MOBILE LICENSE PLATE RECOGNITION: A VISUAL GUIDE

With new solutions entering the market for mobile license plate recognition, we wanted to provide some guidance to help you better understand how they work.

AI-ENABLED IN-CAR VIDEO SYSTEM

Increase tactical awareness and keep officers safe by enabling license plate scanning with the front-facing camera of the M500 in-car video system.

License plate recognition (LPR) is one of the many artificial intelligence (AI) enabled features available on the M500 that are designed to keep officers safer.

By pairing AI-powered officer safety features with evidence-grade, ultra high-definition video recording, the M500 transforms observation into action.

MOBILE LPR CAMERA SYSTEM

Enhance situational awareness and improve patrol efficiency at scale with the high-performance L5M camera system pur make and model information to accelerate investigations an

MOBILE LPR CAMERA SYSTEM

With time at a premium and distractions ever-growing, officer attention needs to be prioritized. The L5M mobile license plate recognition (LPR) camera system is a high-performance solution meant for those who want to maximize detections and data collection to ensure their officers are their safest and most productive while on the road.

With a new, industry-leading image sensor, the L5M provides unprecedented low light performance for accurate license plate and vehicle make and model recognition. A global shutter ensures clear image capture of license plates moving at higher speeds than ever. And our modernized in-car user experience makes all the tools officers need to stay alert and conduct investigations easily accessible.

Paired with the powerful VLP processor, configure your systems with up to four cameras that will continuously and reliably scan day-in and day-out. Even mix and match our previous-generation cameras within a single system for added flexibility or coverage.

Like all of our license plate recognition camera systems, the L5M seamlessly connects with our suite of software solutions, including Vigilant VehicleManager where data can be further operationalized with patented search capabilities and analytics.

DETECT MORE VEHICLES YOU PASS

Capture accurate license plate and make and model information on vehicles moving at high speed and in light and dark conditions.

STAY IN THE KNOW AS YOU DRIVE

Our in-car software keeps you informed at all times with real-time alerts, quick search, system monitoring and distraction-free design.

DEPLOY YOUR CAMERAS YOUR WAY

Rely on a flexible system that can be built to meet your exact needs with a variety of camera options and high-powered processing.

SCAN MORE. MAINTAIN LESS.

Patrol confidently with a system that is always up-to-date and will work as long and as hard as you do, in rain or shine, wind or snow.

AMPLIFY INSIGHT & AWARENESS

Go beyond basic alerts and searches with patented analytics and complete control over your data retention and sharing.

FOCUS YOUR ENFORCEMENT

BUILT TO KEEP COMMUNITIES SAFER

To do license plate recognition well, you need the right tools for the job. We provide the most flexibility and options for capturing license plate data with fixed, mobile, trailer and quick-deploy camera systems, video-based integration and even mobile apps. All of these are equipped with our in-house developed, industry-leading LPR algorithm that is relied upon by law enforcement agencies world-wide.

Beyond ensuring you can collect the data you need, our suite of software solutions, including Vigilant VehicleManager, combines robust hot list management and alerting options with patented search and data analytics to equip your team with the insights they need to close more cases, faster.

Our software also keeps you in complete control of your data and systems with group and user-based access control, agency-defined data retention and broad data sharing options with built in memorandum of understanding (MOU) templates for you and your partners.

Lastly, to ensure your program is most successful, your solution is backed by a team who has built our license plate recognition portfolio to be secure and designed for responsible use from the ground up. You also have access to 24/7 support and free in-person and virtual training from our trainers, all of whom were former users and want nothing more than to help you succeed.

FIXED LICENSE PLATE RECOGNITION: A VISUAL GUIDE

With new solutions entering the market for fixed and quick-deploy license plate recognition, here's some guidance to help you better understand how they work.

QUICK-DEPLOY LPR CAMERA SYSTEM

Collect targeted, tactical LPR data to a event or fill gaps in your LPR network. This solar, AC or battery-powered camera minutes anywhere with cellular coverage.

Run the L6Q on battery power and deploy it covertly to gather specific evidence for an investigation.

Use the solar power option to easily fill gaps in your LPR camera network without specialized infrastructure.
