Wayne,

We have approximately 230 sections of guardrail (in bundles of 10) and 662 posts (see attached photos).

As discussed by phone, our Logistics section considers this scrap metal; therefore, I can dispose of it with a simple memorandum signed by me and the gaining party. Basically, it says that the gaining party will reuse or dispose of it in accordance with local, state, and federal regulations.

As far as loading is concerned, we have a forklift and skidsteer with fork attachments to load onto a truck. Once we have all approvals in place we can coordinate a good time.

Please let me know if you need anything else.

Michael

Mr. Kinard,

Can you provide a short email that we can add to the request we are sending to commissioners court please? Just something indicating what you are donating and an estimated quantity?

Mr. Kinard,

Collin County would like to accept your offer of the guardrail, posts and hardware removed from the dam area. Please let me know when we can start hauling it and any specifics on how to enter/exit the site as well as preferred times. Is equipment onsite that can load it? If not, is there a location that we can keep a piece of equipment?

Thank you,

Wayne Anderson
