

LANXESS increases prices for ion exchange resins and iron oxide adsorbers

Cologne, December 30, 2022 – Specialty chemicals company LANXESS will globally increase its basic prices for all Lewatit ion exchange resins and Bayoxide iron oxide adsorbers for water treatment applications by approximately 10%. The price increase will be valid for all orders starting January 1, 2023. Customers will be informed individually.

The monthly variable surcharge introduced in the second quarter of 2022 will be retained and adjusted monthly on the basis of key input costs. It is intended to compensate for the drastic cost increases in raw materials, energy and transportation. The measures take account of the continuing high volatility in the markets.

The LANXESS Liquid Purification Technologies business unit is one of the world's leading global solution providers for water treatment and liquid purification. Ion exchange resins and iron oxide adsorbers are used in numerous industries and applications to purify water and other liquid media effectively.

Detailed information can be found at www.lewatit.com.

LANXESS is a leading specialty chemicals company with sales of EUR 6.1 billion in 2021. The company currently has about 13,200 employees in 33 countries. The core business of LANXESS is the development, manufacturing and marketing of chemical intermediates, additives and consumer protection products. LANXESS is listed in the leading sustainability indices Dow Jones Sustainability Index (DJSI World and Europe) and FTSE4Good.

21st March 2022

Dear valued customer,

The tight supply situation for many of our key raw materials continues to deteriorate, driven by strong demand and force majeure events/shortages within our supply chain. The ongoing situation in the Ukraine is also now starting to increase these supply pressures further.

SNF's focus remains on securing enough raw materials globally to continue to supply our customer base but these events are resulting in unprecedented and unsustainable raw material costs which continue to increase on a weekly basis.

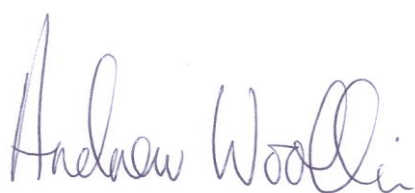

In addition to this our manufacturing costs are increasingly affected by the global energy crisis, and both packaging and transportation costs continue to increase to new highs.

For these reasons we are forced into a position where we must further significantly increase our prices to cover the current unsustainable costs in our supply chain.

With immediate effect we will be increasing prices and with a maximum price validity of 1 month. Pricing will be set according to the date of despatch not order placement.

We thank you for your continued business and understanding during this challenging time.

Please contact your SNF Account manager if you have any questions regarding this matter.

Andrew Woollin
Managing Director

January 9, 2023

RE: Product Price Increase

Effective February 1, 2023, or as contracts allow, The Dow Chemical Company, on behalf of itself and its applicable consolidated subsidiaries ("Dow"), will increase list and off-list prices by the amount listed below on all grades and package types of the following Ethylene Glycols product in North America:

Product	Price Increase \$/lb USD
Triethylene Glycol (TEG)	\$0.05
Triethylene Glycol HP	\$0.05

Thank you for your continued business with Dow. Please contact your Account Manager if you have any questions related to this communication.

Sincerely,

A handwritten signature in cursive script that reads "Jamie Mata".
