RE: Request Use of Open Space Bond Funds to Rock One Soccer Field for Additional/Overflow Parking

During FY 2014 Parks and Open Space Bond Funding application process, Myers Park & Event Center was awarded \$200,000 to install a grass paver parking area. After further research and discussions with various manufacturers and geotechnical firms it has been determined that this product is not a viable alternative due to soil conditions in this area.

As an alternative, we are proposing to place 6" of loose rock on one soccer field to add approximately 200 overflow, all-weather parking spaces. We have talked with Public Works and they have estimated that 1825 tons of rock would be required for this project. The current price of rock is \$16 per ton; however this price is expected to increase based on changing routes and delivery areas. Therefore, we are using an estimated cost of \$20 per ton to purchase the material required for this project. Public Works has offered to provide the equipment and labor necessary to spread the rock.

Myers Park & Event Center is requesting approval to use \$38,000 from the Parks and Open Space bond account to purchase the rock required for this project.

We will be available to answer any questions you might have regarding this item.
