIVE 2, BLUE, OR ALTERNATIVE 3, BROWN.

Our concerns, as homeowners are as follows:

- The proximity of the Outer Loop (Alternatives 1, 2, and 3) to our home and the impact that the construction and road would have to our family, home, animals, and neighborhood.
- The impact of our home/land/neighborhood's property value.
- The financial cost of Alternatives 1, 2, and 3 due to buying out of homeowners and various properties.
- The existing technically approved Alignment seems to be least restrictive choice due to low buyouts, homeowner impact.

We want to be on record as adamantly opposed to the selection of either the Brown or Blue route for the Western Segment of the Collin County Outer Loop. We bought the land and built our home to get away from noise and traffic. The Brown and Blue routes totally destroy those good aspects of our property and location, with both the Brown and the Blue routes running along our property line and with the Brown route possible taking some of the property.

Go with the Green route, or follow the suggestion of one of the Commissioners at the 16 May 2011 meeting; i.e., put the whole works on hold since, as I understand it, much of the rest of the Loop is on hold or scrapped.

I prefer the Green Route it will affect fewer homes.

It became very obvious after the hearing that the public opinion means very little. It all depends on McKinney's desire stop holding meetings and make a decision. The public opinions decision means nothing. "Very Sad" - Stop wasting tax payer money.

The preferred green line from 543 to 75 goes through Chambersville Tree Farm/Chandler's Garden and will be detrimental to the pristine ecology of the native heritage plant life therein. This property is utilized for multiple community events including Collin County boy scout troops. Please reconsider using the green line in this area.

We prefer the existing green route. The new proposed route goes thru the center of our neighbor's lovely home. The new proposal is detrimental to the Chambersville Church and Cemetary.

Our property has been in the family for well over 100 years. We live here because we don't want to be in city lights and noise. We want to look up at the dark night sky and see stars. It's peaceful, quite and beautiful here. We want to pass it on to our descendants. We don't want a monster highway next door. We oppose the southern route also because of the historic Chambersville Church and cemetery. The Chambersville community has also been named a historic area. We are awaiting the marker. Please take this into consideration and don't choose the southern route simply because McKinney wants more money.

Thank You

It seems that the evalutations process begins again about every six months. How many times do you need our input? We thought the PTAA (Green Route) had already been approved. Now a different new bunch of engineers are involved and the process keeps going. This bunch of engineers had nothing but negatives to say about the green route. What happened? If the green route is so unsatisfactory now, why was it selected as the PTAA in 2010? Where is this new input coming from?

I have been to every public meeting since the evaluation process started. Like other residents of the affected area, we need a decision so we can get on with our lives. Input from people outside the affected area should not trump input from locals.

MAKE A DECISION!

Alternative (red line) comes too close to the Chambersville church and cemetery. You can save almost as much on ROW losing CR 205 if you use the red line but swing back south to the yellow line earlier, about 1500 ft. West of CR 206. This solution also puts more of the outer loop in (current) McKinney city limits.

The church and cemetery are not marked on the big map, although Mr. Jaynes and Mr. Delgado are aware of them (from as far back as year 2000).

COMMENT FORM

PUBLIC HEARING
COLLIN COUNTY OUTER LOOP
May 16, 2011 – 6:30 pm
Jack Hatchell Collin County Administration Bldg.

2. U.S. Mail

Alternative 1 goes right through the middle of my property off CR 87 on the east edge of Celina, TX. I prefer the "existing technically preferred alignment" because it allows us to use our property instead of losing all of it.

I appreciate the informative meetings that have been conducted and respectively request to keep the existing preferred alignment.

I implore you to remember individual property owners rights as the same importance as cost in making your decision.

Thank you,

Vaughan

I have been attending these gatherings for the last few years and trying to stay involved. In addition to the disruption of a historic farming community with a church, community center and cemetery, I am disappointed in "city hall"….

I agree with a couple of the men who spoke regarding the transparency of the process, especially as it pertains to the City of McKinney. As homeowners and landowners, we are put in a peculiar position. We do acknowledge that progress has to be made; yet we are losing something that we worked hard to get. Establishing a home in the country is not something you decide to do without considering all the work that goes into it. It is different than buying a home in town.

The fact that the city wants to satisfy and reach a goal for its growth does not fit well with what we have done to develop and maintain our home place in the country. The goal of a company who wants to build a road/highway, at the least expense to their bottom line is just mind boggling to us that have saved, worked our land and developed a home for ourselves. It's sad that we have to sacrifice the investment in our homes, land and lifestyle, so that the city and the road builder can benefit financially. When will it be enough for the City of McKinney?

To Whom It May Concern:

My husband and I own Lot 5, Summerview Lane, Celina, TX. Our property is directly adjacent to and shares a common border with the Outer Loop Proposals #2 and #3. If either of these proposals is adopted, our family would be directly affected in several negative ways because our property is the property closest to the proposed thoroughfare.

In your plan, you have mentioned annexing part of my kindly, retired, across-the-cul-de-sac neighbor's backyard to make the roadway work on Alternative #3. His property is his RETIREMENT dream, that he worked an entire career to save up to build his lovely home on, and now in his retirement, he is facing the possibility of a roadway coming right through his backyard. Our property is OUR dream of a back-to-basics rural lifestyle, and Celina is a lovely town to raise a family in. The homes in our neighborhood are upper middle class homes, most of which are valued in the 400K+ range, constructed in the last several years, full of life and families who chose to pay a premium price for a quality of life that was off the beaten path, wonderfully rural, with beautiful night skies.

1) We paid a premium price for Lot 5 Summerview Lane in an effort to have a quiet, country lifestyle which the enjoyment of will be destroyed by Proposals #2 and #3.
2) We have four little girls, ages 7-1, and envisioned them being able to play outside in our quiet, secluded country yard, which will be destroyed by Proposals #2 and #3. Gawking strangers from the thoroughfare would have a full-on view of my precious children at play, which construes a safety concern in my mind. The entire reason we bought rural is so that my children could have privacy and a back-to-nature place to grow up. Not even a stockade fence could obscure the view of onlookers to our yard if Proposal #2 or #3 is adopted. We will have no way to give our children a safe, quiet, country esthetic if you build a roadway directly adjacent to our lot.
3) We are a homeschooling family, and having a heavily traveled roadway adjacent to our home will be noisy and distracting for our schooling purposes. In Texas, homeschooling is a protected status under section 21.033(a) (1) of the Texas Education Code. The adoption of Proposals #2 and #3 will be a detriment to my children's' ability to learn in a quiet atmosphere.
4) I am asthmatic, and the exhaust from vehicular travel will be detrimental to my health. I have been under the care of my physician for asthma since I was 8 years old, and am currently on asthma medications. I have to stay indoors during Ozone Alert days, and the byproducts of combustion from vehicles are highly irritating to my lungs. That is one reason we chose to build our new home on a rural county road out of the city limits. Adopting #2 or #3 will basically put my health at jeopardy.
5) We have already paid thousands of dollars for our architect to draw up plans for a home, and our view is situated on the diagonal which would give us a view of an ugly thoroughfare, instead of the beautiful farmland view we paid for. Your road is the very antithesis of why we chose Summerview Lane.
6) We have plans to put in a certified organic garden and orchard on our property, and set up a 501c3 to allow people on hardship to come pick food for their families. Having exhaust and poorer air quality on our farmland is not in keeping with organic principles, not to mention the runoff water from the thoroughfare that has oil and tire

residue in it leaching through the ground polluting our land, rendering it no longer able to qualify as organically certified.
7) Illuminating the thoroughfare will RUIN our beautiful night skies. We spent HOURS going to Summerview at night, just staring up at the dark night sky, thinking how fortunate we were to be able to build our home in such a serene, beautiful place. We are looking forward to teaching our children all of the constellations that can be seen from our home, and have been so dazzled by how dark and beautiful it is at night on Summerview Lane. If you adopt #2 or #3, our Summerview Lane skies will never look the same again for the many families who live here.

