CCTRA RESOLUTION NO. 2012-3041-11-19

GENERAL DISCUSSION

3. AI-36054 Outer Loop Segment 3 Final Report, authorization to negotiate with CH2M Hill on a scope and fee for the section between the Dallas North Tollway (DNT) and SH 289 and direct the North Central Texas Council of Governments (NCTCOG) staff to start the Environmental Document, Engineering.

Ruben Delgado and Tracy Homfeld from the Engineering Department came forward. Ms. Homfeld handed Board members the final report and project amendment of Segment 3 of the Outer Loop from 2478 Custer Road to 289. Mr. Delgado informed the Board there are bond funds in place for construction of the Outer Loop from the Dallas North Tollway (DNT) to Preston Road and there are RTR (Regional Toll Revenues)

funds for environmental. Mr. Delgado would like the Board to consider proceeding with the preliminary engineering in the Outer Loop Segment 3 from DNT to 289 only to Custer Road. If the Board agrees, Mr. Delgado said they can continue with the environmental. The question is does the Board want to continue with the preliminary engineering?

Director Shaheen asked for how long are environmentals good. Mr. Delgado replied this is locally funded and can stay as long as we want it. Director Shaheen asked for clarification on the timeline. Mr. Delgado said funding is there to proceed with construction. He gave a timeline of the first six months. The process would take 18 months to two years before they would get into construction, which includes right-of-way acquisition. Director Shaheen suggested moving forward. Director Williams is not in favor of moving forward. During the last meeting when the alignment was selected, the Board did not receive the maps in their packet. She left to go to Austin before the public hearing. At the public hearing, there was a new brown route that nobody had seen and that was the one that was adopted. Director Williams has concerns with that process. She would have stayed had she known the Board would be looking at a different route.

Following discussion, a motion was made to approve the Outer Loop Segment 3 Final Report. (Time: 2:57 p.m.)
