### **Preservation, Restoration and Records Archive-Five Year Plan FY 2020 – FY 2024**

#### **Plan Summary**

The purpose of this document is to define the restoration and preservation plans of the County Clerk's Office for the next five (5) fiscal years. The scope of work is ongoing in order to preserve documents and conduct restoration activities when necessary. The ultimate goal of these efforts is to digitize permanent documents and make them readily available and useable to the public online, thus protecting the original documents. The plan is designed to comply specifically with the requirements and is the intent of Texas Local Government Code Section 118.011 (f) and 118.025, HB 1513-83(R). This document addresses the restoration and preservation needs of the County Clerk's records archive.

#### **Responsibility**

The responsibility for implementing the preservation and restoration of records maintained by the County Clerk's Office will be the County Clerk and the delegated employees selected to assist the County Clerk. Final decision regarding the funding and expenditures of the plan shall be made by the County Clerk with Commissioners' Court approval.

#### **Budget and Expenditures**

Records preservation and restoration efforts are funded by revenue generated by the County Clerk's Archival Fee. The plan may be adopted by the Collin County Commissioners Court as approved by the Amendments to Texas Loc. Govt. Code 118.001 and Section 118.025 – Amendment 51.305 (b) as set by HB 1513 of the 83<sup>rd</sup> (R) Legislature. The fee amount is approved by the Collin County Commissioners' Court, and itemized as part of Collin County's annual budget process.

The funds generated from the collection of this fee are expended only for preservation and restoration, document indexing and records storage. It is our intent to designate all funding carried over from a previous fiscal year for expenditures to the above.

## **Overview**

In FY 2009 an elaborate inventory of all records in possession of the County Clerk's Office was conducted. The inventory identified the current record type (book, paper and film) with the desired digitized format and retention period. Records with a short retention period will not be preserved. They will be destroyed in accordance with guidelines set by the Texas State Library and Archive Commission.

The projects' focus is to unbind, clean, humidify, de-acidify and encapsulate records in an archival polyester pocket, and rebind them in Disaster Safe County Binders which meet or exceed the NFPA Operating Practices ~6.12.2. All pages will be digitally scanned and captured via Kodak Digital Science Scanners and Kodak High-Volume Capture Software and then formatted in a multi-page or single page Group 4 TIFF files. All images are to be saved in duplicate to Kodak Preservation Gold DVD-Rs.

It is intended for all preservation and restoration work to be done in the most effective techniques and practical location. Collin County will have the right to make periodic visits to the location where the records are being preserved and restored. Unsatisfactory conditions or methods will result in all work being suspended until procedures and techniques satisfactory to the County Clerk are implemented and adhered to. The cost for the books and pages to be restored and preserved will adhere to all procurement statutes and/ or bidding processes.

### **Preservation Project 2009**

The 2009 preservation project included 2066 volumes of deed records, 131 volumes of deed of trust and indexes, 94 volumes of probate minutes and indexes, 29 volumes of birth records and indexes, 10 volumes of death records and indexes, 41 volumes of marriage records and indexes, 28 volumes of military discharges, and 820 miscellaneous books which consist of 1 or 2 volumes. These books were preserved first due to the severity of damage to the books by the flooding that occurred in 2007.

### **Preservation Project 2013**

The 2013 preservation project included 105 volumes of Commissioners' Court Minutes, 8 volumes of Indexes to Commissioners' Court Minutes, 64 volumes of Commissioners' Court Orders, 23 volumes of Indexes to Chattel Mortgages, 2 volumes of Probate Criminal Minutes County Court and 6 volumes of Survey Records.

Previously, deed records from February 14, 1974 through end of December 1984 were indexed. Only the images were loaded to match the existing index.

Indexing and verifying from January 1, 1963 through end of January 1973 for deed records has been completed. All deed record books' images and indexes dating from 1846 to present have been imaged and are available for public access in the County Clerk's Historical database.

### **Preservation Project 2015**

The 2015 preservation project included 20 volumes of Commissioners' Court Orders, 4 volumes of Criminal Minutes, 28 volumes of Criminal and Probate Docket Transfers, and 65 volumes Probate Birth Records. This project completed the restoration and preservation of all Commissioners' Court records.

### **Preservation Project 2017**

The 2017 preservation project includes Chattel Mortgage records consisting of 36 volumes dating 1904 through 1961. These records will be cleaned, de-acidified and encapsulated in non-transferrable, non-acidic clear pockets. The records will be captured as separate images and indexed for loading into the County Clerk's Land Records database. Images will also be preserved as microfilm and stored for permanent retention (L.G.C. §203.002).

### **Preservation Project 2019 - 2020**

The 2019- 2020 preservation project includes historic probate case files that date 1846 to 1975, birth records dating 1951 to 1997 and historic birth records that date 1869 to 1951. This project is in progress and includes cleaning, de-acidifying and repairing each page. The pages are then inserted into non-transferrable, non-acidic archive quality pockets and placed in binders. All pages are scanned and captured as separate images and indexed. They will be loaded into the County Clerk's Land and Vital Records database. The records will also be burned to microfilm and stored for permanent retention. These projects will continue until all records in this series are preserved.