We are justifiably upset over this proposed thoroughfare, and ask that the board please take into consideration my health status as an asthmatic who will be exposed to poor air quality, my childrens' bedrooms adjacent to a major roadway, the privacy we paid a premium price for that would be completely abolished, the noise of traffic with small children to raise, and the dream of building our forever home, which will be completely destroyed by Proposal #2 or #3 being adopted. We will be stuck with a piece of land that we don't want to build a home on, and which we will not be able recoup our investment on. It is the worst of all scenarios for us. I am a stay at home mom, my husband works long hard hours as a manager at an around-the-clock factory in Richardson, and we have saved for YEARS to buy our dream piece of property to build a lovely home for our family to enjoy a rural lifestyle on. Had we known this road was a possibility, we would have NEVER bought the property. Our realtor did not apprise us of any future development in Celina, the seller of the property did not disclose this possibility to us, and we were stunned to realize that these plans were in the works six weeks after we closed on it. We were not even informed of the meeting that took place on May 16th to determine the effect of each of the proposed alternative roadways. Furthermore, I am concerned that the Open Meetings Act might have been breached on this apparent oversight. We own one of the three lots MOST directly affected by Alternative #2 or Alternative #3, so it was quite surprising that we were not given notification of the meeting.

Please, please consider our protest. We have a beautiful home that may never get built if this proposal goes through. In our daily living over the last several years, I have used it up, worn it out, made it do, and done without in an effort to raise the funds for our new lot and home, and to see it all possibly come crashing to the ground grieves our family greatly. We would like to state that we are adamantly opposed to your #2 and #3 proposals for the Collin County Outer Loop. We greatly favor the Existing Technically Approved Alignment, and hope that our voice will be heard by the Collin County Engineering Department.

My husband, Eric Trumbauer, and I would be happy to bring our children along with our house plans and aerial map of our property, the results of my latest asthma spirometry from my physician, the plans for our organic farm, and discuss further with you any questions you might have about the detrimental effects of Alternative #2 or #3 on our lives and our future. The weight of this decision is staggering for our family.

Kind regards,

Kristin Trumbauer

Subject: Multi-Use Transportation Corridor (75 to Tollway)

Hello Matt,

My name is Eric Trumbauer and my wife and I are new landowners (3/30/11) of a 2.375 acre property in Celina, TX (actually outside city limits). It is Summerview Country Estates #2, BLK A, Lot 5 (Property ID 2131659).

We just learned yesterday about a Multi-Use Transportation Corridor route from 75 to the Tollway that shows 2 of the alternate routes (#2 and #4) would literally run right next to our

north property line
as well as the neighbors to the east and west of us. The existing technically preferred route would be north of us by ½ - 1 mile.

We also learned that there was a public meeting held on 5/16/11 to discuss this route and we never received any notification from the county despite the fact that our property could be directly affected.

The bottom line is that this possibility is extremely disappointing to us for multiple reasons (safety, health (my wife has asthma), noise, light pollution, building our dream house on a larger rural property etc.).

We have received a form from our neighbor to the East (Sandy Schmidt) that we are completing and sending in tomorrow (it needs to be post-marked by 5/26/11) to voice our concerns.

Questions:
How can we be assured that this input will be reviewed and taken into consideration?

What other methods/forums exist to voice our concerns before a final route decision is made?

How often do these decisions end up going with the existing technically preferred route?

When do you expect the decision to be made on the route that will be used?

We have heard that there are no funds approved for this project right now, so what are the chances that a decision is tabled until a later time?

FYI – I received your e-mail from Kirk Wilson (Denton County Judge) who is friends with my wife.

Best regards,
Eric Trumbauer

Suite 160
McKinney, TX 75069

Ref: Collin County Outer Loop Section 3
Public Hearing, May 16, 2011

Dear Mr. Delgado:

I own approximately 318 acres of land situated between F.M. 2478 and C.R. 87, adjacent to the north side of C.R. 88. I support the Alternate No. 1 (orange) alignment, which runs from F.M. 2478 along my northern boundary, turning slightly to the north at the northwest corner of my property to C.R. 87.

It's my sincere interest to dedicate land for one-half of the right-of-way for the construction of the Collin County Outer Loop (Outer Loop) as a full access Tollway with service roads, along Alternate No. 1.

I propose to dedicate/escrow the land necessary for the construction of the Outer Loop, all of which will be free and clear of any and all liens and encumbrances to Collin County. This will be subject to a reservation of mineral interest, access to the property during construction of the roadway, and a right of a reverter if construction of the roadway does not begin within ten (10) years after right-of-way dedication. I have identified the following matters that need to be addressed prior to preparation of documents and anticipate that additional issues may arise as discussions proceed:

- Determination of an Outer Loop alignment;
- Determination of the amount of right-of-way needed and reduction of right-of-way where appropriate;
- Location of easements to be reserved for drainage and other purposes; and
- Design and location of on/off ramps and related access.

I will not dedicate right-of-way for Alternate No. 3 due to the following reasons:

- The alignment would bisect the western portion of my property leaving a triangle of land on the north side of the proposed alignment that will be difficult to develop and access.
- The alignment would leave a sliver of land too narrow to develop and access on the south side of the proposed alignment.
- Alternate No. 1 will have less impact to existing residential residences west of my property.

I welcome the opportunity to work with you on this project and appreciate your time and consideration.

Sincerely,

BELKNAP FP, LTD.,
a Texas limited partnership

Charles Rem

Mr. Delgado,

Thank you for meeting with me today and explaining the options Collin County
Engineering is considering.

My preference is for the green ROW as it follows east-west parallel to east-west and north of County Road 281. This track reinforces McKinney's ETJ.

One of my concerns is that the ROW south of east-west County Road 281 would
not be sustainable for future residents of McKinney. McKinney ETJ runs 50
feet north of east-west county road 281. This would leave a track of homes
approximately 500 feet wide and possibly several miles long. On south side
of the track would be a freeway. The northbound of the track would be County
Road 281 and McKinney's city boundary. The logistics of McKinney providing
reasonable services to this track is unimaginable.

Charles Rem
6289 County Road 281

James Parker McComas

I want to go on record as being AGAINST the yellow alignment. Prior to the most recent meeting we had been told that this was the least favored route, but now suddenly it is the most favored if we are to believe what was said at the last meeting.

Ruben:

This is concerning the two properties that NICID LP II owns on the Preferred Green Route of the Outer Loop.
I would like to go on record saying that I pruchased this property with the intention of it being on the Outer Loop. I understand that there is an alternate, a Purple Route, that is being considered.

The Green Route would definitely be shorter and thus cost less for taxpayers. I am definitely in favor of this route and would be very amicable to working with you in making the Green Route a reality.

Please contact me at 214-726-6700 so we could further discuss.

Thank you.

Joel Field

Thank you for having the public hearing on the Collin County Outer Loop last week. Each of you listened patiently to my request not to split the Cox property at C.R. 89/90 near Celina. It does concern me that the four possible routes to be considered were shown in the brochure at the meeting as **only the one** with the northern crook arriving at the northeast Cox gate. The meeting brochure lists the **one route** as the *Existing Technically Preferred Alignment*. The outer loop survey posts are still on C.R. 90 with one of them near the Cox northeast gate. Nearby to the east a sign boasts that there will be a major intersection there.

All this is to say that I hope there is consideration for using C.R. 88 as a route after leaving the Cox south property line on C.R. 92.
Respectfully,
Linda

Carpe Diem
Linda Cox 214-341-0376

Robert and Liz Ganter

Ruben,

I am extremely concerned about the negative effect this will have on my property value and family. I am specifically referring to alternative #5 and #6 - I do not want a road like that anywhere close to my home. I bought this land and built a home 14 years ago with the primary intent of not living near large roads. **Please officially record my strong objection to the outer loop built within 5000 feet of my property.** I know that all my neighbors share this concern. I am so upset at the prospect of this occurring, I have already consulted with an attorney and if necessary, plan to pursue all means to stop it and/or ensure that I am fully compensated for any action that 'interferes with the use and enjoyment of my property'. Again my neighbors will likely follow the same approach if not a consolidated effort between us. Any road construction or easements (partial or whole) planned for my property will be met will a vigorous and lengthy defense of my rights and investment. Any thoughts or assumptions that alternative #5 and #6 is the path of least resistance is incorrect.

Thanks,
Robert and Liz Ganter

Commissioner Matt Shaheen
Collin County Commissioners Court
Collin County Administration Building
2300 Bloomdale Road; Suite 4192
McKinney TX 75071

Dear Commissioner Shaheen:

My name is Joel Field and I own two partnerships named NICID LP and NICID LP II. Several years ago I purchased two pieces of property that were located on the projected Outer Loop. The properties are located at the corner of CR 126 and the projected Outer Loop. My whole reason for purchasing these properties was because of the future Outer Loop going through these properties. I want to be very clear…..**I want the Outer Loop to go through my properties.**

As I understand it, there are now three options for the Outer Loop that would affect my properties. One of those options does not involve going through either of my properties. I have attached a copy of the three options being considered. I have circled the properties that NICID LP and NICID LP II owns.

