Re: CR 1219 Upgrade to Concrete Project

The City of Princeton contacted Public Works regarding their desire to work cooperatively with the County to upgrade CR 1219 adjacent to Charlie's Concrete, to a reinforced concrete section. The section, shown on the attached map, is approximately 1,730 ft. long and is a shared boundary road with Princeton. The existing road has been severely damaged by large volumes of heavy trucks and staff feels that any section less than reinforced concrete will also deteriorate rapidly.

The attached letter details the responsibilities of Princeton and the County. To summarize the County will provide a topographical survey of the site, remove the existing surface, regrade and revegetate the ditches, provide traffic control devices, and contribute \$25,000 cash toward the total estimated construction cost of \$420,000.

Given the scope of the required upgrade staff feels that the requested County participation is reasonable and that the project will be mutually beneficial to Princeton and Collin County.

Funds have been budgeted, (Road Reconstruction 010-7501-680-75-36) to accommodate this proposed upgrade project.

Public Works requests Commissioner's Court consideration and approval to participate with the City of Princeton in the reconstruction of CR 1219.

Should you require additional information, please contact me and I will respond accordingly.
