5. 2021 total feline intake: 148

6. 2021 total feline adoptions: 73

7. Attach at least two photos of the pets who will benefit, and/or photos and stories of pets with your organization in the past who benefited from being treated with Advantage® II. We love before and after photos, and high quality (over 150kb and please [avoid photo collages](#)) photo files too!

Please refer to attachment.

8. Describe how receiving and using Advantage® II would benefit or has benefitted pets in your organization's care:

Advantage II has been a lifesaving product for many of our animals! Almost daily we have cats and dogs coming in to our facility that are completely infested with fleas and ticks. We don't have the time to give full flea and tick baths to all of them so we know we can give them Advantage and within 24 hours the

fleas and ticks are dead and gone and the animal can start their healing process. And from there find a new forever home!

9. Optional but encouraged: Why is the work your shelter does rewarding?

The work we do at our shelter is very rewarding especially when you see these hurt or sick cats and dogs come in. We treat them, help them and as a benefit not only for them but for us they turn around and become happy healthy new members of families in our community. Being a part of both rural and suburban, we see animals in all shapes, sizes, and conditions come in through our doors. Between our Vet Techs, Animal Control Officers and all of our staffs love and care for the animals, we are able to medicate, treat and heal each and every animal needs.

10. Optional but encouraged: Link to a video online that shows pets at your organization, highlighting your before and after transformations if possible.
