November 1, 2022

Dear Valued Customer:

As we strive to keep costs down as much as possible, we continue to be hit with numerous cost increases. Not only are label material costs rising, but the costs of cores, boxes, inks, pallets, and other components, used in the production and packaging of our products, are on the upswing as well. And of course, with the price of materials on the rise, that pushes labor and freight costs up, too.

Due to this, we will be implementing a 10% price increase on all paper products and a 5% price increase on all film products effective with shipments beginning December 01, 2022.

Rest assured we are working closely with our suppliers to minimize any and all price increases along with keeping the impact of material allocations and delays to a minimum, as well.

We thank you for your business and appreciate your continued support.

Jeff Tyree

Dear Valued Customer,

As we strive to keep costs down as much as possible, we continue to be hit with numerous cost increases. Not only are label material costs increasing, but so are the costs for cores, boxes, inks, pallets, and other components used in producing and packaging our products. Freight costs and labor costs have also increased greatly.

Because of this we will be implementing an increase on most of our stock label items ranging from **9-10% effective** with shipments on or after **June 20, 2022.**

We will provide an updated electronic catalog soon.

Also, please be aware that although we are doing our best to minimize the impact of material allocations and delays, there could be some longer lead times on some items.

We thank you for your business and appreciate your continued support.