I am very interested in working with the county in any way I can and am very eager to meet with you to discuss how the county and I can mutually benefit by having the Outer Loop go through my properties.

Please contact me on my cell at 214-726-6700 so we can set an appointment to get together.

Sincerely,

Joel Field

COLLIN COUNTY OUTER LOOP

Open House and Public Hearing
Sesión Informal y Audiencia Pública

The Collin County Toll Road Authority (CCTRA) will conduct an Open House and Public Hearing on Monday, May 16, 2011 in the Commissioners Courtroom on the 4th Floor of the Jack Hatchell Collin County Administration Building located at 2300 Bloomdale Road, McKinney, Texas 75071. The purpose of the Open House and Public Hearing is to present alignment alternatives and discuss the status of the proposed Segment 3 of the Collin County Outer Loop. The western limit of Segment 3 is the Dallas North Tollway (DNT) Service Road, north of US 380 in Celina, Texas. The eastern limit of Segment 3 is US 75 near Melissa, Texas. The Open House, where attendees will be provided the opportunity to view project exhibits, will begin at 5:30 p.m. CCTRA staff and consultants will be available to answer individual questions during the Open House. The formal Public Hearing presentation will begin at 6:30 p.m. followed by a public comment period as public input is an important part of the transportation decision making process. Comments will be limited to 3 minutes per person and will be recorded and made part of the official public record. The Public Hearing will be available for later viewing on the County's web site at:

http://www.co.collin.tx.us/commissioners_court/mobility_projects/outerloop.jsp

All interested citizens are invited to attend the Open House and Public Hearing to learn about the project and express their views. Those citizens interested in attending who have special communication or accommodation needs are encouraged to contact Ruben Delgado, P.E., Director of Engineering, at 972-548-3728 at least seventy two hours prior to the meeting time. The County will make every reasonable effort to accommodate those needs. The Public Hearing will be conducted in English; however, limited Spanish translation will be available at the Open House.

Verbal and written comments from the public regarding this project can be presented at the Public Hearing. Written comments can also be submitted to:

Ruben Delgado, P.E.Director of Engineering
825 North McDonald Street, Suite 160
McKinney, Texas 75069

Comments may be presented for a period of 10 days after the Public Hearing and must be postmarked by May 26, 2010 to be included as part of the official public record. For additional information please contact Ruben Delgado, P.E., at 972-548-3728, or email RDelgado@collincountytx.gov.

El lunes 16 de mayo del 2011, la Autoridad de Carreteras con Peaje del Condado de Collin (CCTRA, por sus siglas en inglés) llevará a cabo una Jornada a Puertas Abiertas y una Audiencia Pública en las oficinas del Comisionado en el 4to. piso del Edificio de Asuntos Administrativos del Condado de Collin, que está localizado en 2300 Bloomdale Road, McKinney, Texas 75071. El objetivo de la Jornada a Puertas Abiertas y de la Audiencia Pública es presentar las diferentes alternativas y discutir el estado de la propuesta para el Segmento 3 de la Carretera de Servicio Outer Loop. El límite este del Segmento 3 es de la carretera US 75 cerca de Melissa, Texas a DNT IV por la ciudad de Celina, Texas. La Jornada a Puertas Abiertas empezará a las 5:30 p.m. y brindará la oportunidad a los participantes de revisar las exhibiciones del proyecto. Personal de CCTRA y sus contratistas estarán disponibles para responder preguntas individualmente. La presentación formal para la Audiencia Pública empezará a las 6:30 p.m. seguida de un período de comentario público. El punto de vista del público es una parte importante del proceso de toma de decisiones de transportación. Los comentarios tendrán un límite de 3 minutos por persona, serán grabados y formarán parte del registro público oficial. La grabación de la Audiencia Pública estará disponible en la página de internet del Condado en:

http://www.co.collin.tx.us/commissioners_court/mobility_projects/outerloop.jsp

Se invita a todas las partes interesadas a que asistan a la Jornada a Puertas Abiertas y participen en la Audiencia Pública para aprender sobre el proyecto y expresar sus puntos de vista. Aquellos ciudadanos interesados en participar y que requieren adaptaciones especiales para asistir o escuchar, pueden llamar a Ruben Delgado, P.E., Director de Ingeniería, llamando al 972-548-3728 por lo menos setenta y dos horas antes de la fecha de reunión. El Condado hará todos los esfuerzos razonables para acomodar esos requisitos. La Audiencia Pública se llevará a cabo en inglés, sin embargo, habrá traducción limitada en español durante la jornada.

Se recibirán comentarios verbales y escritos sobres este proyecto durante la Audiencia Pública y también se pueden enviar comentarios a:

Rubén Delgado, P.E.
Director of Engineering
825 North McDonald Street, Suite 160
McKinney, Texas 75069

Los comentarios se recibirán por un período de 10 días después de la Audiencia Pública y deberán enviarse antes del 26 de mayo del 2011, para que puedan ser incluidos dentro del registro público oficial. Para obtener más información, favor comunicarse con Rubén Delgado, P.E., llamando al 972-548-3728, o vía correo electrónico: RDelgado@collincountytx.gov.

PUBLIC HEARING

COLLIN COUNTY OUTER LOOP

Segment 3
Dallas North Tollway
to
US 75

Collin County, Texas

May 16, 2011

Open House & Public Hearing
5:30 PM

Jack Hatchell Collin County Administration Building
2300 Bloomdale Road, 4th Floor
McKinney, TX 75071

Purpose of this Meeting

- To inform the public and discuss the status of the alignment study for the western segment of the Collin County Outer Loop. The western segment runs generally east/west from the Dallas North Tollway in Celina to US 75 in McKinney.

Meeting Format – Open House & Public Hearing

- Please sign in so we may accurately document attendance and keep you informed of any future developments
- View maps & exhibits from 5:30 PM to 6:30 PM
    - Please ask questions
    - Please inform staff of issues or concerns
- Formal Public Hearing presentation at 6:30 PM
    - Make formal comments for public record

