Re: Equipment

As a respected agency within Collin County, Constable, Pct. 4 has been called upon like many other law enforcement agencies in response to protests and potential riots. We have been called to assist by Frisco, Prosper, and Celina PD's. In addition, we maintained a presence at the peaceful prayer gathering located at the courthouse.

During the assistance with local police departments, we found ourselves under-equipped to safely handle crowd control measures had the crowd become unruly. The equipment being requested goes towards issuing our deputies with protective gear that will afford them a level of response commensurate with aggression being exhibited towards them.

The equipment enhances the safety of our deputies in these environments with additional facial and body protection. The equipment will also successfully filter out any chemical munitions deployed as a crowd control measure.

Thank you for time and consideration of this request.
