

Crime Scene Analysis FARO Video

Accident Reconstruction FARO Video

FARO

- Takes Photos and Measurements together.
- Fast processing after scans.
- Indoor, outdoor, multiple room scenes with ease.
- Can scan small spaces like vehicle interiors
- Accuracy less than 2mm
- Body camera reconstruction.
- Shooting trajectory analysis.
- Blood spatter analysis.
- Crash Reconstruction.
- 3D scaled crime scene documentation

Photogrammetry

- Training and equipment not readily available:
 - Offerings are being “considered” only
- Outdated technology.
- Takes photos and not measurements.
- Extremely long processing/computer times (days).
- Does not work in small spaces.
- Accuracy less than 5 inches.
- High chance of error.
- No crime or crash analysis capabilities.
- Other area agencies do not use it due to difficulty and inaccuracies.