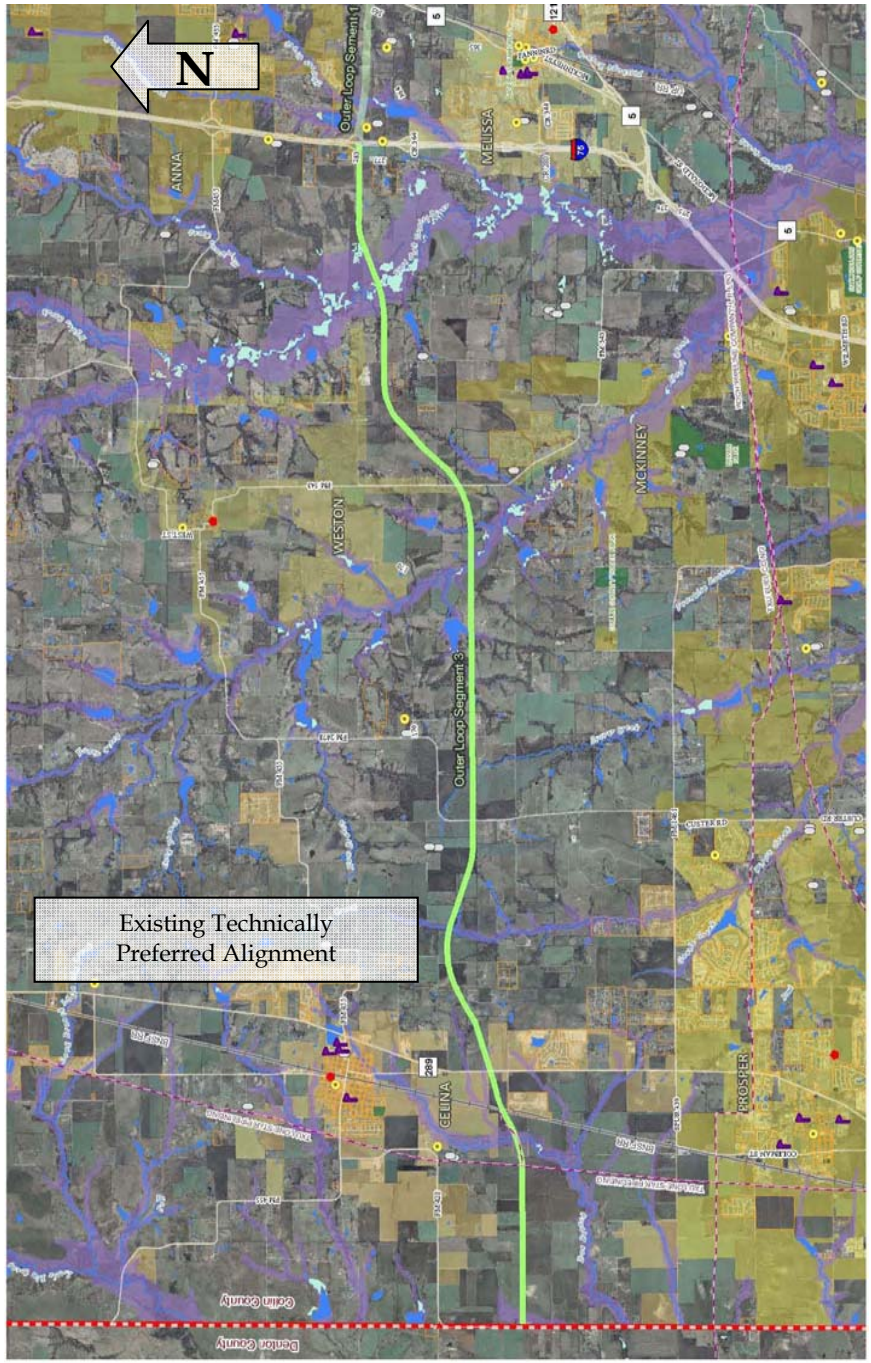
Project Description

Collin County began planning for the Collin County Outer Loop, a subsection of the regional outer loop to encircle the Dallas-Fort Worth Metroplex, in 1982 with the adoption of the first Collin County Thoroughfare Plan. In the past 10 years, Collin County has performed corridor and alignment studies and has conducted several public meetings with Collin County citizens. The purpose of this Public Meeting and Public Hearing is to provide an update to previously approved alignments of the proposed roadway corridor. The Collin County Toll Road Authority Board will decide the final alignment location in early summer, 2011.

A two-lane, two-way service road is currently planned with future expansion to a 6-lane controlled access highway facility. This project is not currently funded and there is no current schedule for Right of Way acquisition or construction of this project.

Layouts illustrating the currently approved and potential alternative alignments are available for viewing on the County's web site:

www.co.collin.tx.us/engineering



COLLIN COUNTY OUTER LOOP – DALLAS NORTH TOLLWAY to US 75

COMMENT FORM

PUBLIC HEARING
COLLIN COUNTY OUTER LOOP
May 16, 2011 – 6:30 pm
Jack Hatchell Collin County Administration Bldg.
McKinney, Texas

Welcome to the Open House & Public Hearing for the Western Segment of the Collin County Outer Loop from the Dallas North Tollway to US 75 in Collin County, Texas. Your comments are important to the development of this project and will be taken into consideration. To submit written comments, please use the space provided below. **Either leave the form here at the meeting or fold and tape; mail it to the address below postmarked by May 26, 2011.**

1. Do you own property along the proposed Outer Loop? ☐ Yes ☐ No
   If yes, ☐ Residential ☐ Commercial ☐ Other (*Please specify*) _____
   If no, are you a tenant in a property along the proposed Outer Loop? ☐ Yes ☐ No
   If yes, ☐ Residential ☐ Commercial ☐ Other (*Please specify*) _____

2. How did you hear about this public meeting? (Check all that apply)
   ☐ Newspaper Advertisement ☐ U.S. Mail ☐ Other (*Please specify*) _____

3. What are your concerns regarding the proposed Outer Loop?

Collin County Toll Road Authority
Outer Loop Segment 3
Public Hearing Report – Amendment 1

October 24, 2011

COLLIN COUNTY

CH2MHILL

The Collin County Toll Road Authority (CCTRA) will conduct a regularly scheduled meeting at 1:30 PM on Monday, October 24, 2011 in the Commissioners Courtroom on the 4th Floor of the Jack Hatchell Collin County Administration Building located at 2300 Bloomdale Road, McKinney, Texas 75071. At this meeting, the CCTRA will hear a presentation and update about the proposed alignment alternatives for Segment 3 of the Collin County Outer Loop from SH 289 (Preston Road) to FM 2478 in Celina, Texas. At this meeting, the CCTRA may take a vote in selecting a preferred alignment for this important mobility project. All interested citizens are invited to attend or watch online at www.co.collin.tx.us/ Further information about this meeting will be posted at http://public1.co.collin.tx.us/public_notices/default.aspx prior to the meeting date.

Collin County Toll Road Authority
Outer Loop Segment 3

Dallas North Tollway to FM 2478 Alignment Options

October 24, 2011

COLLIN COUNTY

CH2MHILL

Presentation Agenda

- Summarize Last Meeting
- Summarize Findings & Present Alternative Alignment Matrix
- Discuss Next Steps

Collin County Outer Loop
August 1, 2011 Meeting Summary

- Alignment study findings presented on August 1, 2011

- CCTRA Board selected the following:
  - Purple alignment from FM 2478 to FM 543
  - Yellow alignment from FM 543 to US 75

- CCTRA Board asked that a ‘hybrid’ option be considered between SH 289 & FM 2478 for the orange and brown alignments

Collin County Outer Loop
Hybrid Option Evaluation

- A hybrid option, the yellow alignment, was created to blend the orange with the brown alignments
- A meeting was held on September 19, 2011 with a small group of landowners in and around Summerview Estates
- A purple alignment was reconsidered which would run closer to CR 88, south of Summerview Estates

CCOL Segment 3

Section 1: DNT to FM 2478

CCOL Segment 3
Next Steps

- CCTRA Board decides on preferred alignment from DNT to FM 2478 – October 24, 2011
- Complete Environmental Document - NCTCOG
- Develop schematic design based upon preferred alignment (Date TBD; dependent upon funding)
- Develop final design based upon schematic for selected portions of project (Date TBD; dependent upon funding)

Questions

COLLIN COUNTY

CH2MHILL

Study Findings- Amended

At the request of Collin County, four alignments were re-evaluated for Segment 3 of the Collin County Outer Loop between SH 289 and FM 2478 against the approved project criteria. These evaluations are provided below along with an updated alignment matrix.

SH 289 to FM 2478

At the August 1, 2011 Public Hearing, Collin County Commissioner's Court approved the alignment for all of Segment 3 of the Outer Loop with the exception of the section between SH 289 (Preston Road) and FM 2478. The court proposed a new alternative, the yellow alignment, a combination of both the brown and orange alignments. This alternative was proposed to minimize the number of homes that would be affected by the Outer Loop, as well as locate the alignment nearest the ROW that has already been dedicated or has the potential to be dedicated for the Outer Loop. At a subsequent property owner's meeting on September 19, 2011 at the Collin County Administration Building, a fourth alignment alternative, the purple alignment, was considered. This alignment was considered to avoid all of the homes on the north side of County Road 88 near the Summerview Estates subdivision that the other alignments conflicted with. From SH 289, the purple alignment runs east along CR 88 and then turns north to avoid the Oncor substation that is located on the south side of CR 88 and then ties into the previously adopted alignments.

With respect to evaluating each alignment alternative, accessibility is rated equally for all of the alternatives. The brown and orange alignments are rated higher with respect to safety than the yellow and purple alignments due to the sharpness of the horizontal curves (smaller radii) and the super elevation required for cars to travel safely at highway speeds. Construction costs are rated equally and are similar at this preliminary stage of project development for all of the alignment alternatives.

ROW acquisition is scored generally positive for all of the alignments with each route aligning with dedicated or potentially dedicated ROW. The yellow alignment does align with the greatest amount of ROW that is willing to be dedicated. This provides the yellow alignment with the highest ranking of all of the alternatives.

Each of the alternatives affect properties and homes, the number of properties affected by each alignment are twenty-two for purple; seventeen for yellow; sixteen for orange; and sixteen for brown. Each of the alignments affect one common residence while also affecting others: three for brown; and two each for yellow, orange, and purple. Using the basis of appraised property values provided by the Collin Central Appraisal District, appraised structure values for the number of structures along each route is approximately: $500,000 for each brown, yellow, and orange and just over $300,000 for the purple route. Accordingly, the purple alignment is rated the highest with the brown rated the lowest in regard to properties and structures affected.

The acreage of ROW needed for each alignment is generally the same, with the yellow requiring the largest amount of ROW. This however is less than 5% more than the alignment requiring the

least ROW, the brown alignment. ROW has been dedicated (but not recorded) from the Carter Ranch development along the brown, purple, and yellow alignments amounting to dedications of 12, 12, and 10 acres respectively.

