Re: CR 466 & 499 Drainage Issue

Public Works received a request to resolve a drainage issue situated on the south side of CR 466 and west side of CR 499. Over time, numerous weather events have washed a considerable amount of base material from the road shoulder which will undermine the integrity of the road.

Resolving this situation would necessitate R&B crews operating on private property. PW has received the signed Temporary Construction License and Temporary Access Agreement from the required property owner.

PW staff surveyed the area and proposes adding 444 cubic yards of material to fill voids and prevent future erosion. Approximate cost to resolve the drainage issue is \$4,613.00.

Should you require additional information, please contact me and I will respond accordingly.
