Ms. Susan Hayes  
Collin County Purchasing

March 24, 2023

Ms. Hayes,

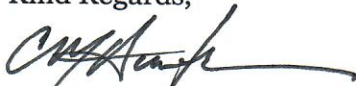

Corrections Products Company, LTD is the sole source manufacturer of the Adtec 1101 Electro-Mechanical locks currently installed at the Collin County Detention Center. Our business model is to sell our products directly to institutions and thus we do not have distributors or any third-party resellers that market or sell the Adtec product line.

Corrections Products Company is considered the OEM manufacturer of the Adtec Detention Systems product line since the acquisition of Adtec Detention Systems by Corrections Products Company, LTD in January 2000.

The Adtec 1101 lock is dimensional unique and was built to be incorporated seamlessly with the existing hollow metal doors that have been prepped for the Adtec 1101 locks. It was also designed to be incorporated with the existing electronic door control system currently in use with regards to electrical specifications of that unique system.

Please let me know if you have any additional questions where I can be of assistance.

Kind Regards,

Christian Hunter