However, several landowners have either sent letters of intent or have verbally committed to potentially dedicate 32 acres of ROW along the orange and yellow alignments. A letter of intent sent by Ralph Belknap, dated May 20, 2011 (attached) stated his desire to dedicate approximately 30 acres for the portions of the orange alignment that cross his property. Combining the orange and yellow alignments would not affect his property so this is scored favorably with respect to both alignments. To date, there have not been any landowners come forward and propose potential dedications on the purple or brown alignments. Thus, the yellow alignment ranks highest when pertaining to ROW as it has the potential to have the most ROW dedicated utilizing dedications by Mr. Belknap & Carter Ranch.

Utilities and Infrastructure are generally rated neutral with the exception of the purple alignment. The purple alignment is ranked negatively in this category as aligning the Outer Loop along the purple route will cause conflicts with two large Oncor transmission towers located along CR 88 and perhaps conflict with an Oncor substation that is located on the southern side of CR 88.

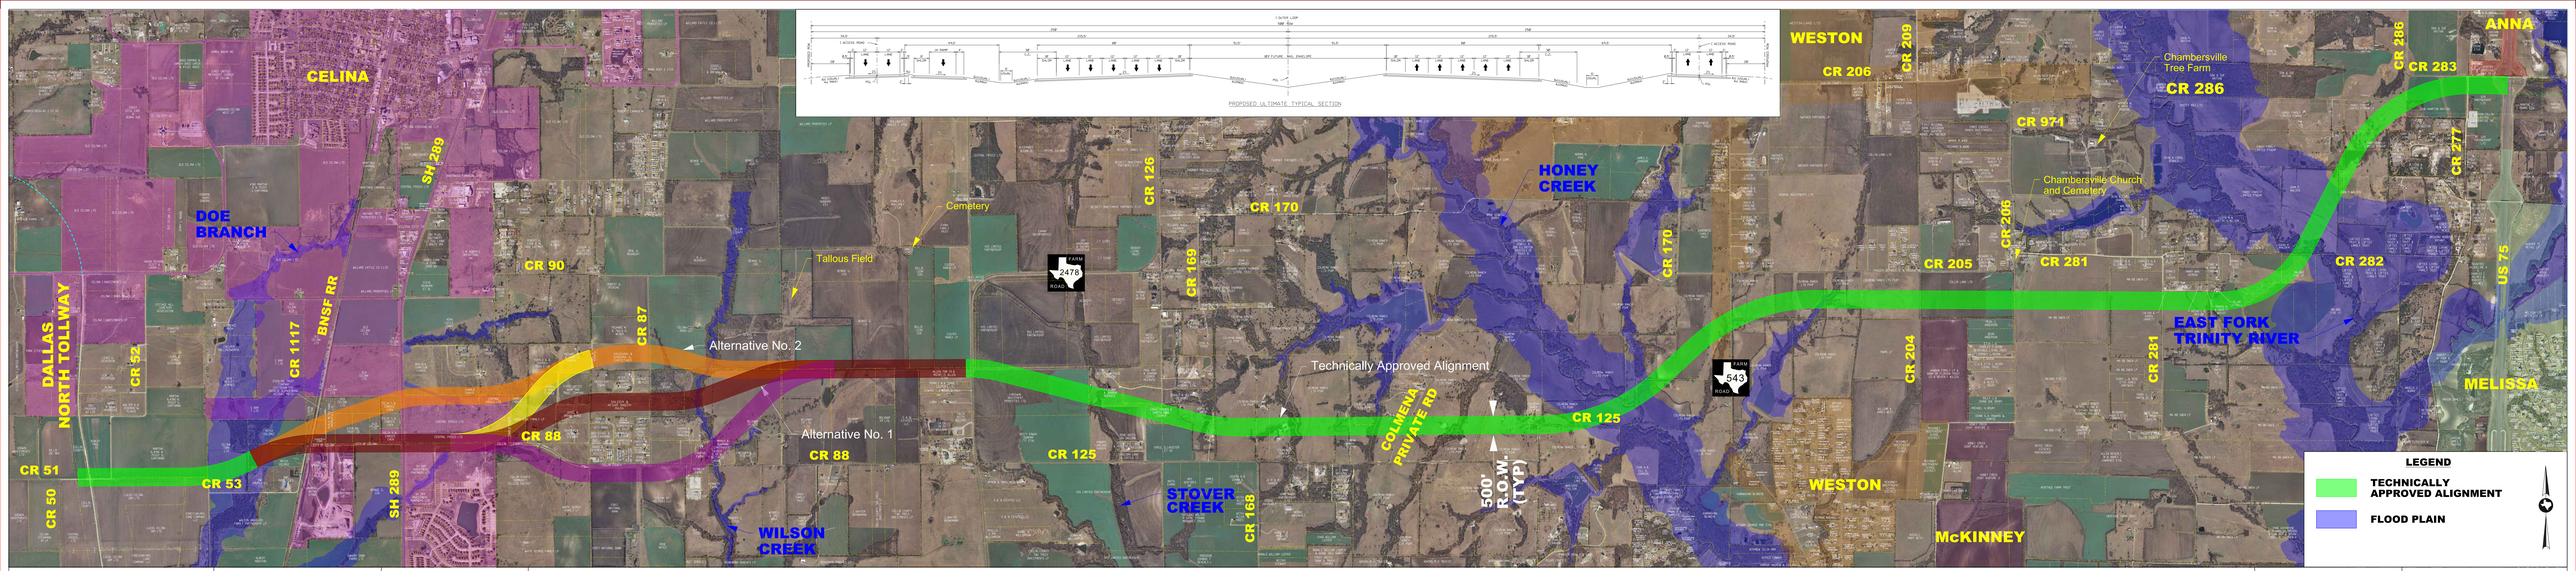
The brown route rates the highest with respect to compatibility with other projects as it provides easy accessibility to the new Collin County College campus. The yellow and orange alignments make accessibility to the campus more difficult; furthermore, the purple alignment is located on the property where the campus will be built and has the potential to conflict with the campus.

The input from the public is negative for all of the routes in this section of the Outer Loop. It is the most negative for the brown alignment and slightly less negative for the orange alignment. With the addition of the yellow and purple alignments after the completion of the Public Involvement process, formal public input has not been provided and thus the yellow and purple alignments cannot be rated or ranked against the other alternatives.

All alignment alternatives received equal scores for socio-economic, neighborhood, and noise impacts due to their proximity to Carter Ranch, Summerview Estates, and other homes in the area.

Natural impacts were generally equal for all of the alignments, with the exception of the purple alignment that transverses across a very large stock tank. There are no discernable differences between the alignment alternatives in regard to cultural impacts and hazardous materials.

The City of Celina, a project stakeholder has indicated its preference for the brown alignment over the orange alignment but has not provided any input with respect to the yellow or purple alignments. With no stakeholder input for the purple and yellow alignments, this category cannot be rated equitably.



THESE ARE PRELIMINARY DESIGN CONCEPTS AND ARE TO BE FURTHER REFINED THROUGHOUT THE DESIGN PROCESS. THE INTENT IS TO PROVIDE A GENERAL REPRESENTATION OF EXISTING AND PROPOSED IMPROVEMENTS.

COLLIN COUNTY OUTER LOOP APPROVED - DALLAS NORTH TOLLWAY TO US 75

COLLIN COUNTY TEXAS

CH2MHILL

TBPE #2297

Collin County Toll Road Authority
Outer Loop Segment 3
Public Hearing Report – Amendment 2

October 1, 2012

COLLIN COUNTY

CH2MHILL

The Collin County Toll Road Authority (CCTRA) will conduct an Open House on Thursday, May 10, 2012 at **6:30 PM at Celina Middle School, 710 E. Pecan Street, Celina, Texas, 75009**. The purpose of the Open House is to present alignment alternatives and discuss the status of the proposed Segment 3 of the Collin County Outer Loop from SH 289 (Preston Road) to FM 2478 in xand ask individual questions of CCTRA staff and the project engineer, CH2M HILL. No formal presentation will be made. Exhibits will also be available for viewing on the County's web site at:

http://www.co.collin.tx.us/commissioners_court/mobility_projects/outerloop.jsp

All interested citizens are invited to attend the Open House to learn updates about the project and express their views. Those citizens interested in attending who have special communication or accommodation needs are encouraged to contact Ruben Delgado, P.E., Director of Engineering, at 972-548-3728 at least seventy two hours prior to the meeting time. The County will make every reasonable effort to accommodate those needs. The Open House will be conducted in English; however, limited Spanish translation will be available.

