Re: CR 93 Asphalt Upgrade Project

The City of Celina recently contacted Public Works regarding their desire to upgrade CR93. This road is a short, 230 ft. mutual boundary road which intersects SH289 northeast of downtown Celina.

Celina offered to hire a contractor to perform the work which would include site preparation and a 2" asphalt overlay. Assuming the County chooses this option, the County's share of the cost would be \$3,205.

Given the deficient economies of scale for a project of this size, PW staff believes relocating the necessary heavy equipment and reassigning the required personnel would be counterproductive and detrimental. Instead, PW staff feel that the \$3,205 fee is more than reasonable compared to the department's ability to preserve current assignments without interruption. Public Works has the funds available and budgeted in road maintenance account 7532.

Public Works requests Commissioners Court's consideration and approval to cost participate with the City of Celina to upgrade CR 93. Should you require additional information, please contact me and I will respond accordingly.
