All lots must utilize alternative type On-Site Sewage Facilities.

Must maintain State-mandated setback of all On-Site Sewage Facility components from any/all easements and drainage areas, water distribution lines, sharp breaks and/or creeks/rivers/ponds, etc. (per State Regulations).

The existing OSSF on Lot 1A is an alternative system, suitable for the site and existing structure. Any changes to any existing structures or connection of any new structures to the existing OSSF must be reviewed by CCDS prior to construction for compliance with OSSF regulations. The P.E. proposed redesign submitted with the plat shows that all OSSF components for Lot 1A will be completely within the boundaries of Lot 1A. If any of the OSSF components are over the any of the lot lines and continue onto another parcel, the entire system(s) must be replaced with an approved alternative system (after review and permitting through CCDS).

Tree removal and/or grading for OSSF may be required on individual lots.

There are no water wells noted in this subdivision and no water wells are allowed without prior approval from Collin County Development Services.

Individual site evaluations and OSSF design plans (meeting all State and County requirements) must be submitted to an approved by Collin County for each lot prior to construction of any OSSF system.

HEALTH DEPARTMENT CERTIFICATION:

I hereby certify that the on-site sewage facilities described on this plat conform to the applicable OSSF laws of the State of Texas, that site evaluations have been submitted representing the site conditions in the area in which on-site sewage facilities are planned to be used.