Comment forms will be available for citizens to enter comments for the official project record. Written comments can also be submitted to:

Ruben Delgado, P.E.
Director of Engineering
825 North McDonald Street, Suite 160
McKinney, Texas 75069

Comments may be submitted for a period of 10 days after the Open House and must be postmarked by May 20, 2012 to be included as part of the official project record. For additional information please contact Ruben Delgado, P.E., at 972-548-3728, or email RDelgado@collincountytx.gov.

OPEN HOUSE

COLLIN COUNTY OUTER LOOP

Segment 3
SH 289 to FM 2478

Collin County, Texas

May 10, 2012

Open House
6:30 PM

Celina Middle School
710 E. Pecan Street
Celina, Texas 75009

Purpose of this Meeting

- To inform the public and discuss the status of the alignment study for the western segment of the Collin County Outer Loop from SH 289 (Preston Road) to FM 2478 in Celina, Texas.

Meeting Format – Open House

- Please sign in so we may accurately document attendance and keep you informed of any future developments
- View maps & exhibits from 6:30 PM to 8:30 PM
    - Please ask questions
    - Please inform staff of issues or concerns
    - Submit formal comments via comment forms for public record

Project Description

Collin County began planning for the Collin County Outer Loop, a subsection of the regional outer loop to encircle the Dallas-Fort Worth Metroplex, in 1982 with the adoption of the first Collin County Thoroughfare Plan. In the past 10 years, Collin County has performed corridor and alignment studies and has conducted several public meetings with Collin County citizens. The purpose of this Open House is to provide an update to previously approved alignments of the proposed roadway corridor. The Collin County Toll Road Authority Board will decide the final alignment location in early summer, 2012.

A two-lane, two-way service road is currently planned with future expansion to a 6-lane controlled access highway facility. This project is not currently funded and there is no current schedule for Right of Way acquisition or construction of this project.

Layouts illustrating the currently approved and potential alternative alignments are available for viewing on the County's web site:

www.co.collin.tx.us/engineering

COLLIN COUNTY OUTER LOOP - DALLAS NORTH TOLLWAY TO US 75

February 10, 2012

COLLIN COLLEGE

The Honorable Judge Keith Self
and The Honorable Collin County Commissioners
Collin County Administration Building
2300 Bloomdale Rd., Suite 4192
McKinney, TX 75071

Dear Judge Self and County Commissioners:

Several years ago Collin College purchased 75 acres of land along the south side of C.R. 88 and approximately one-quarter mile east of S.H. 289. The size and configuration of that acquisition was based upon the College's strategic decision to construct a major campus on that site to serve the population in northwestern Collin County and beyond.

At the time of the College's purchase, the outer loop was under study with multiple routes north of C.R. 88 and most routed to the south to intersect S.H. 289 at or above the present C.R. 88 intersection. Over time, those routes have been modified based in part by feedback from affected property owners.

Recently, it appears that a preferred route for the outer loop has it running along the center line of C.R. 88 adjacent to the College's property. With a proposed right-of-way width of at least 500 feet (250 feet on each side of the centerline), the net effect of locating the outer loop along C.R. 88 may reduce the current acreage available to the College by over 14 acres, leaving an inadequate amount of land for the development of a major campus as originally envisioned by my Board of Trustees. Because of its significant adverse impact on the College property, I have been instructed by my Board to send this written notice objecting to the preferred alignment of the outer loop along C.R. 88 adjacent to the College property.

As with Collin County, the College exists to serve the interests of the citizens and taxpayers of Collin County. It does so by providing an affordable higher education for our constituents and advanced technical skills and training for our workforce. The College cannot meet its obligations without adequate land and facilities -- the planning for, and acquisition of, which must be done years, even decades, in advance of actual use. The current preferred location of the outer loop may put that vision in jeopardy.

The Collin College Board of Trustees respectfully requests that you and the Commissioners' Court reconsider locating the outer loop along C.R. 88; or, in the alternative, that you commit to adjusting the outer loop right-of-way in this location in a manner that does not adversely impact the future development of the College facilities by reducing the acreage owned by the College.

Thank you for your consideration and I would be glad to answer any questions regarding this matter.

Best regards,

Cary A. Israel

Ref: Collin County Outer Loop Section 3
Public Hearing, May 16, 2011

Dear Mr. Delgado:

I own approximately 318 acres of land situated between F.M. 2478 and C.R. 87, adjacent to the north side of C.R. 88. I support the Alternate No. 1 (orange) alignment, which runs from F.M. 2478 along my northern boundary, turning slightly to the north at the northwest corner of my property to C.R. 87.

It's my sincere interest to dedicate land for one-half of the right-of-way for the construction of the Collin County Outer Loop (Outer Loop) as a full access Tollway with service roads, along Alternate No. 1.

I propose to dedicate/escrow the land necessary for the construction of the Outer Loop, all of which will be free and clear of any and all liens and encumbrances to Collin County. This will be subject to a reservation of mineral interest, access to the property during construction of the roadway, and a right of a reverter if construction of the roadway does not begin within ten (10) years after right-of-way dedication. I have identified the following matters that need to be addressed prior to preparation of documents and anticipate that additional issues may arise as discussions proceed:

- Determination of an Outer Loop alignment;
- Determination of the amount of right-of-way needed and reduction of right-of-way where appropriate;
- Location of easements to be reserved for drainage and other purposes; and
- Design and location of on/off ramps and related access.

I will not dedicate right-of-way for Alternate No. 3 due to the following reasons:

- The alignment would bisect the western portion of my property leaving a triangle of land on the north side of the proposed alignment that will be difficult to develop and access.
- The alignment would leave a sliver of land too narrow to develop and access on the south side of the proposed alignment.
- Alternate No. 1 will have less impact to existing residential residences west of my property.

I welcome the opportunity to work with you on this project and appreciate your time and consideration.

Sincerely,

BELKNAP FP, LTD.,
a Texas limited partnership

RE: Proposed Location of Outer Loop Segment 3
Burl & Linda Wood
10510 County Road 88

Gentlemen:

We have been requested by Burl and Linda Wood to propound their concerns and desires for the location of the Outer Loop Segment 3. Their property lies across County Road 88 from property owned by Collin College. There are two alternate paths for the Outer Loop, commencing at the southwest corner of the Wood property and the northwest corner of the Collin College property. Alternative One, the "Brown Route," travels in a northeastward direction to the north side of the Summer View housing addition, while Alternative Two, the "Purple Route," proceeds in a southeastward direction along County Road 88 to the south side of the Summer View housing addition.

My client, Burl and Linda Wood, object to the northerly Brown Route for personal, community and taxpayer economic reasons. The Brown Route is slated to go directly through the middle of their property and would require the destruction of their family home. Their remaining property would be two small triangles at the northwest and southeast corners of their property. My clients are of an age where it may, due to health or other reasons, be necessary to sell their home and move to a retirement community. If the Brown Route is chosen, but not acted upon for a number of years due to funding, it immediately handcuffs my clients. The sale of their home would be almost impossible since it is unlikely that anyone would spend money to purchase a home that will be torn down in 5, 10 or 15 years. This could constitute an immediate economic loss to my clients.

Further, we do not believe that the full safety, economic and quality of living impact has been fully explored concerning the Summer View housing addition to the east of my client's property. At a recent community meeting, the engineering people for the county, determined that the impact to the Summer View community would be equal whether the Brown Route or the Purple Route was chosen. When the Summer View community was built, County Road 88 to the immediate south was already slated to be either a 4 to 6 lane boulevard. The Brown Route would place the high speed Outer Loop along the northern

edge of the community. The community would then become an island in the middle of high speed freeways and boulevards. No one ever mentioned the impact of the noise and safety risks on the families and children in this community. Additionally, the entire community would be economically affected in that the value of their property in the concrete island would most likely decline, resulting in lower property tax revenues. At least the Purple Route only has a negative impact on the South side of the community, where they always knew there was to be 4 to 6 lane boulevard.

Also when looking at numbers, the Brown Route would affect 5 homes on the northern path while the Purple Route only affects 3 homes on the Southern path. In a perfect world, nobody would be forced to move from their home, but such is not the case. The Purple Route has a less disruptive impact on at least 2 families.

