Collin County Information Technology Equipment Standards Justification

The following manufacturers/vendors have been identified as the standard supplier of technology equipment within the county for specific technology areas. While this list of standards will be used to guide procurement, it does not necessarily preclude the IT department from soliciting bids based on generic specifications where the use of a specific manufacturer is not necessary or where a specific non-standard manufacturer is required for a specific line of business. This list is to serve as a guide and may be amended, by future court order, as technology or market conditions dictate.

Technology Area: Audio Visual		
Manufacturer	Purpose	
Sharp Corporation	LED HDTV systems for courtroom display. Selected as standard in court	
	implementations for consistency and support needs.	
Harman International Industries, Inc.	Video system controllers, source devices, receivers, displays and programming language selected as a standard for consistency, support and programming reasons. Subsidiary companies are comprised of: • AKG Acoustics • AMX • Existing county staff are AMX certified technicians and AMX provides free training to government clients • Crown International • dbx Professional Products • DigiTech (DigiTech Whammy) • Harman Kardon • Infinity Systems • JBL (JBL Paragon) • Lexicon • Mark Levinson Audio Systems • Martin Professional • Soundcraft • Studer	
Diama Carlana	Symphony Teleca	
Biamp Systems	Audio server, amplifier, input card and output cards selected as a standard for	
Corporation	consistency, support and programming reasons.	
Williams Sound, LLC	Assisted listening system selected as a standard for consistency, support and programming reasons.	
L3 Mobile-Vision, Inc.		
L3 MODITE-VISION, INC.	In car video camera system	

Technology Area: Bac	kup Solution
Manufacturer	Purpose
Dell Technologies Inc.	The Dell EMC Infrastructure Solution Group provides support for existing Avamar and Data Domain hardware and software used for data file and virtual server "tapeless" disk based backup processes. Subsidiary companies are comprised of: • Dell Client Solutions Group • Dell EMC Infrastructure Solutions Group • Dell EMC Services • RSA • Virtustream • Pivotal • SecureWorks • VMware
NetApp, Inc.	Existing hardware and software solution used to ensure image files and image metadata copies are available for disaster recovery needs.
Technology Area: Stor	rage
Manufacturer	Purpose
NetApp, Inc.	Existing storage solutions at the county are based on NetApp devices (IBM N-Series systems are NetApp based solutions which are no longer sold by IBM); continued use of NetApp based solutions selected for consistency of support operations.
Dell Technologies Inc.	The Dell EMC Infrastructure Solution Group provides support for existing storage solutions for enterprise SQL Server and data backup; continued use of EMC based solutions selected for consistency of support operations. Subsidiary companies are comprised of: • Dell Client Solutions Group • Dell EMC Infrastructure Solutions Group • Dell EMC Services • RSA • Virtustream • Pivotal • SecureWorks • VMware
Technology Area: Serv	
Manufacturer	Purpose
Cisco Systems, Inc.	Cisco UCS servers selected as the standard for current and future server needs within the county based on leading market share position, support of Cisco switching within the server, familiarity of county technical staff with the platform and IBM's withdrawal from the Intel market; UCS selection applies to both rack mount and blade servers.
Dell Technologies, Inc.	The Dell EMC Infrastructure Solution Group provides VMware server virtualization software used within the county to support over 300 virtual servers running on existing hardware; selected based on industry market share and consistency of support operations and industry leader with a continued technological advantage delivered through increased use of management capabilities. Subsidiary companies are comprised of: • Dell Client Solutions Group • Dell EMC Infrastructure Solutions Group
