Date: May 22, 2017  
To: Commissioners Court  
From: Clarence Daugherty, P.E., Director of Engineering  
Subject: Planning Board Recommendations for Bond Program

---

The Planning Board has considered the necessity of a bond program for transportation as the Commissioners Court has directed. The Planning Board's recommendation is attached. Unfortunately since the feasibility studies for various corridors for limited access roadways have not been completed, the Planning Board's recommendation is based on assumptions that may change as the studies progress. However, the general sense of what is needed will remain constant, even though the funding amounts may vary. Also the Planning Board has provided options for the Court to consider, so deliberations will have to take place in order to decide which option or some variation to choose. Also resolutions and other communication from cities about the LARs concept and about the proposed bond program are attached for your review.

Members of the Planning Board, as well as the staff, will be present to answer any questions the members of the Court may have.