We have also been made aware of a February 10, 2012 letter from Collin College that sets forth their position. Several pertinent points were either intentionally or conveniently omitted. The 75 acres of property owned by Collin College were purchased less than three years ago. Of the 14 acres that the college claims they would lose from its development plan due to the Purple Route, approximately 3 to 4 of those acres are a silt pond that is unfit for development. Additionally, no mention was made of the potential availability of a "swap" or purchase of land with the landowners to the east so that there would be no loss of acreage for development. These are the same owners that sold the original 75 acres to the college. Nor was there any mention of taking more right of way on the north side of CR 88, my client's property, thereby reducing the acreage loss to the college. In our opinion, such a letter from the college is implied blackmail.

The Purple Route would provide the taxpayers of our community with an east/west thoroughfare along County Road 88 as it was always envisioned by both homeowners and investors in the area. A large portion of the right of way necessary for the Outer Loop is already owned by the State, thereby reducing the costs of property acquisition coming out of the taxpayer's pockets.

We therefore respectfully request that the Purple Route be chosen as the preferred route for the Outer Loop.

Sincerely,

Stephen L. Walker

Welcome to the Open House for the Western Segment of the Collin County Outer Loop from SH 289 (Preston Road) to FM 2478 in Collin County, Texas. Your comments are important to the development of this project and will be taken into consideration. To submit written comments, please use the space provided below. **Either leave the form here at the meeting or fold and tape; mail it to the address below postmarked by May 21, 2012.**

1. Do you own property along the proposed Outer Loop? ☑ Yes ☐ No
   If yes, ☑ Residential ☐ Commercial ☐ Other (*Please specify*) _____
   If no, are you a tenant in a property along the proposed Outer Loop? ☑ Yes ☐ No
   If yes, ☑ Residential ☐ Commercial ☐ Other (*Please specify*) _____

2. How did you hear about this public meeting? (Check all that apply)
   ☐ Newspaper Advertisement ☐ U.S. Mail ☐ Other (*Please specify*) Sara Phipps

3. What are your concerns regarding the proposed Outer Loop?
   Don't want BROWN because it goes thru my house and ~~the~~ 30 acres leaving us no land that could be sold.

4. Other comments: We do want the Purple Route in front of our house + land.

   ☐ Newspaper Advertisement ☒ U.S. Mail ☐ Other (*Please specify*) _____

3. What are your concerns regarding the proposed Outer Loop?
   I really feel the purple route makes a lot of sense because it follows an existing road (CR 88). The purple route also goes around a lot of current homes.

3. What are your concerns regarding the proposed Outer Loop?

   At a previous meeting at the commissioners court, it was discussed that the new proposed alignment for the purple route (Alternative 2) would extend down County Road 88 to FM 2478 where it crosses over to County Road 125. In the drawing as it is presented now, the purple route cuts through residential homes and goes north, by-passing it's alignment with County Road 88. We would like to see the purple route extend further down County Road 88 as it was discussed in the County Commissioners meeting.

2. How did you hear about this public meeting? (Check all that apply)
   ☐ Newspaper Advertisement ☑ U.S. Mail ☐ Other (*Please specify*) _____

3. What are your concerns regarding the proposed Outer Loop?
   - Segment 3 of the proposed Outer Loop runs along the South property line of the BILLIE LEON COX cultivated property at CR. 92 next to South Cemetery. It looks like there will be a 250 ft. taken along the property line. That is better than a diagonal or Middle South taken there.
   - The other property at CR 89/90 is now north of the two proposed routes. That makes me happy that the beautiful, family historic pasture would be preserved. Thank you for hearing us during this long process.

4. Other comments: Please let me know when the discussion/decision making process moves to Commissioners Court this summer.

3. What are your concerns regarding the proposed Outer Loop?
   Our home is located on the corner of CR88 & CR87. The house is not set-back very far off the existing roadright now. We have had truck & traffic Noise & speed as an issue for years now. If you choose Alternate # 2 and do Not purchase our property for whatever reason - our home will be unsaleable later. We do Not want to live ~~at~~ on top of a major highway. Just look at all the work put into restoring this beautiful home - if we can't re-sell as we intended

4. Other comments: for our retirement we will have to lose the house - Most likely won't be able to pay the enormous tax bill that comes with it - or keep working until we drop over dead. Because no one will buy a house so close to a major highway.

3. What are your concerns regarding the proposed Outer Loop?
   It is a waste of taxpayer money to put the brown route through when the purple route already goes along an existing CR 88. The homes on CR 88 bought their property already aware of a road adjacent to their property. Those of us who bought at the north end of Summerview paid a premium price for the enjoyment of NOT being adjacent to a road. You are willing to ruin the property value of homeowners and put eminent domain on the lot north of us and it →

4. Other comments: Very disappointed that Matt Shaheen is not representing his constituency's voices.

makes absolutely NO sense. BOTH homeowners at the south of Summerview + CR 88 have put their homes on the market, while those of us on the north end are staying put. Both of those (Napolitano + Mc Quiston) are young families with elementary aged kids. The families currently living on the NORTH end of Summerview are retirees for whom a move is much more difficult. Not to even mention the atrocity of what would happen to Burl Wood's property. It ONLY makes sense to use the PURPLE route. By using the brown route, you effectively sandwich my property between two high speed roadways, and the property of many others.
I stand in support of the purple route.

3. What are your concerns regarding the proposed Outer Loop?
   1. CR 88 IS ALREADY THERE SO IT SEEMS TO MAKE SENSE TO US, TO KEEP ALL OF IT POSSIBLE
   2. THE ROUTE THAT GOES 'NORTH' OF SUMMERVIEW ESTATES WILL PUT THE ROUTE NEAR TO MY HOUSE WHICH WILL RESULT IN US NOT BEING ABLE TO SELL FOR WHAT WE OWE. AS SOON AS THE ROUTE IS APPROVED, THIS WILL HAPPEN
   3. 'NORTH' ROUTE, ~~BE~~ BY MY HOUSE, WILL RESULT IN LOTS OF NOISE & TRAFFIC
   4. WE BOUGHT LAND & BUILT OUR HOME THINKING THE OUTER LOOP WOULD BE FAR NORTH WHICH WAS THE TECHNICALLY APPROVED ROUTE
   5. SEVERAL NEIGHBORS WILL BE AFFECTED, SOME IN SUMMERVIEW, SOME JUST NORTH OF US & SOME ON CR 88 & SOME ON CR 122Y (NOT SURE OF ~~THE~~ CR #), JOHN STEWART & OTHERS

4. Other comments:
   6. LESS INDIVIDUALS WILL BE AFFECTED IF THE ROUTE GOES EAST ON CR 88

3. What are your concerns regarding the proposed Outer Loop?
   I live along the proposed brown route. I bought my house & land far off the road 10 years ago because I didn't want to live on the road the brown route travels along the full edge of the southern portion of my property. The brown route totally divides the community that has developed here. Why can't the road be placed on either end of the community of homes of my neighbors rather than through the center?

4. Other comments: Because CR 88 is already slated to be 6 lanes in the future, land acquisition would be less disruptive if the highway is placed on CR 88 PLEASE - Can't you guys for once listen to the citizens. Pease do the purple route.

MAY 2012

COLLIN COUNTY OUTER LOOP - DALLAS NORTH TOLLWAY TO US 75

COLLIN COUNTY TEXAS

CH2MHILL

TBPE #2297

The Collin County Toll Road Authority (CCTRA) will conduct a Public Hearing on Monday, August 6, 2012 in the Commissioners Courtroom on the 4th Floor of the Jack Hatchell Collin County Administration Building located at 2300 Bloomdale Road, McKinney, Texas 75071. The purpose of the Public Hearing is to present alignment alternatives and discuss the status of the proposed Segment 3 of the Collin County Outer Loop from SH 289 (Preston Road) to FM 2478 in Celina, Texas. The formal Public Hearing presentation will begin at 6:00 p.m. followed by a public comment period as public input is an important part of the transportation decision making process. Comments will be limited to 3 minutes per person and will be recorded and made part of the official public record. The Public Hearing will be available for later viewing on the County's web site at:

http://www.co.collin.tx.us/commissioners_court/mobility_projects/outerloop.jsp

All interested citizens are invited to attend the Public Hearing to learn about the project and express their views. Those citizens interested in attending who have special communication or accommodation needs are encouraged to contact Ruben Delgado, P.E., Director of Engineering, at 972-548-3728 at least seventy two hours prior to the meeting time. The County will make every reasonable effort to accommodate those needs. The Public Hearing will be conducted in English.

Verbal and written comments from the public regarding this project can be presented at the Public Hearing. Written comments can also be submitted to:

Ruben Delgado, P.E.
Director of Engineering
825 North McDonald Street, Suite 160
McKinney, Texas 75069

Comments may be presented for a period of 10 days after the Public Hearing and must be postmarked by August 16, 2012 to be included as part of the official public record. For additional information please contact Ruben Delgado, P.E., at 972-548-3728, or email RDelgado@collincountytx.gov.

