Re: Cisco UCS Server Chassis

The Collin County Information Technology department is requesting Commissioner Court approval to advertise the procurement of equipment and professional services to provide a Cisco UCS Server Chassis solution. The procurement of this chassis and blade server will provide the county with additional server growth capacity and the groundwork for our next generation of high-density servers.

This request is budgeted as part of the FY17 budget under project P06006. The Cisco UCS server platforms are the current county standard.
