Re: Orr Road (CR 317)

Public Works requests Commissioner's Court consideration of an Engineering Contract with Binkley Barfield Inc. to design an upgrade to Orr Road (County Road 317) to a 24 ft. concrete section from Stacy Road to the southern driveway of the North Texas Municipal Water District (NTMWD) Sewer Treatment Plant, a distance of approximately 3,600 ft. Approximately 1,200 ft. of the road is within Fairview and the remaining portion is in the County. The design fee will be \$188,380.00.

NTMWD operates a sewer treatment plant fronting on Orr Rd (CR 317) and its sludge disposal trucks utilize Orr Rd for transport. The road is currently a standard county road section consisting of a rock base with a chip seal surface. The roadway was not intended to bear the loads being applied to it and has deteriorated badly. NTMWD approached the county and offered to participate in upgrading the road to a concrete section designed to bear the appropriate loads for a thirty year design life.

The interlocal agreement with NTMWD, the City of Fairview and the County is on this Court's agenda. The fee for design is included in the cost agreement in the ILA and will be paid as proportioned in that agreement.

If you have any questions please do not hesitate to contact me and I will respond accordingly.