PUBLIC HEARING

COLLIN COUNTY OUTER LOOP

Segment 3
SH 289 to FM 2478

Collin County, Texas

August 6, 2012

6:00 PM

JACK HATCHELL COLLIN COUNTY ADMINISTRATION BUILDING
2300 BLOOMDALE ROAD
MCKINNEY, TX 75071

Purpose of this Meeting

- To inform the public and discuss the status of the alignment study for the western segment of the Collin County Outer Loop from SH 289 (Preston Road) to FM 2478 in Celina, Texas.

Meeting Format – Public Hearing

- Please sign in so we may accurately document attendance and keep you informed of any future developments
- Public Hearing begins at 6:00 PM
    - Make formal comments at hearing or via comment forms for public record

Project Description

Collin County began planning for the Collin County Outer Loop, a subsection of the regional outer loop to encircle the Dallas-Fort Worth Metroplex, in 1982 with the adoption of the first Collin County Thoroughfare Plan. In the past 10 years, Collin County has performed corridor and alignment studies and has conducted several public meetings with Collin County citizens. The purpose of this Public Hearing is to provide an update to previously approved alignments of the proposed roadway corridor.

A two-lane, two-way service road is currently planned with future potential future expansion to a 6-lane controlled access highway facility. This project is not currently funded and there is no current schedule for Right of Way acquisition or construction.

Layouts illustrating the currently approved and potential alternative alignments are available for viewing on the County's web site:

www.co.collin.tx.us/engineering

Re: Collin County Outer Loop, Segment 3, from SH 289 to FM 2478

President Self, Members of the Board and Mr. Delgado, County Engineer:

I am writing this letter on behalf of Central Frisco, Ltd., which owns approximately 86 acres of commercial land at the NEC of Preston Road and CR 88 (Future Loop). We respectfully object to the alignment approved at the August 6, 2012 Public Hearing. We have participated in this process since the beginning and are trying to understand what transpired at the August 6th meeting, that resulted in the Board Members approving a **new route,** not subjected to the same rigorous public process the other routes went through.

Following is a condensed version of the timeline for the approval of the Outer Loop, Segment 3, along with comments.

According to the published minutes, the first Technically Preferred Alignment was dated November, 2006.

On August 26, 2010, a Public Hearing was held that included a diagram showing the **Brown, Blue, Orange and Green** routes for segment 3.

The May 16, 2011, Public Hearing diagram, again showed the **Brown, Blue, Orange** and **Green routes**.

The August 1, 2011 CCTRA meeting continued to show the **Brown, Blue, Orange** and **Green** routes as possible alternatives, and the Board voted to approve the **Brown** route with the ability to revisit the **Orange** route.

> *"At the August 1, 2011-Director Cheryl Williams made a motion, seconded by Director Joe Jaynes which passed 5-0: President Self stated we owe the public a decision. He asked for a motion. Director Williams made a motion to approve **Brown** with the understanding that they look at the ability to add **Orange** back in. Mr. Barresi said it wouldn't be a terrible amount of effort to do that. Director Webb said by approving this, this starts the process so they can move forward with environmental."*

1341 S. Preston Rd., Suite C • Celina, Texas 75009
972.382.4004 phone • 972.382.4774 fax

At the October 24, 2011 meeting, the **Yellow** and **Purple** routes were added to the diagram along with **Brown** and **Orange** previously presented. At this meeting, the City of Celina voiced its opposition to the **Yellow** route and it received little if any public support. Per the minutes, the **Purple** route received the most support. The minutes reflect the Directors opinion that the **Purple** route go through the public hearing process and state....

> *"following lengthy discussion, Mr. Barresi stated the **Purple** alignment has never been presented in a public meeting. Commissioner Shaheen wants counts to be redone, and if the **Purple** alignment is less disruptive, he wanted to select that option. Commissioner Webb felt if the Court was going to do that, then they should start the process all over so all the property owners can come and express their concerns. Commissioner Shaheen agreed and then asked for a matrix with just the **Brown** and **Purple** alignments. Mr. Delgado agreed with the need for a new public hearing. Commissioner thanked everyone for their input."*

The May 10, 2012 Public Hearing, held in Celina, showed the preferred alignments trimmed to two, **Brown** and **Purple,** as result of the input from the October meeting. The **Brown** and **Purple** routes (**as they have been shown, referenced and documented in all previous diagrams**) were again shown with two options under consideration. We had two representatives at the meeting and both observed almost everyone in attendance voicing support for the **Purple** route, including the Mayor of Celina. Others simply expressed a desire for a decision to be made. There was no discussion or presentation of another route possibility. This meeting took place 6 1/2 months after the October meeting and 3 months prior to the August 6, 2012 meeting.

Key points:

- **The Brown** route was approved at the August 1, 2011 meeting with a caveat regarding the **Orange** route. (did not materialize)
- The so-called **Brown** route (I will refer to as the **"Red"** route hereafter) approved at the August 6, 2012 meeting is not the same **Brown** route previously shown and should have been labeled a different color. It should have been presented as a new route just as **Purple** and **Yellow** were. This new alignment is a signification change that should have gone through the same rigorous examination and discussion as previously considered routes.
- I received an email from the Planning Director of the City of Celina on July 20, 2012 reminding us, as partners, in Celina's future, of the August 6, 2012 meeting. In that email she states that the link for the proposed Outer Loop can be accessed at: Commissioner's website.
- I went to the website prior to the August 6, 2012. The **Brown** and **Purple** routes from the October exhibit were still the latest posted. If a change was being made, new information should have been posted.
- The City of Celina was not adequately notified about the route change **(Red)** and found out just prior to the meeting August 6, 2012.

- I also understand the CCTRA Directors did not receive their package showing the new route until after lunch the day of the meeting.
- From October 2011 until August 2012 the only routes being presented and considered were the **Brown** and **Purple.**

In summary:

We had a **Brown** route approval with the option to add **Orange** back in. The **Orange** and **Yellow** routes were taken out of consideration and the **Brown** was still the original approved route but a new route, the **Purple** was being presented as an alternative. New information was requested on these two routes and it was agreed the **Purple** route needed to go thru the Public Hearing process. The consensuses at the October 24th meeting and the May 16, 2012 public hearing were in favor of the **Purple** route.

After all the effort by the CCTRA, to be transparent and make sure a fair process was followed regarding running new routes through the public hearing process, and keeping the public informed (as was done with the **Purple** route), we question how this new route (**Red**) was first presented at the August 6, 2012 meeting, voted on and approved that day, without public notification, notification to the City of Celina, or publication on the County website.

We respectfully request you reconsider the alignment, based on the public input received over the past year, as evidenced by the information above.

Sincerely,

Van D. Nichols

3. What are your concerns regarding the proposed Outer Loop?
   Our property - our home lies right on the corner of CR 88 & CR 87. To increase the lanes of CR 88 will most likely put them into our front yard. We are not set back very far off the road now. We realize this may be years off but it definitely leaves us as homeowners in limbo - keep improving the property or stop now knowing it will be worthless & unsaleable later.

4. Other comments: You hold our future retirement plans and options in your hands.

Re: Information Request
Segment 3 - Collin County Outer Loop
Collin County, Texas

Gentlemen:

Please consider this our formal request for information under the Texas Public Information Act. In this regard, I have completed and attach the County's online form setting forth the information requested. Notwithstanding, I am submitting this letter to the other addressees in the event the Public Relations Department – Collin County is not the proper addressee of this request.

Specifically, we are requesting copies of all written, graphic or electronically stored records together with all drafts and copies that are different in any way from the original (including without limitation, correspondence, memoranda, notes, reports, papers, files, books, records, contracts, agreements, telegrams and other communications sent to or received, minutes, notes, summaries or other written records and recordings of any conferences, meetings, visits, interviews or telephone conversations, transcripts of testimony, voting records, statements, interviews, affidavits, printed matter, photographs, electronic or email messages and other data) relating to, arising out of or regarding Segment 3 of the Collin County Outer Loop for the period of August 1, 2011 through September 13, 2012, the meetings held in connection therewith, the

matters and information considered in determining the route therefore, and the reasons for choosing such route.

Please contact me to arrange for our payment for any duplication charges related to this request.

With kindest regards, I am

Sincerely,

Robin D. McGuire
General Counsel

Cc: Van Nichols (via e-mail w/ encl.)
