- NOTES:**
- Blocking the flow of water or construction improvements in drainage easements, and filling or obstruction of the roadway is prohibited.
  - The existing creeks or drainage channels traversing along or across the addition will remain as open channels and will be maintained by individual owners of the lot or lots that are traversed by or adjacent to the drainage course along or across said lots.
  - Collin County will not be responsible for the maintenance and operation of said drainage ways or for the control of erosion in said drainage ways.
  - Collin County will not be responsible for any damage, personal injury or loss of life or property occasioned by flooding or flooding conditions.
  - Collin County permits are required for building construction, on-site sewage facilities and driveway culverts.
  - All private driveway tie-ins to a county maintained roadway must be even with the existing driving surface.
  - All surface drainage easements shall be kept clear of fences, buildings, foundations and plantings, and other obstructions to the operation and maintenance of the drainage facility.
  - All lots must utilize alternative type On-Site Sewage Facilities. Presence of fractured rock throughout the subdivision may further limit the type of alternative type On-Site Sewage Facilities to Aerobic Treatment with Surface Application on individual lots.
  - Must maintain state-mandated setback of all On-Site Sewage Facility components from any/all easements and drainage areas, water distribution lines, sharp breaks and/or creeks/ponds/etc. (Per State regulations). Due to the presence of large drainage easements on lots 1/1, 2/1 and 19/1, it is recommended that no surface improvements, impervious cover, outbuildings, swimming pools, etc. be planned on lots 1/1 or 19/1 without pre-construction planning meeting with Registered Sanitarian/Professional Engineer and Collin County Development Services.
  - There were no permitted/approved existing structures or OSFSs on the property at the time of approval, other than Lot 1/1 as addressed below. Any other existing structures or OSFSs must be reviewed and permitted by Collin County Development Services prior to any use.
  - Lot 1 contains an existing dwelling and existing OSFF. The existing OSFF on Lot 1/1 is a Conventional OSFF if the existing system ever fails or if changes are ever made to the existing structure, repairs and/or upgrades to the existing system will NOT be allowed. The entire system must be replaced with an approved alternative system (after review and permitting through CCDS). The P.E. As-Builts submitted with the plat shows all OSFF components for Lot 1/1 to be completely within the boundaries of Lot 1/1. If any of the OSFF components are actually over any of the lines and continue onto another parcel, the entire system(s) must be replaced with an approved alternative system (after review and permitting through CCDS).
  - Tree removal and/or grading for OSFF may be required on individual Lots.
  - There are no water wells noted in this subdivision and no water well are allowed without prior approval from Collin County Development Services.
  - Individual site evaluations and OSFF design plans (meeting all State and County requirements) must be submitted to and approved by Collin County for each lot prior to construction of any OSFF system.
  - All side lot lines to have 5' Drainage and Utility Easement on both sides of lot line.
  - Mail boxes shall meet USPS specifications.
  - Driveways shall meet culvert permit requirements. Driveways that do not meet culvert permit requirements shall be removed and corrected at the owner's expense.
  - Driveway/Culvert permits are required at all existing county road tie-ins.
  - Collin County will only maintain street signs and poles with current county materials.
  - Street lights that have been approved will not be maintained, repaired, or replaced by Collin County. Collin County will not be responsible for any fees associated with the street lights.
  - The finish floor elevations of all pads will be at least 18" above the highest elevation of the surrounding ground around the house after final grading.
  - All ponds shall be maintained by the individual lot owners.

WITNESS my hand this the 18 day of May, 2020.
