Personnel	Research Analyst	Analysis will work in a	\$70,981.40		\$70,981.40
1		collaborative effort to			
		provide resources, expertise,			
		and information with the			
		ultimate goal of detecting, preventing, investing, and			
		responding to criminal			
		activity. Intelligence			
		processes-the vehicles			
		through which information is			
		collected, integrated,			
		analyzed, and disseminated-			
		are a primary focus. The			
		intelligence cycle will include			
		collecting, processing,			
		analyzing, and disseminating			
		raw information that is			
		pertinent to the success of			
		the mission of the requesting law enforcement partner.			
		Analysts will work in an			
		environment containing an			
		array of			
		collaborating/partnering law			
		enforcement agencies and			
		activities, specifically within			
		the North Texas Fusion			
		Center (NTFC), which also			
		encompasses units such as			
		the Detention Intelligence			
		Unit (DIU), the Joint East			
		Texas Fugitive Task Force (JETFTF), and the North			
		Texas Sheriff's Criminal			
		Interdiction Unit (NTXCIU).			
		There are many ways in			
		which analysis will collect			
		and disseminate information,			
		including the following:			
		Requests for Information-			
		These may include criminal			
		histories, backgrounds,			
		employment histories, photo			
		line-ups, phone toll analyses, threat assessments, open			
		source analyses, and link			
		analyses; Investigative			
		actions-These may include			
		BOLOs (Be on the Lookout),			
		Officer Safety Bulletins,			
		Attempt to Locate/Wanted			
		Persons, and Suspect			
		Profiles; Intelligence			
		gathering-These may include			
		Situational Awareness			
		Bulletins, Potential Threat Advisors, and Source Detail			
1		Requests; Assessments-			
1		These may include Special			
		Event Threat Assessments			
		and Facility Security			

				1
		Assessments. Upon being		
		properly trained and cleared		
		for access, analysts will		
		utilize an array of tools and		
		database at their disposal,		
		including the following:		
		public records databases,		
		license plate recognition		
		(PR), employment history		
		(TWC), Collin County jail		
		database, facial recognition,		
		TLO, Accurint, TX Gang,		
		Social media tools and		
		databases may include		
		OpenSource, Tweetdeck,		
		First Alert, and Snap Map. In		
		many instances, analysts		
		may provide real-time		
		support to on-the-ground		
		personnel by acquiring,		
		analyzing, and advancing		
		critical information to those		
		who need it. Analyst may be		
		particularly utilized in this		
		area by the NTXCIU when		
		dealing with LPR data and		
		real-time traffic stops by on-		
		the-ground personnel. LPR		
		date may also be utilized for		
		intelligence gathering related		
		to recent crime trends in		
		particular sectors within the		
		County, such as an increase		
		in residential burglaries. Full-		
		Time Fusion Center
